This volume presents detailed statistics about the circumstances of personal injury road accidents. Some 50 data items are collected by the police STATS19 system for each accident, including the time and location of the accident, the types of vehicles involved and what they were doing at the time of the accident, as well as some information on the drivers and casualties involved. In 2009 there was a reported total of 222,146 casualties of all severities (4 per cent lower than 2009). Of those, 2,222 people were killed in road accidents, 316 fewer (12 per cent lower) than in 2008. It has long been known that a considerable proportion of non-fatal injury accidents are not reported to the police and the current best estimate is that the total number of road casualties in Great Britain each year is around 700,000. In addition to the detailed tables there are seven articles containing further analysis on specific road safety topics: an overview and trends in the police data; valuation of road accidents and casualties; drinking and driving; contributory factors in road accidents; survey data on road traffic accidents, including an overall estimate of total casualties; hospital admissions data on road casualties; road safety research. The statistics in STATS19 were reviewed

recently and some changes recommended. Also, a new electronic police accident reporting system, CRASH, for secure collection, validation, transmission and storage of road traffic collision reports, is to be introduced in 2011 and 2012. "Which of us has not longed to be transported back to those carefree innocent days of childhood when everything was a blank canvas for our fertile and limitless imaginations. A time when life was simple and every day an adventure. This poignant, sometimes humorous, sometimes sad but always entertaining book started life as short stories for children, but here it is brought together for both children and adults to enjoy and reflect upon their own childhood." Although this is the story of my childhood, this book started as a series of stories told in assemblies at a large Primary school in Birkenhead. The wonder of growing up in the rural suburb of Greasby in the 1950s was in itself a story to children of a large industrial town in the 1990s and 2000s. Yet I was talking about places the children knew. They could relate to the scrapes, the escapades, the ups and downs, the relationships between families and friends, and yet it was so different a world. Eventually the children and teachers persuaded me to write down the stories in order and now, just as I retire from teaching they are finished. Matthew aged 10 inspired the title of the book. Walking along a corridor he said, as we passed, "Sir. When you write down the stories you ought to somehow include the way you start every story." Every assembly, when I was going to use a story about my childhood I would start by stroking my beard and saying "No beard," then shaking my glasses I

would add "No glasses," and finally holding my arm out at the height of my head I would lower it slowly to the approximate height that I would be in the story. Hence the title "No Beard, No Glasses (and very much shorter)." The author argues that we have entered an ideology of "Tolerism" - an unhealthy degree of tolerance without limits, and an excessive leniency towards those who represent the most intolerant and illiberal societies. He observes how cultural and moral relativism, moral equivalency, and political correctness have all contributed to a modern political culture whose elites and cultural symbols evidence, not only an undue tolerance of the illiberals, but a disturbing element of self-hatred, cultural masochism, and delusions about the difference between social tolerance and political tolerance - and an elevation of tolerance over the principle of Justice. This original work has been updated in 2013 and will challenge readers' views of contemporary political culture and the values and ideologies of many of our elites. This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references

in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant. Scooterboys are the lost tribe of British youth culture. Unrecognised, uncelebrated and unwanted; misunderstood by a general public who mistook us for Mods. We weren't Mods though. By the 1980s myself and tens of thousands of scooter riders collectively rejected that label. Instead, we took the roadmap of British youth disaffection and carved a new bypass. This route took us beyond the UK's faded seaside resorts, allowing us to spread our creed across the continents. Tuned and customised Vespa and Lambretta scooters gave us freedom to roam; transport to live for the weekend. Shared experiences of riots, local hostility and police harassment built strong fraternal bonds that endure to this day. Despite decades of two-wheeled rebellion our threat level was never high

enough to put us on the national security radar. This low profile has its benefits. We aren't doomed to follow the same cycle as Mods. First feared, then pilloried, accepted and finally adopted as part of UK's rich culture. As British as a vindaloo. The cult of Scooterboy has escaped death-by-public-acceptance, simply by remaining too underground. Too difficult to distinguish from what came before. And that's just perfect. You'll never see Scooterboys parodied in TV insurance adverts or low budget fly-on-the-walls. The poorly-rendered caricature is always some cliché Mod on a 'Christmas Tree' scooter. If you rode to rallies in the 80s and 90s then this book will mirror your experiences. If you've never had a scooter then it offers a rare glimpse of life inside the lost tribe of two-stroke terrorists. For use in schools and libraries only. Examines mankind's dependence on fossil fuels through scenarios that describe life without such items as oil heaters and gasoline powered cars, and describes alternative energy sources and other ways to prepare for this possible future. This book is the most comprehensive empirical study to date of the social and technical aspects of milling during the ancient and medieval periods. Drawing on the latest archaeological evidence and historical studies, the book examines the chronological development and technical details of handmills, beast mills, watermills and windmills from the first millennium BCE to c. 1500. It discusses the many and varied uses to which mills were turned in the civilisations of Rome, China, Islam and Europe, and the many types of mill that existed. The book also includes comparative regional studies of

the social and economic significance of milling, and tackles several important historiographical issues, such as whether technological stagnation was a characteristic of late Antiquity, whether there was an industrial revolution" in the European Middle Ages based on waterpower, and how contemporary studies in the social shaping of technology can shed light on the study of pre-modern technology." Millions of people have done everything recommended by professional financial advisors only to see their retirement funds dwindle or even disappear entirely in the global financial crisis. The 2000 edition of the Statistical Yearbook for Latin America and the Caribbean contains a selection, updated to the end of December, of the main statistical series available on economic and social trends in the countries of the region. It represents a systematic effort of the ECLAC Statistics and Projections Division to harmonise the figures and make them

internationally comparable. Lo único que Juan Pablo aprendió en la escuela fue un poema. En cambio, lo más importante de la vida lo aprendió en el ritual del Kaoz, la barra del América a la que llegó siendo un morrito. Aquí su propia voz recuerda las peligrosas andanzas a las que lo lleva su vínculo apasionado con el futbol y su lugar como líder de una barra brava. En esta novela nos asomamos a los pensamientos y móviles más íntimos de un joven en busca de identidad, siempre del otro lado del orden establecido, y al que le tocó ser testigo y protagonista de algunos episodios violentos y dramáticos que pasarán a la historia.
