God's Gift of the Universe Apr 11 2021 There are many ways of understanding the reality of the world we live in and experience. Science, philosophy, art all offer us ample descriptions,

explanations and intuitions. But Christian believers go beyond all that, for they attempt to understand the origins of the universe in terms of the creation of the world by God. Revelation tells us what God had in mind when he made the world ex nihilo, without presuppositions of any kind. God's Gift of the Universe attempts to present the principal elements and stages of creation theology. The doctrine is to be found fundamentally, of course, in Scripture, both Old and New Testament, which describes the world in the light of God's word. Yet since God actually gave existence to the world, down to the last detail, our reflection on God's word not only explains the reality of creation, how it works, its nature, as science does. It also explains how creation came into being in the mind and heart of the Triune God, and, ultimately, why God created the world. In God's Gift of the Universe, a considerable effort has been spent throughout the book on the Christological and Trinitarian aspects of creation, particularly in the theology of Church Fathers. Creation is presented besides in a deeply eschatological key, for God created the world for purpose of making his glory eternally manifest. The book also considers the way God 'intervenes' in the life of the created world, through conservation in being and providence. The meaning of time, matter and spirit are considered. The need for ecological awareness is central. One aspect of the mystery of creation that receives special attention is the presence of evil in the world. This is of particular importance once we accept that God made the world, whole and entire, thus assuming responsibility for the world as it is. The origin of evil through the sin of spiritual creatures provides the ultimate though not the only explanation of the mystery of evil. Particular consideration is given to the reality of 'original sin'.

**God and the Universe** Mar 03 2023 Ambitious, controversial and absorbing, God and the Universe tackles the highly-charged issue of God's relevance in the light of new scientific thinking on cosmology. Engaging with poststructuralism, ethics,

mathematics, and philosophy through the ages, this persuasively argued book reinvigorates religious debate for the new millennium.

*God And The Universe Of Faiths* Mar 23 2022

*The God Theory* Sep 28 2022 As science integrates the in-depth knowledge of the physical world accumulated over the past three centuries, it will be channeled into a new and exciting line of inquiry that acknowledges the expanded reality of consciousness as a creative force in the universe and the spiritual creative power embodied in our own minds. This book summarizes the thoughts of an inquisitive, but open-minded, scientist. What I present here is a theory that looks promising, not scientific proof. It should not be surprising, however, if some of what I propose coincides with theories propounded by others who claim a more intimate relationship with the Almighty. After all, if I am on the right track, and if they are, it would be worrisome if we were not, ultimately, in agreement. All I ask is that you seriously consider the logic of my theory, especially if it challenges you to question what you were taught - in Sunday school, in catechism or, dare I say, in physics class. I offer this book, not as a theological treatise, but as a short, readable exposition of a worldview that can bring sense and purpose into individual lives, and tolerance and peace to a planet whose future is in serious jeopardy - in large part because of the irrational dogmatism of both religion and science. If I am correct, we are literally all one being (God) in many individual forms. Why, then, would we continue to harm one another?

**God's Universe, God's Rules** Jan 01 2023 Do you think the Bible is hard to understand? Maybe you have been told there are contradictions in the Bible that can't be explained, or you have never found an answer to your questions that really satisfied your curiosity. This may be exactly what you have been looking for. Learn how to make the Bible easy to understand, cut through the contradictions, and discover the answers to your questions. Dig

[radiocaley.com](http://radiocaley.com)

through the language, the culture, and the history to free yourself from the traps that have held you prisoner and kept you from learning the truth. Explore the Bible as many never have, using it to define itself and allowing the word of our Creator to speak clearly without being twisted out of context for our convenience. Experience how to live the way God created you to live and maintain the authority of our Creator and His word.

