How to Write Dazzling Dialogue Sep 04 2020 There is one sure-fire way of improving your novel "fast." . . You may know the fundamentals of how to write fiction. You may be more than competent in plot, structure and characters. But if your dialogue is dull it will drag the whole story down. On the other hand, if your dialogue is crisp and full of tension it "immediately" grabs the reader. And if that reader is an agent or editor, sharp dialogue will give them instant assurance that you know what you're doing as a writer. Writing a bestseller or hot screenplay is no easy task, but dazzling dialogue is an absolute essential if you want to get there. The best part is, the skills of the dialogue craft are easy to understand and put into practice. #1 bestselling writing coach James Scott Bell has put together and expanded upon the dialogue lectures from his popular writing seminars. In "How to Write Dazzling Dialogue" you'll learn: What fictional dialogue is ... and isn't The 11 secrets of crafting memorable dialogue The 5 essential tasks of dialogue 5 ways to improve your dialogue ear 4 can't-miss methods to increase conflict and tension in any dialogue exchange The top 10 dialogue issues, and how to resolve them You'll also see dazzling dialogue in action with examples from hit novels and screenplays. Don't sabotage your chances of selling your work to readers or publishers because the dialogue is unexceptional. Dazzle them with what the characters say. "How to Write Dazzling Dialogue" will give you the tools to do it.

Behavior of Unbounded Post-tensioned Masonry Walls Jul 03 2020 This book reports on a comprehensive analytical, experimental and numerical study on the flexural response of post-tensioned masonry walls under in-plane loads. It explores an important mechanism in this new generation of structural walls, called "Self-centering". This mechanism can reduce residual drifts and structural damage during earthquake ground motion, and is particularly favorable for structures which are designed for immediate occupancy performance levels. The book reports on the development and verification of a finite element model of post-tensioned masonry walls. It describes a detailed parametric study to predict the strength of post-tensioned masonry walls. New design methodologies and expressions are developed to predict the flexural strength and force-displacement response of post-tensioned masonry. Experimental study is carried out to better understand the behavior of post-tensioned masonry walls and also to evaluate the accuracy of the proposed design procedure and expressions. The book also includes an introduction to current research on unbounded post-tensioned masonry walls, together with an extensive analysis of previously published test results.

Writing Quality Research Papers Feb 19 2022 Explores the techniques and standard sentence formation DESCRIPTION This book is about the thorough understanding of the essentials and the way to write the quality research papers. It explores the techniques and standard sentence formation along with grammar tenses for different sections of research papers. The text gives the methodological insight of writing the research papers and escape from the rejections on submitting them to high-quality international journals. Beginning with the way to construct the title of the research paper, how to write effective (attractive) abstract, well-explored introduction, balanced and concerned literature review, expressing the methodology used, effectively provide the result and discuss the output and finding of the research, give clear and sound concluding remarks with future implications. Presented in the simple language and motivation style, the book is ideal for all disciplines and research community. It is ideally suited for the beginners in the research, in Masters, PhD or independent research. The book provides easy and brief guidelines to format and write the sentences of different sections of research papers, research proposals and thesis. It also helps to avoid the plagiarism in the text and to publish the research in high quality international journals. KEY FEATURES The book is about writing quality research paper and thesis It is in a simple english and style Provides step by step guidance on how to write different sections It helps in getting selected a research paper in international journals of good impact factor It also gives a comprehensive understanding on how to escape from rejection of papers from high standard international journal WHAT WILL YOU LEARN Steps to select a Title Write an Introduction, Literature Review, Methodology, Results and Discussion of research paper WHO THIS BOOK IS FOR Graduate, Post graduate, Academicians, Educationists, Professionals and Researchers. Bridging the Gap Between Policy and Science in Assessing the Health Status of Marine Ecosystems, 2nd Edition Mar 11 2021 Marine management requires approaches which bring together the best research from the natural and social sciences. It requires stakeholders to be well-informed by science and to work across administrative and geographical boundaries, a feature especially important in the inter-connected marine environment. Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services. Once those marine ecosystem services have been created, they deliver societal goods as long as society inputs its skills, time, money and energy to gather those benefits. However, if societal goods and benefits are to be limitless, society requires appropriate administrative, legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality, but instead support its sustainable use.

