Developing Advanced English Language

Competence Jan 02 2021 This volume presents a systematic approach to developing advanced English language competence at tertiary level. It includes the reflections of experienced language teachers and teacher-researchers in the English Language Competence programme at the University of Vienna and provides examples of good practice, amalgamating teaching expertise and research with aspects of curriculum design and programme management. The book addresses a growing academic and professional

interest in understanding advanced language learning and use. To date, research has tended to investigate advanced proficiency from a specific theoretical viewpoint, for example cognition, psycholinguistic processing strategies, or the assumption of a critical period or the age factor. In contrast, this work examines advanced proficiency from a curricular and instructional perspective by providing a profile of advanced-level language development in a specific institutional context. It brings together three areas of language education: curriculum design, pedagogical practice, and research. Within this triangle, advanced English language education is the focus or, conversely, advanced English language education provides the lens through which links between curriculum design, teaching, and research can be established.

Entrepreneurship Sep 22 2022

Entrepreneurship, by Robert Hisrich, Michael Peters and Dean Shepherd has been designed to clearly instruct students on the process of formulating, planning, and implementing a new venture. Students are exposed to detailed descriptions of 'how to' embark on a new venture in a logical manner. Comprehensive cases at the end of the text have been hand-picked by the authors to go hand-in-hand with

chapter concepts. . The superb author team of Hisrich, Peters, and Shepherd draw from their distinct backgrounds to create a book that addresses the dynamics of today's entrepreneurial challenges. From Bob Hisrich's expertise in global entrepreneurship to Mike Peter's background as a both a real-life entrepreneur and academic to Dean Shepherd's current research on cognition and entrepreneurial mindset, this book balances the crucial line between modern theory and practice. .