What's the Big Idea? Apr 23 2022 *What's the Big Idea?* is a smart aleck's commentary on the intersection between faith and science told through the lens of the author's own personal journey of belief. It uses both humor and heart to lay out overwhelming evidence for the existence of an Intelligent Designer. This book is aimed at our current short attention span society that is fluent in both cynicism and sarcasm. People who appreciate *The Onion* and *The Babylon Bee* will enjoy the satirical approach the author uses when he dissects both science and religion. Readers of *The Case for Christ* will be drawn to the well-researched information explaining why Christianity is a faith founded on reason and intellect while Christian parents of teens and millennials will appreciate a book they can share with their children that proves theirs is not a mindless faith. Throughout the book, the reader will be stunned by the awe-inspiring amount of precise fine tuning our world and universe demand as well as be amazed at how much information they've totally forgotten since high school.

*God and the Astronomers* Jan 27 2020 Summarizes current theories about the creation of the universe, compares these with the Biblical story of creation, and looks at the role of scientists in increasing our understanding of the universe

**Could God Fail?** Feb 07 2021 Suppose the universe expands and becomes a void, as most scientists think. Would that mean . God failed? If that is the fate of the universe, then some of our beliefs concerning God and our place in nature, as well as our beliefs concerning how we should live in the world, will not be borne out. From the biblical perspective, it looks as though the formless void

and deep darkness opposing God from the beginning prevailed in the end. Today, when we consider the fate of the universe, as well as the possible destruction of life on Earth, it looks as though a deep darkness surrounds us. That is the idea this book considers. When we explore it, we find that we refocus our understanding of faith, hope, and love, and revitalize our view of how we should live. In brief, faith in a God who challenged the formless void and deep darkness in order to create life and sustain it charges us to do the same: oppose lifelessness and be good stewards of life. Faith in an insurgent God restores authentic hope for our future and realizes its true end: not in heaven, but on Earth, and perhaps beyond it.

*GOD OF THE UNIVERSE: The Cosmic Clandestine* Dec 28 2019

The title—God of The Universe; The Cosmic Clandestine, expresses a discourse on complex issues and phenomena occurring in the universe, while also revealing groundbreaking insights into various aspects of Reality. This title aims at expressing inspired truths, and birthing a level of understanding for us to make the most of our existence. **GOD OF THE UNIVERSE: THE COSMIC CLANDESTINE** is a game changer on the subject of cosmic phenomena, inspired by the Spirit of the creator to unriddle finite mysteries of the Universe, that would act as a latchkey to unlocking truths about the entirety of the universe. Actualities, possessing finite sentience as designed by the creator inline with purpose, can only be inspired in a finite measure. We are given rise to, by an infinite vital force, that manifests in infinite ways and reveals facets of his endeavors as he pleases. The cosmic clandestine is a book that seeks to blow the gaff on the intentions and rationales of a creator, not the uninspired thoughts and interpretations of mankind. Every creator or initiator has a purpose for his endeavors, a meaning to his endeavors and a vision for his endeavors. This is what this book seeks to get across in a finite purview, but not infinitely. The universe serves a purpose, everything encompassed within the

universe serves a purpose. The cosmic clandestine, hankers after revealing this purpose and inspire a new race of thought, with a deeper insight into the universe, it's cosmic realities and entities. NOTICE. This title builds on the insights explained in great depths and set forth in an exegesis authored by me titled EXPLAINING THE TERMINOLOGIES OF THE SPIRIT, which is available for free on eescript.com. To better comprehend THE COSMIC CLANDESTINE, it is advisable to first go through EXPLAINING THE TERMINOLOGIES OF THE SPIRIT.

**The Wonder of the Universe** Nov 30 2022 Like detectives sleuthing out the greatest mystery of all, scientists over the centuries have uncovered clues about the structure and origins of the universe. The work of Galileo, Newton, Einstein, and a host of other tenacious researchers and thinkers reveals a cosmos of almost unimaginable wonder and beauty. If we then honestly follow the evidence of science wherever it leads, where do we end up? Karl Giberson takes us on a fascinating guided tour of planets and protons, galaxies and gamma rays. We discover that if gravity were slightly stronger, neutrons a tiny bit lighter, the size of our sun somewhat larger or a dozen other factors altered by fractions, there would be no life. The author shows that for many observers, even those who do not embrace religious faith, all of this looks suspiciously like the expression of a grand plan--a cosmic architecture capable of both supporting life such as ours, and inspiring observers like us to seek out hints of a creator. Join this cosmic expedition and discover the wonder of it all.