Improving Bayesian Reasoning: What Works and Why? Dec 08 2020 We confess that the first part of our title is somewhat of a misnomer. Bayesian reasoning is a normative approach to probabilistic belief revision and, as such, it is in need of no improvement. Rather, it is the typical individual whose reasoning and judgments often fall short of the Bayesian ideal who is the focus of improvement. What have we learnt from over a half-century of research and theory on this topic that could explain why people are often non-Bayesian? Can Bayesian reasoning be facilitated, and if so why? These are the questions that motivate this Frontiers in Psychology Research Topic. Bayes' theorem, named after English statistician, philosopher, and Presbyterian minister, Thomas Bayes, offers a method for updating one's prior probability of an hypothesis H on the basis of new data D such that $P(H|D) = P(D|H)P(H)/P(D)$. The first wave of psychological research, pioneered by Ward Edwards, revealed that people were overly conservative in updating their posterior probabilities (i.e., $P(D|H)$). A second wave, spearheaded by Daniel Kahneman and Amos Tversky, showed that people often ignored prior probabilities or base rates, where the

priors had a frequentist interpretation, and hence were not Bayesians at all. In the 1990s, a third wave of research spurred by Leda Cosmides and John Tooby and by Gerd Gigerenzer and Ulrich Hoffrage showed that people can reason more like a Bayesian if only the information provided takes the form of (non-relativized) natural frequencies. Although Kahneman and Tversky had already noted the advantages of frequency representations, it was the third wave scholars who pushed the prescriptive agenda, arguing that there are feasible and effective methods for improving belief revision. Most scholars now agree that natural frequency representations do facilitate Bayesian reasoning. However, they do not agree on why this is so. The original third wave scholars favor an evolutionary account that posits human brain adaptation to natural frequency processing. But almost as soon as this view was proposed, other scholars challenged it, arguing that such evolutionary assumptions were not needed. The dominant opposing view has been that the benefit of natural frequencies is mainly due to the fact that such representations make the nested set relations perfectly transparent. Thus, people can more easily see what information they need to focus on and how to simply combine it. This Research Topic aims to take stock of where we are at present. Are we in a proto-fourth wave? If so, does it offer a synthesis of recent theoretical disagreements? The second part of the title orients the reader to the two main subtopics: what works and why? In terms of the first subtopic, we seek contributions that advance understanding of how to improve people's abilities to revise their beliefs and to integrate probabilistic information effectively. The second subtopic centers on explaining why methods that improve non-Bayesian reasoning work as well as they do. In addressing that issue, we welcome both critical analyses of existing theories as well as fresh perspectives. For both subtopics, we welcome the full range of manuscript types.

From Research to Manuscript Sep 16 2021 Observations Plus Recipes It has been said that science is the orderly collection of facts about the natural world. Scientists, however, are wary of using the word 'fact.' 'Fact' has the feeling of absoluteness and universality, whereas scientific observations are neither absolute nor universal. For example, 'children have 20 deciduous [baby] teeth' is an observation about the real world, but scientists would not call it a fact. Some children have fewer deciduous teeth, and some have more. Even those children who have exactly 20 deciduous teeth use the full set during only a part of their childhood. When they are babies and toddlers, children have less than 20 visible teeth, and as they grow older, children begin to lose their deciduous teeth, which are then replaced by permanent teeth. 'Children have 20 deciduous [baby] teeth' is not even a complete scientific statement. For one thing, the statement 'children have 20 deciduous teeth' does not tell us what we mean by 'teeth.' When we say "teeth," do we mean only those that can be seen with the unaided eye, or do we also include the hidden, unerupted teeth? An observation such as 'children have 20 deciduous teeth' is not a fact, and, by itself, it is not acceptable as a scientific statement until its terms are explained: scientifically, 'children have 20 deciduous teeth' must be accompanied by definitions and qualifiers.

