Public Discourses About Homosexuality and Religion in Europe and Beyond Jul 27 2022 This volume addresses three things many people do not discuss candidly with strangers or mere acquaintances: God, sex, and politics. These can easily become topics of fierce debate, particularly when taken together, as has been the case with same-sex marriage legislation, the Vatican's criticism of "gender ideology," or the repeatedly asserted claim that Islam, homosexuality, and gender equality are essentially incompatible. This volume investigates what is at stake in these constructions of religion and homosexuality in public discourses. Starting with the Netherlands as a special case study, it proceeds with contributions on other predominantly postsecular countries in central, northern, and southern Europe as well as several postcommunist

and postcolonial countries “beyond Europe.” Combining contemporary and historical perspectives and approaches from both the humanities and the social sciences, the contributors explore how national and European identities are constructed and contested in debates on religion and homosexuality. Chapter 2 and Chapter 8 of this book are available open access under a CC BY 4.0 license at link.springer.com.

Service-Oriented Computing Jun 13 2021 This book constitutes the refereed conference proceedings of the 12th International Conference on Service-Oriented Computing, ICSOC 2014, held in Paris, France, in November 2014. The 25 full and 26 short papers presented were carefully reviewed and selected from 180 submissions. The papers are organized in topical sections on business process management; service composition and discovery; service design, description and evolution; cloud and business service management; ensuring composition properties; quality of service; semantic web services; service management; cloud service management; business service management; trust; service design and description.

Engaging With Stakeholders Sep 04 2020 *Engaging with Stakeholders: A Relational Perspective on Responsible Business* contends that meaningful and constructive stakeholder engagement efforts should be rooted in a deep relational process of shared understanding, expectations, and viewpoints, through honest, continued dialogue between stakeholders and company management. This anthology follows and reaffirms this view, which also establishes the increasing need to explore the subtleties of how companies can respectfully engage their stakeholders in ways that reflect the corporate strategy and contribute to the ongoing development of business activities and creation of value, for themselves and stakeholders, from social, environmental, and economic perspectives. Stakeholder engagement practices, however, remain highly complex and difficult to manage; their ability to generate value in an inclusive way requires critical consideration. Sound stakeholder engagement efforts also constitute a keystone for responsible business activities. Drawing on a wide range of literature and studies, this book addresses key dimensions of stakeholder engagement, through a responsible business lens, and thereby contributes to identifying the opportunities, challenges, and key organizational implications associated with their unfolding. The four main topics covered are: • Delineating the nature and multiple *raison d'être* of stakeholder engagement • Dialogical and communicational foundations of stakeholder engagement • Engaging with diverse stakeholders throughout the value chain • Reaping organizational returns and relational rewards of stakeholder engagement efforts

Healthcare Education in Nigeria Nov 06 2020 This book provides a comprehensive and authoritative assessment of the training of health professionals in Nigeria, looking back to how health care education has evolved in the country over time, before investigating new and emerging trends. The book begins with a discussion of the fundamentals of health care education, the art of teaching health care students, and modeling professionalism in health care. The book highlights the work of pioneer Nigerian health care academics, and explores the administration of health care education at departmental level. Finally, it highlights the role of elite Nigerian health

care academics in the diaspora, chronicles contemporary challenges in health care education, and makes recommendations for reform. This book will be of interest to students, scholars, and practitioners working on health care education in Africa.

A Journey from Process Algebra via Timed Automata to Model Learning Nov 18 2021 This Festschrift, dedicated to Frits W. Vaandrager on the occasion of his 60th birthday, contains papers written by many of his closest collaborators. Frits has been a Professor of Informatics for Technical Applications at Radboud University Nijmegen since 1995, where his research focuses on formal methods, concurrency theory, verification, model checking, and automata learning. The volume contains contributions of colleagues, Ph.D. students, and researchers with whom Frits has collaborated and inspired, reflecting a wide spectrum of scientific interests, and demonstrating successful work at the highest levels of both theory and practice.