**Science Discovers God** Oct 06 2020 Does God exist? Did a Master Designer create our universe, or did life spontaneously evolve? Can science retain objectivity in the search for truth while allowing for the possibility that God exists? Does it make any difference? Ariel A. Roth, scientist and Christian believer, examines key issues related to the God question: \* the intricate organization of matter in the universe \* the precision of the forces of physics \* the complexity of the eye and the brain \* the

elaborate genetic code \* the disparity between the fossil record and the vast amount of time necessary for evolution Faced with so much evidence that seems to require a God in order to explain what we find in nature, why does the scientific community remain silent about God? Hypotheses and speculations that attempt to fit data into a predetermined conclusion abound. What overriding influence prevents scientists from following the data of nature wherever it may lead?

**The Model of Everything** Dec 08 2020 When humanity questions the purpose of existence, they often turn to science or religion for answers. Unfortunately, both science and religion contain inconsistencies. These inconsistencies touch the human spirit in the most profound ways, resulting in an uneasiness about life. "Do I really have a purpose?" Seeking to address the spiritual unease, the history of humanity documents the development and pursuit of religion with a concept of a divine creator with a plan for humanity. However, in more recent history with an increasing emphasis on scientific knowledge, the concept of a divine creator is increasingly discounted as inconsistent with the material world revealed by scientific discovery. Via the scientific method, humanity is turning its focus to the material world, creating new gods of science and the purveyors of scientific knowledge. But rather than provide definitive answers, as science continues to advance, the theories of creation point increasingly to inconclusive and inconsistent results. These shortcomings of science are often veiled in the expression "Someday, we will know," but many in the scientific community are beginning to question that hope. With science and religion each plagued with inconsistency, perhaps appropriately integrating them will lead us to the real answers we seek! The Model of Everything-A Divine Universe relies on both scientific and biblical knowledge to fully integrate science and religion in a consistent, complementary, and interdependent fashion. This confluence and synergy of knowledge reveal a comprehensive model that accounts for the

totality of human existence-the physical and spiritual. The reader, via personal and straightforward experiments, participates in developing the model. Biblical knowledge is the pointer for a unique application of scientific knowledge. Then, the incredible and sometimes bizarre world of science reveals how God teaches us about our existence and spirituality. The integration of scientific and biblical knowledge results in several new mental constructs, providing an account for the totality of creation-the material and immaterial-and a genuine hope and understanding of personal existence. The model presents some eye-popping implications and applications as well as predictions on future scientific progress and outcomes. Each reader is invited and encouraged to become a scientist; a scientist prepared to chart a life-changing personal discovery.

**Why the Universe Is the Way It Is (Reasons to Believe)** Nov 18 2021 Increasingly astronomers recognize that if the cosmos had not unfolded exactly as it did, humanity would not, could not, exist. Yet these researchers--along with countless ordinary folks--resist belief in the biblical Creator. Why? They say a loving God would have made a better home for us, one without trouble and tragedy. In *Why the Universe Is the Way It Is*, Hugh Ross draws from his depth of study in both science and Scripture to explain how the universe's design fulfills several distinct purposes. He also reveals God's surpassing love and ultimate purposes for each individual. *Why the Universe Is the Way It Is* will interest anyone who wonders where and how the universe came to be, what or who is responsible for it, why we are here, or how and when the universe ends. Far from leaving the reader at this philosophical jumping-off point, Ross builds toward answering the big question of human destiny and the specific question of each reader's personal destiny.

**Evolved-God Creationism** Jun 01 2020 This book answers fundamental questions not answered by either science or religion. How did our universe originate? Science says, "from the Big

Bang”, but how did this come about? Religion says that it was created by God, but how did God originate? Our universe, with its relativity nature and quantum physics peculiarities, cannot exist by itself. Using five compelling axioms, this book proves that God evolved in the wider universe and created our sub-universe. Further questions like how did the wider universe come about are also answered logically.

