This Surgeon General's report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco This **Guide to the Study and Use of Military History** is designed to foster an appreciation of the value of military history and explain its uses and the resources available for its study. It is not a work to be read and lightly tossed aside, but one the career soldier should read again or use as a reference at those times during his career when necessity or leisure turns him to the contemplation of the military past. A chilling political thriller that is dangerously close to becoming reality According to General Sir Richard Shirreff, recently retired Deputy Supreme Allied Commander Europe we are already at war with Russia. Putin is waging war by unconventional means, including sponsoring terrorist attacks in Ukraine and in the UK and also cyber warfare. This book shows how war with Russia could erupt into conventional

warfare with the bloodiest and most appalling consequences if the necessary steps are not taken urgently. As Admiral James G Stavridis, US Navy, former Supreme Allied Commander Europe, says 'You fail to read this book at your peril. Like any 'strongman', the Russian president's reputation for strength is everything. Lose momentum, fail to give the people what they want and he fails. Putin has already demonstrated that he has no intention of failing. He has already started a lethal dynamic which, unless checked right now, could see him invade the Baltic states. Russia's invasion and seizure of Georgia in 2008 was our 'Rhineland moment'. We ignored the warning signs - as we did back in the 1930s - and we made it 'business as usual'. Crimea in 2014 was the President's 'Sudetenland moment' and again he got away with it. Since 2014 Russia has invaded Ukraine. The Baltics could be next. Our political leaders assume that nuclear deterrence will save us. General Sir Richard Shirreff shows us why this will not wash. Alfred P. Sloan, Jr. led the General Motors Corporation to international business success by virtue of his brilliant managerial practices and his insights into the new consumer economy he and General Motors helped to produce. Sloan's business biography, *My Years With General Motors*, was an instant best seller when it was first published in 1964 and is still considered indispensable reading by modern business giants. Are personality disorders discrete conditions or rather distinctions along dimensions of general personality functioning? This collection of papers renews long-standing proposals for incorporating a dimensional model of personality disorder within the next DSM. It describes alternative models, addresses questions regarding their clinical application and utility, and suggests that future research seek to integrate such models within a common hierarchical structure. Drawn from a planning conference for DSM-V, *Dimensional Models of Personality Disorders* opens with a presentation of 18 proposals for dimensional approaches and proceeds with provocative contributions on a number of related issues ranging from hard science to clinical practice. The topics covered include molecular genetic research, neurobiological dimensional models of personality, and broad-spectrum developmental antecedents of adult personality disorders. In considering such a major revision to the DSM, the volume addresses not only the separation of clinical and personality disorders across Axes I and II but also the challenges of coverage and cutoffs that must be addressed if dimensional models are to be considered as viable alternatives to categorical diagnosis. Although the editors acknowledge that concerns are certain to be raised regarding a conversion to dimensional classification, these papers make a strong case for opening the field to alternative ways of enhancing clinical utility and improving the validity of basic classification concepts.
