A job-search manual that gives career seekers a systematic, tech-savvy formula to efficiently and effectively target potential employers and secure the essential first interview. The 2-Hour Job Search shows job-seekers how to work smarter (and faster) to secure first interviews. Through a prescriptive approach, Dalton explains how to wade through the Internet's sea of information and create a job-search system that relies on mainstream technology such as Excel, Google, LinkedIn, and alumni databases to create a list of target employers, contact them, and then secure an interview—with only two hours of effort. Avoiding vague tips like “leverage your contacts,” Dalton tells job-hunters exactly what to do and how to do it. This empowering book focuses on the critical middle phase of the job search and helps readers bring organization to what is all too often an ineffectual and frustrating process. For many students, an internship is the vital first step out of the classroom and into the professional world. It introduces the hectic and often intense workplace, it teaches vital skills, and it may lead to a first job or even a career. But most undergraduates have only the vaguest idea what an internship is, how to find a suitable and interesting one, how to apply for it, how to ace the interview, what the first day will be like, how to survive the ups and downs of the working world, and how to convert that experience into a future. In fact, the whole prospect of seeking an internship can be confusing, intimidating, or even terrifying. Molly Abrahamson, writing from the vantage point of a college senior, has written a clear, sympathetic, helpful, and even funny guide to help undergraduates through this daunting but ultimately rewarding process. Drawing on the experience of college career counselors, current undergraduates, employers and graduates who have used their internship as a springboard to greater things, she lays out the territory and steers the reader to the most exciting and scary of destinations: the real world. The Internship, Practicum, and Field Placement Handbook is a practical guide for interns in the helping professions, with real-world knowledge of the skills students need through every phase of their practicum, field placement, or internship. This text expertly guides students through the essential skills needed for beginning work in the field of mental health and outlines skills that will serve students throughout their academic and professional careers. Skills discussed include how to make a great first impression, understanding the process and content of clinical writing, recordkeeping, working with peers and supervisors, understanding diversity, cultivating self-care, and promoting safety. Every phase of the internship is discussed chronologically: from finding and preparing for placements to concluding relationships with clients and supervisors. Following an evidence and competency-based approach, the latest research findings are reviewed from the fields of psychology, social work, and counseling. The Internship, Practicum, and Field Placement Handbook is an invaluable resource for students, faculty, and supervisors engaged in the exciting, challenging experience of transitioning from academia into clinical training in the field. This volume builds on existing pedagogical research and efforts to showcase SoTL across the disciplines (Gurung, Chick, & Haynie, 2009; Chick, Haynie, & Gurung, 2012) but takes this important work in a new direction. In each chapter, interdisciplinary teams of authors address a single pedagogical question bringing each of their home discipline's specific literature and methodologies to the table. The result is a fresh examination of evidence-based practices for teaching and learning in higher education that is intentionally inclusive of faculty from different disciplines. This Handbook is designed to help cooperative education and internship professionals and employers design, carry out, and disseminate quality research and evaluation studies of work-based education. It offers examples of current, leading-edge studies about work-based education, but with a practical twist: The chapter authors frame their studies within a specific key research design issue, including finding a starting point and a theoretical framework; fitting research into one's busy practitioner workload; deciding on particular data-gathering methods and an overall methodological approach; integrating qualitative and quantitative methodologies; and disseminating results. Also addressed are questions and concerns that are relevant throughout the course of a research project: the use of theory in research; the role and relationship of program assessment to research; and ethical considerations in research. By combining descriptions of exemplary research and evaluation studies with practical advice from top researchers in the field, this volume is a useful tool for educators and employers who are designing and carrying out their own studies, as well as a resource for what current research is discovering and affirming about the field itself. Educators from other fields, such as study abroad and service-learning will also find this book an indispensable reference in conducting research on experiential learning and teaching.