**God, Divinity, the Universe, and Humankind** Jun 13 2021

Who are we? Where do we come from? What is our destiny? In *God, Divinity, the Universe, and Humankind*, author R.F.M. addresses these questions and more, sharing his interpretations and reflections of an array of ideas related to human existence and destiny. Drawing on religious insights, R.F.M. provides many examples to provide a guide for those seeking wisdom about their life, their existence, their spiritual journey, and their destiny. *God, Divinity, the Universe, and Humankind* explores the doubts and perplexities humans have experienced throughout history and discusses how to find new understanding and guidance. This exploration of spirituality presents a psychiatrist's thoughts on the creation of the universe, our relatedness to God and to divinity, and the importance of faith in our life. It communicates the idea that in the whole orchestration of the universe, we are only the instruments; God is the composer, the conductor, and the player. We should surrender to Him in union and oneness in our spiritual origin and nature, for we all are the same from Him and all shall return in Him.

*A God That Could be Real* Feb 02 2023 A paradigm-shifting blend of science, religion, and philosophy for the agnostic, spiritual-but-not-religious, and scientifically minded reader Many people are fed up with the way traditional religion alienates them, perpetuates conflict, vilifies science, and undermines reason. Nancy Abrams—a philosopher of science, lawyer, and lifelong atheist—is among them, but she has also found freedom in imagining a higher power. In *A God That Could Be Real*, Abrams

explores a radically new way of thinking about God. She dismantles several common assumptions about God and shows why an omniscient, omnipotent God that created the universe and plans what happens is incompatible with science—but that this doesn't preclude a God that can comfort and empower us. Moving away from traditional arguments for God, Abrams finds something worthy of the name "God" in the new science of emergence: just as a complex ant hill emerges from the collective behavior of individually clueless ants, and just as the global economy emerges from the interactions of billions of individuals' choices, God, she argues, is an "emergent phenomenon" that arises from the staggering complexity of humanity's collective aspirations and is in dialogue with every individual. This God did not create the universe—it created the meaning of the universe. It's not universal—it's planetary. It can't change the world, but it helps us change the world. A God that could be real, Abrams shows us, is what humanity needs to inspire us to collectively cooperate to protect our warming planet and create a long-term civilization.

God after Einstein Jun 25 2022 A leading theologian presents a hopeful account of the universe after Einstein, exploring it as a meaningful drama of awakening "This book is a deep and provocative piece of theology that proposes we engage with the universe as a kind of narrative of awakening and unfolding, as well as an important and useful approach for thinking about theology with respect to modern cosmology."—Matthew Stanley, New York University Before the early twentieth century, scientists and theologians knew almost nothing about time's enormity and the corresponding immensity of space. But now, after Einstein, cosmology offers theology a whole new way of looking at the ageless questions about matter, time, God, cosmic purpose, and the significance of our lives. The universe need not be thought of as simply an endless reshuffling of lifeless and mindless atoms in a pointless series of moments. Rather, the

universe is a temporal drama of awakening whose meaning can be revealed only gradually by looking, in a spirit of anticipation and hope, toward the horizon of the cosmic future. In conversation with Einstein's ideas and opinions, John F. Haught develops here a new cosmological understanding of the meaning of God, time, eternity, mystery, life, thought, freedom, and faith. In doing so, he offers readers a new way of understanding the relationship of science to theology.

