The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the United States Federal Government. Reprinted in 1994. This vol. presents tables giving the dates of all new & full moons during an historical era when these data were of considerable interest & importance. To make them more useful the longitudes of the moon at each of these times is also given, as is a consecutive enumeration of the conjunctions & a similar one of the oppositions. All dates are reckoned in the Julian calendar & all times are given in hours & the

nearest minute. These dates & times are calculated for an observer in Babylon, or equivalently Baghdad, since this location is fairly centrally located for the historians of the period, exactly 3 hours west of Greenwich. Moreover, the time used is civil time & is based on a 24-hour clock with its origin at midnight; thus noon is 12 hours. Since this vol. may be considered as a supplement to Bryant Tuckerman's tables, all fundamental astronomical elements have been taken from them.