Job Scheduling Strategies for Parallel Processing Jan 21 2022 This book constitutes the thoroughly refereed post-conference proceedings of the 23rd International Workshop on Job Scheduling Strategies for Parallel Processing, JSSPP 2020, held in New Orleans, LA, USA, in May 2020.* The 6 revised full papers presented were carefully reviewed and selected from 8 submissions. In addition to this, one invited paper and one keynote paper were included in the workshop. The papers cover topics within the fields of resource management and scheduling. They focus on several interesting problems such as resource contention and workload interference, new scheduling policy, scheduling ultrasound simulation workflows, and walltime prediction. * The conference was held virtually due to the COVID-19 pandemic.

Social Licence and Ethical Practice Oct 30 2022 What is the social licence to operate, and what are its ethical risks and promises? This collection explores these questions from a range of perspectives.

Federal Register May 13 2021

Handbook of Research on Redesigning Teaching, Learning, and Assessment in the Digital Era Jul 03 2020 Recent evolutions, such as pervasive networking and other enabling technologies, have been increasingly changing human life, knowledge acquisition, and the way works are performed and students learn. In this societal change, educational institutions must maintain their leading role. They have therefore embraced digitally enhanced learning to provide increased flexibility and access for their students. The Handbook of Research on Redesigning Teaching, Learning, and Assessment in the Digital Era provides insights into the transformation of education in the digital era and responds to the needs of learners of any context and background through relevant studies that include sound pedagogical and content knowledge. Covering key topics such as hybrid learning, media, remote learning, and social media, this major reference work is ideal for administrators, policymakers, academicians, researchers, scholars, practitioners, librarians, instructors, and students.

Implementing Service Level Objectives Mar 03 2023 Although service-level objectives (SLOs) continue to grow in importance, there's a distinct lack of information about how to implement them. Practical advice that does exist usually assumes that

your team already has the infrastructure, tooling, and culture in place. In this book, recognized SLO expert Alex Hidalgo explains how to build an SLO culture from the ground up. Ideal as a primer and daily reference for anyone creating both the culture and tooling necessary for SLO-based approaches to reliability, this guide provides detailed analysis of advanced SLO and service-level indicator (SLI) techniques. Armed with mathematical models and statistical knowledge to help you get the most out of an SLO-based approach, you'll learn how to build systems capable of measuring meaningful SLIs with buy-in across all departments of your organization. Define SLIs that meaningfully measure the reliability of a service from a user's perspective Choose appropriate SLO targets, including how to perform statistical and probabilistic analysis Use error budgets to help your team have better discussions and make better data-driven decisions Build supportive tooling and resources required for an SLO-based approach Use SLO data to present meaningful reports to leadership and your users

Official Gazette of the United States Patent and Trademark Office May 01 2020

A Straightforward Guide to Teacher Merit Pay Feb 19 2022 Reward your best teachers for the great work they do! Is your school system considering teacher merit pay? Now is the time to know the potential pitfalls and learn from the experiences of other districts. Respected experts Ritter and Barnett provide a step-by-step approach to merit pay that draws on best practices from effective, successful programs. You'll find: A user-friendly summary of existing merit pay programs and their strengths and weaknesses Six essential principles for designing a program that supports teacher professional development, schoolwide progress, and student achievement How-to's and tools for every phase of program development, including collaborating with teachers to create balanced assessment tools

Defensible Teacher Evaluation Aug 16 2021 Providing strategies for the development and implementation of classroom assessment systems, this book explores using evidence of student achievement in the evaluation of teacher performance.

Eurit 86: Developments in Educational Software and Courseware Dec 28 2019 *Eurit 86: Developments in Educational Software and Courseware* provides information pertinent to innovative prototypes, design and development approaches, product evaluation, organization of production, and implementation. This book discusses the integration of information technology in education. Organized into seven parts encompassing 104 chapters, this book begins with an overview of the educational policy in relation to its response to information technology. This text then provides a brief summary of the development of courseware with emphasis on the problems encountered in implementing it in schools. Other chapters consider the use of technology in the science laboratory, which can provide useful experience with regard to its effects on the science curriculum. This book discusses as well the implementation strategies for computers in education. The final chapter deals with the economics of educational software. This book is a valuable resource for software developers, engineers, computer programmers, researchers, courseware developers, teachers, and teacher trainers.