### **The Connections of the Universe** Oct 30 2022

*Our Universe Rotates Inside God's Mighty Hand* Jan 21 2022

Working at the speed of God, God created space in the 24 hours that constituted Day 2 of creation (Genesis 1:6-8). Then in another 24 hours that constituted Day 4 of creation (Genesis 1:14-19), God populated space completely, to form our universe. This is why God said in the Book of Isaiah: "My own hand laid the foundations of the earth, and my right hand spread out the heavens; when I summon them, they all stand up together" (Isaiah 48:13). The last sentence alludes to God's commands in Genesis Chapter One which brought each of the creations into existence. The Bible says that our entire Universe fits into God's mighty hand (Isaiah 40:12); and rotates in God's hand (2 Peter 3:8), suspended over nothing (Job 26:7). The Bible also says that our earth is right in the center of the universe (Isaiah 40:15) (Genesis 1:6-8), further confirming that the universe was created for the purpose of the humanity, and not humanity resulting from some freak accident of nature. The Bible says that the space has a rigid framework—supported by pillars the same way we support heavy framework in our earthly structures. Here is that passage from the Bible: "The pillars of the heavens quake, aghast at his rebuke." (Job 26:11). And this quaking of the pillars of the space is a reference to the cataclysmic explosion of Day 4 of creation (Genesis 1:14-19) which rocked space, and reverberated throughout its expanse; bringing the universe to life. Nature was created to give humanity support and stability, not because of our

value and contributions in the larger scheme of things—because we do measure up to anything—but because of God's love for mankind. The entire universe was designed to provide stability, and safety to the human race. Just as our sun powers the earth and all the planets revolving around the sun; the glory of God directly powers our universe and causes the universe to rotate before God. Just as is the case with all the planetary systems inside our universe, one full rotation of the universe before God is “one universe day” before God. And “one universe day” is equivalent to “365,243 earth days” (2 Peter 3:8).

The God of Universe Jan 09 2021 It took me many years to understand better the world we live in. I experienced that the Universe has its way for existence. When you follow it, you can flow with it not against it and that is the way. Living among people who fight against the Universe brings you against the current of the Universe. The history shows that those who understood the wisdom of Universe got in trouble as the code of Universe is inconvenient to some. These days, seat belt laws and other bogus laws are exploiting you every day under Slogan of safety and public service. The greed brings legal harassment, exploitation and Corruption to you, making money by corrupted police, local courts and governments. You are being rubbed by those who should help you. You are in neo slavery. Good reality perception allows you to say it like it is. Jesus, Buddha, Mohammed and all others said it like it is so can I and you. See the reality and flow with the Universe. Find the way to happiness today. Take your chains of your slavery away and become free with true justice, liberty and freedom to all as it is your birthright given to you by the Universe. With every day life we get distracted and we loose the touch with reality, nature and the Universe. We all need to find the way to understand and enjoy our journey through our life. Our small piece of Universe we have on Earth is the most beautiful. You need to see the beauty. To see it you need to be sensitive, to be sensitive you need to be good and

to be good is to know how to flow and follow the Universe - the Universe knows what it is doing so can you. The code of Universe is yours to experience, it is free to all of us and no corrupted government or individuals can take it from you. The Laws of Universe override all other laws. Once you allow yourself in the Universe, you may understand more then you can imagine. You can find the way that brings you closer to the powers of our existence. These are thoughts not from doctrines of any schools, religions but individual experience of a man living in the time and space of our Universe. Discover your way and enjoy it. Be Good... May the Wisdom of the Universe enter your reality from here - Ted Jec

Story in the Stars May 25 2022 An in-depth look at the powerful story and symbolism behind God's unique design of our universe. Thousands of words have been written about the first ten words in the Bible: "In the beginning, God created the heavens and the earth," a simple and profound statement that has ignited a firestorm of debate and controversy. People often only focus on the "how" and "when" of creation, but Story in the Stars explores the "why." Why did God create such a vast universe? Why did He choose the sun and moon to light our paths? Why did He design images with stars in the night sky? The Bible is very clear when it states that God created, named, and positioned all of the stars of the universe in their place in a very specific way-a way that tells us the greatest story ever to be told. In Luke 21:25 Jesus says, "There will be signs in the sun, moon and stars." Signs are meant to point us towards something: Jesus. Story in the Stars takes an in-depth look at the Bible and all the signs God mapped out through constellations, planets, and even the way the Earth is tilted. We are uniquely designed by God, and He loves us so much that He ensured a way for all inhabitants of the earth, through all of time, to see the messages of salvation and redemption that He painted in the stars.

