Greater Cincinnati Religious Peacemakers Oct 30 2022 Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite

foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

Statistics Sep 04 2020 The Fourth Edition of *Statistics: A Gentle Introduction* shows students that an introductory statistics class doesn't need to be difficult or dull. This text minimizes students' anxieties about math by explaining the

concepts of statistics in plain language first, before addressing the math. Each formula within the text has a step-by-step example to demonstrate the calculation so students can follow along. Only those formulas that are important for final calculations are included in the text so students can focus on the concepts, not the numbers. A wealth of real-world examples and applications gives a context for statistics in the real world and how it helps us solve problems and make informed choices. New to the Fourth Edition are sections on working with big data, new coverage of alternative non-parametric tests, beta coefficients, and the "nocebo effect," discussions of p values in the context of research, an expanded discussion of confidence intervals, and more exercises and homework options under the new feature "Test Yourself." Cries of Freedom Mar 23 2022 The Wandering Vine trilogy is based on three aspects of a spiritual journey through life. Even My Family, book one, is about finding your own path and following it. Cries of Freedom, book two, is about surrounding yourself with unconditional love. Once Again, book three, is about releasing bad karma. In Cries of Freedom, book two, the heroine, Elizabeth Randolph, must travel the

path she stepped onto when she rejected her parents' ideology and helped slaves escape from her father's plantation. Banished from her parents' Virginia plantation on the eve of the Civil War, Elizabeth travels North to raise the daughter of a slave. She wants to create the supportive, loving family her parents never gave her. But how? As a Southerner on Beacon Hill in Boston during the Civil War, anti-Southern abolitionists, narrow minds, and conflict surround her. And yet she is the one trying to raise a child with African heritage. George Parkman, an older, respected Bostonian, manages Elizabeth's inheritance from her great aunt. He has loved her since the first day they met but, because he feels inferior to the Randolph family, he has never made his feelings known. Elizabeth wonders if he'll consider her a burden when she arrives in Boston. John Appleton, a freethinking architect, was engaged to marry Elizabeth, but after Boston Brahmins financed John Brown's raid at Harpers Ferry her

father broke the engagement. John begged Elizabeth to run away with him, but she refused and couldn't tell him that she was staying to help two slaves escape. She does not know if he will still be waiting for her. Gabe Charles, her father's slave, has been her best friend since they nursed together at his mother's breasts. If he survived his escape to Canada, there is no way to know when it will be safe for him to live in Boston. The Fugitive Slave Act allows no safe haven in the United States. Now a free man, she wonders if he will be able to pick up their relationship where it left off. And there is Ruben Stone who hovered around her when she traveled alone to Baltimore after her banishment. Fear rises from her gut whenever she sees him, as if long ago he endangered her and now he is back to do it again. Will she create the family she longs for or end up caught in the past, alone and unhappy like her parents who defined themselves by community expectations rather than their hearts?

Walking to Listen Jan 21 2022 A memoir of one young man's coming of age on a journey across America--told through the stories of the people of all ages, races, and inclinations he meets along the way. Life is fast, and I've found it's easy to confuse the miraculous for the mundane, so I'm slowing down, way down, in order to give my full presence to the extraordinary that infuses each moment and resides in every one of us. At 23, Andrew Forsthoefel headed out the back door of his home in Chadds Ford,

Pennsylvania, with a backpack, an audio recorder, his copies of Whitman and Rilke, and a sign that read "Walking to Listen." He had just graduated from Middlebury College and was ready to begin his adult life, but he didn't know how. So he decided to take a cross-country quest for guidance, one where everyone he met would be his guide. In the year that followed, he faced an Appalachian winter and a Mojave summer. He met beasts inside: fear, loneliness, doubt. But he also encountered incredible kindness from strangers. Thousands shared their stories with him, sometimes confiding their prejudices, too. Often he didn't know how to respond. How to find unity in diversity? How to stay connected, even as fear works to tear us apart? He listened for answers to these questions, and to the existential questions every human must face, and began to find that the answer might be in listening itself. Ultimately, it's the stories of others living all along the roads of America that carry this journey and sing out in a hopeful,

heartfelt book about how a life is made, and how our nation defines itself on the most human level.

Pell's Equation Jan 01 2023 Pell's equation is part of a central area of algebraic number theory that treats quadratic forms and the structure of the rings of integers in algebraic number fields.

It is an ideal topic to lead college students, as well as some talented and motivated high school students, to a better appreciation of the power of mathematical technique. Even at the specific level of quadratic diophantine equations, there are unsolved problems, and the higher degree analogues of Pell's equation, particularly beyond the third, do not appear to have been well studied. In this focused exercise book, the topic is motivated and developed through sections of exercises which will allow the readers to recreate known theory and provide a focus for their algebraic practice. There are several explorations that encourage the reader to embark on their own research. A high school background in mathematics is all that is needed to get into this book, and teachers and others interested in mathematics who do not have (or have forgotten) a background in advanced mathematics may find that it is a suitable vehicle for keeping up an independent interest in the subject.

Discourse in Context: Contemporary Applied Linguistics Volume 3 Apr 23 2022 Featuring internationally renowned academics, this volume provides a snapshot of the field of applied linguistics, and illustrates how linguistics is engaging with the idea of 'context'. The book treats discourse as language in the contexts of its use in and above the level of the sentence and as systems of knowledge and beliefs. In using the term context(s), the book understands this as different situations in which discourse is produced and, on the other, how analysts construe context in their work. The volume is thus concerned with language in its context of use (little d discourse), but at the same time, more specifically, in individual chapters, with particular discourses as they are manifested in particular contexts (big D discourses). Well known discourse analysts contribute chapters focussing on different contexts with which they are familiar, viz. business, education, ethnicity and race, gender and sexuality, history,

intercultural contexts, lingua franca contexts, media, place, politics, race, and the virtual world. It brings together researchers from different approaches, but all with a commitment to the study of language in context. The contributors themselves represent different approaches to discourse analysis: conversation analysis, corpus linguistics, critical discourse analysis, ethnographic discourse analysis, mediated discourse analysis, multimodal discourse analysis, systemic functional linguistics. Readers are invited to compare and contrast these different contexts and approaches.