Evaluating Student Learning Outcomes in Counselor Education Jan 01 2023 This timely text describes the role of program evaluation in counselor education and provides step-by-step guidance for faculty seeking to develop comprehensive Student Learning Outcome (SLO) evaluation plans to meet accountability expectations. It serves as a blueprint for demystifying the SLO process and making the switch from an input-based measure of productivity that focuses on what counseling programs do, to an outcome-based approach that concentrates on the quality of learning through evidence-based assessment of students' knowledge and skills. The first and second parts of the book lay the foundation for the SLO process and provide practical guidance for identifying and developing direct and indirect measures of student learning. Part III offers strategies for creating measures; collecting, managing, and reporting student data; and using data to ensure competence. In Part IV, counselor educators across the country offer hands-on application through a wide variety of SLO activities and rubrics linked to each of the curricular and specialty areas of the 2016 CACREP Standards.

Sports Didactics in Europe Dec 08 2020 During the past decades, the scientific discipline of Sports Didactics has developed in a heterogenous manner across national borders and individual university locations in Europe. Its position and situatedness has been characterised by its relation to and differentiation from Sports Pedagogy and other sub-disciplines within sports and educational sciences. The significance of Sports Didactics remains closely connected to the role of the school subject Physical Education as well as Physical Education Teacher Education at universities and colleges. This collected volume provides an overview of the subject understandings, theory landscapes, research contexts and practice models across 24 European countries along five lines of investigation: national historical developments of Sports Didactics, main trends and tendencies of theoretical differentiation, application fields of research and theory formation, recent research perspectives and possible future developments.

The FIAF Moving Image Cataloguing Manual Apr 23 2022 The FIAF Moving Image Cataloguing Manual is the result of many years of labor and collaboration with numerous professionals in the moving image field. It addresses the changes in information technology that we've seen over the past two decades, and aligns with modern cataloguing and metadata standards and concepts such as FRBR (Functional Requirements for Bibliographic Records), EN 15907, and RDA (Resource Description and Access). The manual is designed to be compatible with a variety of data structures, and provides charts, decision trees, examples, and other tools to help experts and non-experts alike in performing real-world cataloguing of moving image collections.

Creativity & Cognition Dec 20 2021

Curriculum Landscapes and Trends Nov 30 2022 Curriculum problems are everywhere: alert observers with a practiced eye and educated mind will find it almost impossible to read a newspaper without discovering curricular issues. The media often

report about educational reforms or even about curriculum wars with opposing parties fiercely debating the aims, content and organization of learning. Few people analyze these trends and discussions from a curricular conceptual framework. In addition, people sometimes think that their curriculum approaches and problems are unique and context-specific. However, international experience shows us that we can learn a lot from curriculum issues elsewhere. This book aims to sharpen the eyes and minds of a broader audience in identifying, understanding, addressing and reflecting upon curriculum problems. It also aims to contribute to the increased exchange, discussion and reflection on all the current curriculum problems that form such a crucial part of learning worldwide.

Building Secure and Reliable Systems Jan 27 2020 Can a system be considered truly reliable if it isn't fundamentally secure? Or can it be considered secure if it's unreliable? Security is crucial to the design and operation of scalable systems in production, as it plays an important part in product quality, performance, and availability. In this book, experts from Google share best practices to help your organization design scalable and reliable systems that are fundamentally secure. Two previous O'Reilly books from Google—*Site Reliability Engineering* and *The Site Reliability Workbook*—demonstrated how and why a commitment to the entire service lifecycle enables organizations to successfully build, deploy, monitor, and maintain software systems. In this latest guide, the authors offer insights into system design, implementation, and maintenance from practitioners who specialize in security and reliability. They also discuss how building and adopting their recommended best practices requires a culture that's supportive of such change. You'll learn about secure and reliable systems through: Design strategies Recommendations for coding, testing, and debugging practices Strategies to prepare for, respond to, and recover from incidents Cultural best practices that help teams across your organization collaborate effectively

Site Reliability Engineering May 05 2023 In this collection of essays and articles, key members of Google's Site Reliability Team explain how and why their commitment to the entire lifecycle has enabled the company to successfully build, deploy, monitor, and maintain some of the largest software systems in the world.