**God's Universe** May 05 2023 Taking Johannes Kepler as his

guide, Gingerich argues that an individual can be both a creative scientist and a believer in divine design--that indeed the very motivation for scientific research can derive from a desire to trace God's handiwork.

**How God Created the Universe** Jul 03 2020 What is the universe? What does that mean? I will try to explain to those persons who want to know. The universe is the large emptiness we see all around and parts we do not see yet. It is easy for us to see through it and reach out, and we touch nothing. The universe does exist because there are things that we can touch and feel. There is space around everything; this empty space. It did not exist before any parts or trees, grass, animals, people, so there was emptiness. This is called es or ethrea and exists millions and billions of years ago. There was a super intelligent being, whom we call Jehovah, and Jehovah looked all over this empty space and found no other being or no other part or thing in this emptiness that exists. He called it ethrea; he found nothing existed besides him. So he thought and thought for quite some time and decided he would create a being called animal, but there was nothing to be like him. It does not need to look like me. Nothing can be like me. It must have a place to move and a part that helps it move. It must have legs and feet to touch something to move on. So Jehovah discovered that he could speak and lots of stuff would come into existence. Now how can make this stuff form into balls, or better, Ill call it a planet or nebula. If I make it go around like a whirlwind, it will come to a center. So he caused the stuff to go round and round, and he discovered it got hot with friction. When it cooled down, it became a large ball, and he called it the sun. Some of the spinning stuff became smaller balls, and he could call those the planets and the smaller ones as moons. There were so many of these planets and moons. What could he do with them? He could make grass and trees and animals and people that could be companions. It would take many years of experiments to do this, and he had so many planets to cause to grow and many years

to make the animals able to talk, and they will need to be able to eat.

*God in an Open Universe* Feb 28 2020 Since its inception, the discussion surrounding Open Theism has been dominated by polemics. On crucial philosophical issues, Openness proponents have largely been devoted to explicating the underlying framework and logical arguments supporting their perspective against competing theological and philosophical perspectives. As a result, very little constructive work has been done on the interconnections between Open Theism and the natural sciences. Given the central place of sciences in today's world, any perspective that hopes to have a broad impact must necessarily address such disciplines in a sustained and constructive manner. To date such engagements from the Openness perspective have been rare. *God in an Open Universe* addresses this deficiency. This book demonstrates that Open Theism makes a distinctive and highly fruitful contribution to the conversation and constructive work occurring between philosophy, theology, and the sciences. The various essays explore subjects ranging from physics to prayer, from special relativity to divine providence, from metaphysics to evolution, and from space-time to God. All who work at the intersection of theology and the sciences will benefit greatly from these essays that break new ground in this important conversation.

**Space and Spirit** Sep 04 2020

**A Voice from the Heavens** Apr 04 2023 Are you dying to see NASA's fantastic new discoveries that confirms the Bible? "When you look up to the Heavens at night, you will view the Universe as how God architected it 13 billion years ago and realize it is a lot more than suns, moons, planets, or galaxies, it is a Painting of God's work, as written in the Holy Bible." A basic foundation of Astronomy is provided followed by 17 chapters describing amazing Biblical Scriptures, written over 2,000 years ago. You will then be in awe by many Hubble pictures that directly

represent those Biblical scriptures! The author provides unfathomable visual and audio dimensions that directly relate to each scripture to accelerate your belief in God's works and grow in His word. For example, take a look at the book cover which shows the Whirlpool Galaxy (M51). In the book you will be astounded by a Holy Cross located in the middle of the galaxy which is 1,100 light across! A rocket traveling the speed of light would take 1,100 light years to traverse the cross! The book is filled with numerous examples of God's magnificence, as written in the scripture Psalm 19:1-2: "The heavens declare the glory of God; the skies proclaim the work of his hands."