The Confidential Internet Intelligence Manuscript Mar 23 2022 If I could show you one simple technique that in 5 minutes would increase your Internet sales by 32%, would you do it? What if I had a collection of these techniques that took me years to test and perfect, would you want to use them? Of course - and that's why people are going crazy about this manuscript. No other marketer has ever revealed information this sensitive. For years, I've kept this information quiet - now, you've probably heard the buzz that I've finally released my "CONFIDENTIAL Internet Intelligence Manuscript" to the public. Jay Conrad Levinson said he'd easily pay \$2,000 or more for this document. He said, "Every page is a true revelation." Joe Vitale said, "Everyone selling ANYTHING on the Net should keep a copy of this on their desk." This simple document is probably the most powerful thing I've ever written. These simple techniques will increase your sales by 32% (at least). How can you do this? Well, it's quite easy to use and purely scientific. These aren't just theories and guesses - these are SPECIFIC things you can do right now that will increase your sales. And each of these techniques have been SCIENTIFICALLY proven. This book reveals the results of years of research conducted at Aesop showing EXACTLY the simple techniques I use that dramatically increase Internet sales. One of these techniques increased our sales by a clearly measurable 412%. If I could reach out and grab you through this cover I'd shake you to make you realize how important what I'm about to show you is. What if this manuscript is exactly what you need to turn your sales around? There's a reason people are going crazy for this document. DON'T YOU WANT TO KNOW WHY?

Intelligent Imaging and Analysis Feb 07 2021 Imaging and analysis are widely involved in various research fields, including biomedical applications, medical imaging and diagnosis, computer vision, autonomous driving, and robot controls. Imaging and analysis are now facing big changes regarding intelligence, due to the breakthroughs of artificial intelligence techniques, including deep learning. Many difficulties in image generation, reconstruction, de-noising skills, artifact removal, segmentation, detection, and control tasks are being overcome with the help of advanced artificial intelligence approaches. This Special Issue focuses on the latest developments of learning-based intelligent imaging techniques and subsequent

analyses, which include photographic imaging, medical imaging, detection, segmentation, medical diagnosis, computer vision, and vision-based robot control. These latest technological developments will be shared through this Special Issue for the various researchers who are involved with imaging itself, or are using image data and analysis for their own specific purposes.

Science and Applications of Coastal Remote Sensing Mar 30 2020 IN MEMORIAL: This Research Topic is dedicated to our co-editor Dr. Tiffany Moisan, a well-regarded ocean color remote sensing scientist, who unexpectedly passed away during its preparation. Dr. Moisan was a dear friend, and upbeat and enthusiastic colleague and a scientist committed to the use of remote sensing to improve our understanding of marine microbiology and phytoplankton ecology. She was a strong supporter of the development of remote sensing capabilities and applications for coastal and inland waters, and we know that she would have wanted this Research Topic to provide her colleagues an opportunity to share and promote their work in this area. A voice in our community is now quiet. Let the chorus of our shared song continue with her memory. Dr. Tiffany Moisan is survived by her loving family, including her husband, Dr. John Moisan and her two daughters.

Legal Knowledge and Information Systems Jul 15 2021 In recent years, interest within the research community and the legal industry regarding technological advances in legal knowledge representation and processing has been growing. This relates to areas such as computational models of legal reasoning, cybersecurity, privacy, trust and blockchain methods, among other things. This book presents the proceedings of JURIX 2022, the 35th International Conference on Legal Knowledge and Information Systems, held from 14 –16 December in Saarbrücken, Germany, under the auspices of the Dutch Foundation for Legal Knowledge Based Systems and hosted by Saarland University. The annual JURIX conference has become an international forum for academics and professionals to exchange knowledge and experiences at the intersection of law and artificial intelligence (AI). For this edition, 62 submissions were received from 163 authors in 24 countries. Following a rigorous review process, carried out by a programme committee of 72 experts recognised in the field, 14 submissions were selected for publication as long papers, 22 as short papers and 5 as demo papers, making a total of 41 papers altogether and representing a 22.5% acceptance rate for long papers (66.1% overall). The broad array of topics covered includes argumentation and legal reasoning, legal ontologies and the semantic web, machine and deep learning and natural language processing for legal knowledge extraction, as well as argument mining, translation of legal texts, defeasible logic, legal compliance, explainable AI, alternative dispute resolution, legal drafting and smart contracts. Providing an overview of recent advances, the book will be of interest to all those working at the interface between the law and AI.

Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1. Aug 28 2022 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience – such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators

alike.