Platelets and Megakaryocytes Jun 01 2020 12 The average human body has in the order of 10 circulating platelets. They are crucial for hemostasis, and yet excessive platelet activation is a major cause of morbidity and mortality in western societies. It is therefore not surprising that platelets have become one of the most extensively investigated biological cell types. We are, however, far from understanding precisely how platelets become activated under physiological and pathophysiological conditions. In addition, there are large gaps in our knowledge of platelet production from their giant precursor cell, the megakaryocyte. Understanding megakaryocyte biology will be crucial for the development of platelet gene targeting. The aim of *Platelets and Megakaryocytes* is therefore to bring together established and recently developed techniques to provide a comprehensive guide to the study of both the platelet and the

megakaryocyte. It consists of five sections split between two volumes. The more functional assays appear in Volume 1, whereas Volume 2 includes signaling techniques, postgenomic methods, and a number of key perspectives chapters. Part I of Volume 1, Platelets and Megakaryocytes: Functional Assays, describes many well established approaches to the study of platelet function, including aggregometry, secretion, arachidonic acid metabolism, procoagulant responses, platelet adhesion under static or flow conditions, flow cytometry, and production of microparticles. Although one would ideally wish to perform experiments with human platelets, studies within the circulation using intravital microscopy require the use of animal models, which are described in Chapter 16, vol. 1.

International Conference on Computer-Aided Production Engineering Oct 06 2020

Progress in Atomic Spectroscopy Mar 11 2021 W. HANLE and H. KLEINPOPPEN
In 1919, in the first edition of *Atombau und Spektrallinien*, Sommerfeld referred to the immense amount of information which had been accumulated during the first period of 60 years of spectroscopic practice. Sommerfeld emphasized that the names of Planck and Bohr would be connected forever with the efforts that had been made to understand the physics and the theory of spectral lines. Another period of almost 60 years has elapsed since the first edition of Sommerfeld's famous monograph. As the editors of this monograph, *Progress in Atomic Spectroscopy*, we feel that the present period is best characterized by the large variety of new spectroscopic methods that have been invented in the last decades. Spectroscopy has always been involved in the field of research on atomic structure and the interaction of light and atoms. The development of new spectroscopic methods (i.e., new as compared to the traditional optical methods) has led to many outstanding achievements, which, together with the increase of activity over the last decades, appear as a kind of renaissance of atomic spectroscopy.

Professional Development for Primary Teachers in Science and Technology Jul 15 2021 This book presents the research output of the Dutch project VTB-Pro, an internationally-oriented project that aimed at providing primary school teachers with the knowledge, abilities and attitudes that are necessary to implement science and technology education in their classes. An introductory chapter by Wynne Harlen and Pierre Lena positions this project in the international context. From the Foreword by Dr. Michel Rocard: I have been pleased to discover the VTB-Pro three-years project carried in the Netherlands (Broadening technological education in primary school). Focusing on professional development of teachers and presenting first hand testimonies and research, the present book demonstrates how to deal with this issue, so critical for a renewed pedagogy. With proper methods, the knowledge of science, the interest in science and technology, the pedagogical skills can all be improved among teachers who often have no or little affection for science.

Beyond Foundations Aug 04 2020 Sharpen advising expertise by exploring critical issues affecting the field *Beyond Foundations*, a core resource for experienced academic advisors, gives practitioners insight into important issues affecting academic

advising. In addition to gaining understanding of foundational concepts and pressing concerns, master advisors engage with case studies to clarify their roles as educators of students, as thought leaders in institutions, and as advocates for the profession. Pillar documents—the NACADA Core Values, NACADA Concept of Academic Advising, and CAS Standards—serve as sources of both information and inspiration for those seeking to improve advising. New strategies inform advisors helping a diverse student population delineate meaningful educational goals. Each chapter prompts productive discussions with fellow advisors interested in cultivating advising excellence. To promote advisor influence in higher education, experienced contributors explain new trends—including the impact of external forces and legal issues on postsecondary institutions—and the evolution of advising as a profession and a field of inquiry. Expert insight and practical focus contribute to the development of experienced advisors. Use existing resources in new ways to master advising roles and encourage student success Apply theory to advance advising practice Create and optimize professional development opportunities Establish recognition for the contributions of academic advisors to the institution and higher education Face challenges created by the changing higher education landscape Advisors must meet the expectations of students, parents, faculty members, administrators, and outside agencies, all while navigating an increasingly complex range of issues presented by a student population unlike any that has come before. Beyond Foundations provides the insight and clarity advisors need to help students achieve their educational goals and to advance the field. European Conference on Consumer Education in Schools, Stockholm 1993 Jan 09 2021