*The Urantia Book* Aug 04 2020 You have just discovered the literary masterpiece that answers your questions about God, life in the inhabited universe, the history and future of this world, and the life of Jesus. The Urantia Book harmonizes history, science, and religion into a philosophy of living that brings new meaning and hope into your life. If you are searching for answers, read *The Urantia Book*! The world needs new spiritual truth that provides modern men and women with an intellectual pathway into a personal relationship with God. Building on the world's religious heritage, *The Urantia Book* describes an endless destiny for humankind, teaching that living faith is the key to personal spiritual progress and eternal survival. These teachings provide new truths powerful enough to uplift and advance human thinking and believing for the next 1000 years. A third of *The Urantia Book* is the inspiring story of Jesus' entire life and a revelation of his original teachings. This panoramic narrative includes his birth, childhood, teenage years, adult travels and adventures, public ministry, crucifixion, and 19 resurrection appearances. This inspiring story recasts Jesus from the leading figure of Christianity into the guide for seekers of all faiths and all walks of life.

## **Peace, Love, Happiness, and Joy For God's Universe** Jul 27

2022 Glenn foretells of a united world government led by a world leader who becomes envisioned is the Messiah in Judaism, the second coming or resurrection in Christianity and Islam, and would have a place of reverence in many other religions, and respect among the nonreligious. Within this book, he seeks to establish inner and outer peace, love, happiness, and joy.

Utilizing his inspired value system and beliefs, he shares his views on religion, government, domestic and world issues, and suggests help and hope for the least fortunate of individuals. Glenn is seeking the office of the president in 2020.

## Finding God in the Universe Aug 28 2022

How does a scientist find God in the universe? Finding God in the Universe is the personal reflection of a Jesuit brother and astronomer, the director of the Vatican Observatory. Br. Guy Consolmagno, SJ, insists that science is more than observing the universe; it's learning how to pay attention, how to concentrate on one aspect while setting aside, at least momentarily, all the other interesting aspects that can distract us from a deeper knowledge of the universe--or of God. In his telling, joy is our compass, truth is our goal, and imagination weaves the story where we situate the joy that leads us to truth. Most importantly, both science and theology are done within a community of fellow seekers, where we share the stories that teach us how to explore, and with whom we can try to make sense of what we think we have found. In the My Theology series, the world's leading Christian thinkers explain some of the principal tenets of their theological beliefs in concise, pocket-sized books.

*Is There a God?* Mar 30 2020 Richard Swinburne, one of the leading figures in philosophy of religion, argues here that science provides good grounds for belief in God. Using scientific reasoning, he discusses why the universe exists, and why there is life on earth.

The Ghost in the Universe Dec 20 2021 Emphasizing the results

of natural science, physicist Taner Edis takes a fresh look at an age-old question: Is there a God or a spiritual reality beyond nature?

### **Can a Smart Person Believe in God?** Nov 06 2020 As

Christians, we are often urged to turn away from scientific discovery and rely solely on the Bible as the source of our faith. On the other hand, many people in areas such as science, law, and education insist that Christian faith is lowbrow or unintelligent. But is it possible to reconcile science with what you believe about God? As someone who has grappled with the issues of science and faith in the public eye for more than a decade as a television journalist, Dr. Michael Guillen believes it is possible. In fact, by embracing the discoveries of science we can see God, the universe, and humanity in full, multidimensional glory.

Fortunately, you don't have to be a genius to enjoy this book. The bite-sized chapters are full of fascinating scientific tidbits in an easy-to-understand format. Captivating stories of the author's childhood in the Mexican barrio of East L.A. and his work in television and research are woven throughout. There is even an entertaining SQ (Spiritual Quotient) test for readers to take.

*Man, God, and the Universe* Sep 16 2021 The deepest concern of every thinking individual must surely be with the three great subjects which comprise the title of the book, and with the relationships between them. The profound concepts inevitably involved in a discussion of such a theme are presented with great clarity and wisdom, and the many diagrams and charts with which the ideas are illustrated are invaluable aids to comprehension. East and West meet here in enlightened synthesis. Chapters include such topics as Cosmic Consciousness, The Monad and the Logos, Involution and Evolution, Mathematics as the Basis of Manifestation and Reality and Consciousness. The book also includes both a glossary and index.

