**Sustainable Building Adaptation Sep 28 2022  
How to adapt existing building stock is a  
problem being addressed by local and state  
governments worldwide. In most developed  
countries we now spend more on building  
adaptation than on new construction and there  
is an urgent need for greater knowledge and  
awareness of what happens to commercial  
buildings over time. Sustainable Building  
Adaptation: innovations in decision-making is a  
significant contribution to understanding best  
practice in sustainable adaptations to existing  
commercial buildings by offering new knowledge-  
based theoretical and practical insights. Models  
used are grounded in results of case studies  
conducted within three collaborative  
construction project team settings in Australia  
and the Netherlands, and exemplars are drawn  
from the Americas, Asia, Japan, Korea and  
Europe to demonstrate the application of the  
knowledge more broadly. Results clearly  
demonstrate that the new models can assist with**

***informed decision-making in adaptation that challenges some of the prevailing solutions based on empirical approaches and which do not accommodate the sustainability dimension. The emphasis is on demonstrating how the new knowledge can be applied by practitioners to deliver professionally relevant outcomes. The book offers guidance towards a balanced approach that incorporates sustainable and optimal approaches for effective management of sustainable adaptation of existing commercial buildings.***

**A Taxonomy for Learning, Teaching, and Assessing Sep 04 2020 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives- cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.**

**Tsotsi Mar 23 2022 Tsotsi is an angry young gang leader in the South African township of Sophiatown. A man without a past, he exists only to kill and steal. But one night, in a moonlit grove of bluegum trees, a woman he attempts to rape forces a shoebox into his arms. The box contains a baby, and his life is inexorably changed. He begins to remember his childhood, to rediscover himself and his capacity for love. Turned into an Oscar-winning movie in 2006, Tsotsi's raw power and rare humanity show how decency and compassion can survive against the odds.**

***Dreaming Frankenstein Dec 28 2019 'Human relationships, especially as seen from a woman's point of view, are central: attraction, pain, acceptance, loss, triumphs and deceptions, habits and surprises; always made immediate through a storyteller's concrete detail of place or voice or object or colour remembered or imagined' - Edwin Morgan 'Dreaming Frankenstein is a rare thing: a book of poems which sparkles' - The Scotsman '. . . one of the few poets writing today capable of encompassing the matter of contemporary life in terms that are both attractive and thought-provoking' - Books in Scotland Liz Lochhead has built an impressive reputation as poet, playwright and performer, attracting a large and admiring public. Dreaming Frankenstein and Collected Poems stands as a monument to her early work. Four collections - Memo for Spring (1972), Islands (1978) and Grimm Sisters (1981) and the title volume together provide a complete record of her poetry from 1967 to 1984. In Dreaming Frankenstein human relationships, especially as seen from a woman's point of view, are central. Attraction, pain, acceptance, loss, triumphs and deceptions are all made immediate through her imagery and acute powers of observation and through her flair as a storyteller.***

***Precalculus Jan 09 2021 Precalculus is adaptable and designed to fit the needs of a variety of precalculus courses. It is a comprehensive text that covers more ground than a typical one- or two-semester college-level precalculus course. The content is organized by clearly-defined learning objectives, and includes worked examples that demonstrate problem-solving approaches in an accessible way. Coverage and Scope Precalculus contains twelve chapters, roughly divided into three groups. Chapters 1-4 discuss various types of functions, providing a foundation for the remainder of the course. Chapter 1: Functions Chapter 2: Linear Functions Chapter 3: Polynomial and Rational Functions Chapter 4: Exponential and Logarithmic Functions Chapters 5-8 focus on Trigonometry. In Precalculus, we approach trigonometry by first introducing angles and the unit circle, as opposed to the right triangle approach more commonly used in College Algebra and Trigonometry courses. Chapter 5: Trigonometric Functions Chapter 6: Periodic Functions Chapter 7: Trigonometric Identities and Equations Chapter 8: Further Applications of Trigonometry Chapters 9-12 present some advanced Precalculus topics that build on topics introduced in chapters 1-8. Most Precalculus syllabi include some of the topics in these chapters, but few include all. Instructors can***

***The Snow Child Jan 21 2022 In this magical debut, a couple's lives are changed forever by the arrival of a little girl, wild and secretive, on their snowy doorstep. Alaska, 1920: a brutal place to homestead, and especially tough for recent arrivals Jack and Mabel. Childless, they are drifting apart -- he breaking under the weight of the work of the farm; she crumbling from loneliness and despair. In a moment of levity during the season's first snowfall, they build a child out of snow. The next morning the snow child is gone -- but they glimpse a young, blonde-haired girl running through the trees. This little girl, who calls herself Faina, seems to be a child of the woods. She hunts with a red fox at her side, skims lightly across the snow, and somehow survives alone in the Alaskan wilderness. As Jack and Mabel struggle to understand this child who could have stepped from the pages of a fairy tale, they come to love her as their own daughter. But in this beautiful, violent place things are rarely as they appear, and what they eventually learn about Faina will transform all of them.***