Central California Coastal Prehistory Mar 23 2022

Industrializing Financial Services with DevOps Feb 07 2021 Embrace best practices to advance and help evolve your DevOps operating model in the right direction and overcome common challenges that financial services organizations face. Purchase of the print or kindle book includes a free eBook in the PDF format. Key Features Design the right DevOps operating model for your organization through practical examples Get insights into a variety of proven practices and concepts that you can employ during your DevOps adoption Gain a holistic view of the complete DevOps capabilities and mechanisms to be enabled Book Description In recent years, large financial services institutions have been embracing the concept of DevOps in the core of their digital transformation strategies. This book is inspired by real enterprise DevOps adoptions in the financial services industry and provides a comprehensive proven practice guide on how large corporate organizations can evolve their DevOps operating model. The book starts by outlining the fundamentals comprising a complete DevOps operating model. It continues with a zoom in on those fundamentals, combining adoption frameworks with real-life examples. You'll cover the three main themes underpinning the book's approach that include the concepts of 360°, at relevance, and speeds. You'll explore how a bank's corporate and technology strategy links to its enterprise DevOps evolution. The book also provides a rich array of proven practices on how to design

and create a harmonious 360° DevOps operating model which should be enabled and adopted at relevance in a multi-speed context. It comes packed with real case studies and examples from the financial services industry that you can adopt in your organization and context. By the end of this book, you will have plenty of inspiration that you can take back to your organization and be able to apply the learning from pitfalls and success stories covered in the book. What you will learn

Understand how a firm's corporate strategy can be translated to a DevOps enterprise evolution

Enable the pillars of a complete DevOps 360° operating model

Adopt DevOps at scale and at relevance in a multi-speed context

Implement proven DevOps practices that large incumbents banks follow

Discover core DevOps capabilities that foster the enterprise evolution

Set up DevOps CoEs, platform teams, and SRE teams

Who this book is for

This book is for DevOps practitioners, banking technologists, technology managers, business directors and transformation leads. Prior knowledge of fundamental DevOps terminologies and concepts and some experience practicing DevOps in large organizations will help you make the most out of this book.

Certified Nurse Educator Review Book Feb 28 2020 Based on the CNE® examination blueprint, *Certified Nurse Educator Review Book: The Official NLN Guide to the CNE® Exam, Second Edition* delivers a comprehensive review to prepare you to take the Certified Nurse Educator examination. Each chapter provides an overview of the content included on the exam blueprint and practice test items, complete with rationales for correct and incorrect answers, reflecting the types of items you will encounter on the exam. This revised edition streamlines and enhances your exam preparation with updated content, additional bulleted lists and tables, additional practice questions, and example scenarios that demonstrate the practical application of chapter concepts.

Cost Management Sep 16 2021 *Cost Management: Measuring, Monitoring, and Motivating Performance, Third Canadian Edition* was written to help students learn to appropriately apply cost accounting methods in a variety of organizational settings. To achieve this goal, students must also develop professional competencies, such as strategic/critical thinking, risk analysis, decision making, ethical reasoning and communication. This is in line with the CPA curriculum and the content of this edition and the problem materials is mapped to the CPA. Many students fail to recognize the assumptions, limitations, behavioural implications, and qualitative factors that influence managerial decision making. The textbook is written in an engaging step-by-step style that is accessible to students. The authors are proactive about addressing the challenges that instructors and students face in their teaching and learning endeavors. They utilize features such as realistic examples, real ethical dilemmas, self-study problems and unique problem material structured to encourage students to think about accounting problems and problem-solving more complexly.

Resources in Education Oct 18 2021

Using Formative Assessment to Support Student Learning Objectives Sep 28 2022

As student learning objectives become an increasingly prominent approach to setting

goals and growth measures in schools, teachers' competence in formative assessment is essential. *Using Formative Assessment to Support Student Learning Objectives* introduces current and future educators to SLOs as tools for shaping career- and college-ready students. Written in concise and straightforward language, and replete with step-by-step exercises, real-life examples, and illustrative charts, this useful guide provides pre- and in-service educators with the theoretical background and practical tools needed to implement the latest SLO research in their classrooms.