There Is No Universe Jul 15 2021 Many people grow up hearing and accepting religious teachings, but how many think for

themselves when it comes to their religion and spirituality? What if by thinking more deeply about spirituality and the universe, you could progress to a higher level of spiritual development? There Is No Universe can help you on your journey to elevate your spiritual soul. Author Russ Simmons encourages us to think—to think about anything and everything that is said to you by anyone. After this thought process, you may decide to agree with the message, or it may not make sense. But the key to remember is that no one knows the absolute truth about the spiritual planes that surround us—the only known fact is that there is a God and everything about his universe is logical. The universe we live in is not a physical space but a level of God’s existence. Humans take the path of least resistance and take things at face value because it feels comfortable and little thought is necessary. But seeking the truth—and thinking—is a challenge that will allow you to reach a stronger relationship and understanding of God’s universe. What is the meaning? Think about it.

**God and Cosmos** Mar 11 2021 A Christian view of time, space and the universe, emphasizing the superiority of Scripture to all other sources of knowledge and dealing helpfully with the Big Bang theory of origins, extraterrestrial intelligence, the spiritual realm, and much else.

[A Fine-Tuned Universe](#) May 01 2020 Exploring a wide range of physical and biological phenomena and drawing on the latest research in biochemistry and evolutionary biology, McGrath draws out the implications of our new understanding of the natural world for traditional debates about the existence of God. -from publisher description.

**A God That Could Be Real** May 13 2021 A paradigm-shifting blend of science, religion, and philosophy for the agnostic, spiritual-but-not-religious, and scientifically minded reader Many people are fed up with the way traditional religion alienates them. Too often it perpetuates conflict, vilifies science, and undermines reason. Nancy Abrams—a philosopher of science, lawyer, and

lifelong atheist—is among these people, but she has also found freedom in imagining a higher power. In *A God That Could Be Real*, Abrams explores a radically new way of thinking about God. She dismantles several common assumptions about God and shows why an omniscient, omnipotent God that created the universe and plans what happens is incompatible with science—but that this doesn't preclude a God that can comfort and empower us. Moving away from traditional arguments for God, Abrams finds something worthy of the name "God" in the new science of emergence: just as a complex ant hill emerges from the collective behavior of individually clueless ants, and just as the global economy emerges from the interactions of billions of individuals' choices, God, she argues, is an "emergent phenomenon" that arises from the staggering complexity of humanity's collective aspirations and is in dialogue with every individual. This God did not create the universe—it created the meaning of the universe. It's not universal—it's planetary. It can't change the world, but it helps us change the world. A God that could be real, Abrams shows us, is what humanity needs to inspire us to collectively cooperate to protect our warming planet and create a long-term civilization.

*Why Science Does Not Disprove God* Aug 16 2021 The renowned science writer, mathematician, and bestselling author of *Fermat's Last Theorem* masterfully refutes the overreaching claims the "New Atheists," providing millions of educated believers with a clear, engaging explanation of what science really says, how there's still much space for the Divine in the universe, and why faith in both God and empirical science are not mutually exclusive. A highly publicized coterie of scientists and thinkers, including Richard Dawkins, the late Christopher Hitchens, and Lawrence Krauss, have vehemently contended that breakthroughs in modern science have disproven the existence of God, asserting that we must accept that the creation of the universe came out of

nothing, that religion is evil, that evolution fully explains the dazzling complexity of life, and more. In this much-needed book, science journalist Amir Aczel profoundly disagrees and conclusively demonstrates that science has not, as yet, provided any definitive proof refuting the existence of God. *Why Science Does Not Disprove God* is his brilliant and incisive analyses of the theories and findings of such titans as Albert Einstein, Roger Penrose, Alan Guth, and Charles Darwin, all of whose major breakthroughs leave open the possibility— and even the strong likelihood—of a Creator. Bolstering his argument, Aczel lucidly discourses on arcane aspects of physics to reveal how quantum theory, the anthropic principle, the fine-tuned dance of protons and quarks, the existence of anti-matter and the theory of parallel universes, also fail to disprove God.