The London, Edinburgh and Dublin Philosophical Magazine and Journal of Science Apr 11 2021

Lived Religion and the Politics of (In)Tolerance Mar 30 2020 This volume explores the ways in which lived religion encourages and contributes to conflicts, as well as fosters tolerance, in the interlocking rural, urban, and virtual social spheres. Through ten case studies with vast geographical and religious variation, the contributors address some of the shortcomings in analyses of the relationship between religion and (in)tolerance and offers a theoretically and empirically more nuanced understanding of the micro-politics of (in)tolerance and the roles of lived religion in it. The book argues that (in)tolerance and its connection to religion cannot be fully understood unless analyzed from below, which means that the focus needs to be not only on public institutions or religio-political spaces but also on (in)tolerance of ordinary people and their performativity, practices, and interests in non-institutionalized spaces. This showcases the ambiguous interconnectedness of lived religion and (in)tolerance. *Lived Religion and the Politics of (In)Tolerance* will be of interest to students and scholars interested in lived religion, the relationship between politics and religion, and those working in cross-cultural dialogue and through an anti-racism, and anti-violence lens.

Scientific Studies at Fletcher's Ice Island, T-3, 1952-1955 Feb 02 2023

K-12 STEM Education in Urban Learning Environments Apr 04 2023 This title is an IGI Global Core Reference for 2019 as it provides the timeliest, trending research around overcoming challenges within the urban educational system. Featuring real-world solutions and comprehensive coverage on teacher professional development, racial microaggressions, STEM, and diversity in elementary and secondary education, this publication is ideal for teachers, faculty, administrators, policymakers, and educational researchers. *K-12 STEM Education in Urban Learning Environments* provides emerging research on the challenges and barriers of STEM education in urban environments and how to move forward in overcoming these challenges and barriers to provide equitable education for all K-12 students. Featuring coverage on a broad range of topics such as teacher preparation, programming, gender and racial barriers, and more, this publication is ideally designed for teachers, faculty, administrators, policymakers, researchers, and scholars.

The Site Reliability Workbook May 25 2022 In 2016, Google's Site Reliability Engineering book ignited an industry discussion on what it means to run production services today—and why reliability considerations are fundamental to service design. Now, Google engineers who worked on that bestseller introduce *The Site Reliability*

Workbook, a hands-on companion that uses concrete examples to show you how to put SRE principles and practices to work in your environment. This new workbook not only combines practical examples from Google's experiences, but also provides case studies from Google's Cloud Platform customers who underwent this journey.

Evernote, The Home Depot, The New York Times, and other companies outline hard-won experiences of what worked for them and what didn't. Dive into this workbook and learn how to flesh out your own SRE practice, no matter what size your company is. You'll learn: How to run reliable services in environments you don't completely control—like cloud Practical applications of how to create, monitor, and run your services via Service Level Objectives How to convert existing ops teams to SRE—including how to dig out of operational overload Methods for starting SRE from either greenfield or brownfield

Edge Intelligence Jun 25 2022 This graduate-level textbook is ideally suited for lecturing the most relevant topics of Edge Computing and its ties to Artificial Intelligence (AI) and Machine Learning (ML) approaches. It starts from basics and gradually advances, step-by-step, to ways AI/ML concepts can help or benefit from Edge Computing platforms. The book is structured into seven chapters; each comes with its own dedicated set of teaching materials (practical skills, demonstration videos, questions, lab assignments, etc.). Chapter 1 opens the book and comprehensively introduces the concept of distributed computing continuum systems that led to the creation of Edge Computing. Chapter 2 motivates the use of container technologies and how they are used to implement programmable edge computing platforms. Chapter 3 introduces ways to employ AI/ML approaches to optimize service lifecycles at the edge. Chapter 4 goes deeper in the use of AI/ML and introduces ways to optimize spreading computational tasks along edge computing platforms. Chapter 5 introduces AI/ML pipelines to efficiently process generated data on the edge. Chapter 6 introduces ways to implement AI/ML systems on the edge and ways to deal with their training and inferencing procedures considering the limited resources available at the edge-nodes. Chapter 7 motivates the creation of a new orchestrator independent object model to descriptive objects (nodes, applications, etc.) and requirements (SLAs) for underlying edge platforms. To provide hands-on experience to students and step-by-step improve their technical capabilities, seven sets of Tutorials-and-Labs (TaLs) are also designed. Codes and Instructions for each TaL is provided on the book website, and accompanied by videos to facilitate their learning process.
