[Pensions, Employment, and the Law](#) Feb 21 2020 Pension funds operated by the trustees of private occupational pension schemes are now among Britain's largest sources of investment and the funds under the control of the trustees amount to billions of dollars. This money is invested to provide pension benefits for employees and it is therefore of paramount importance that these funds are managed in accordance with their members' legitimate expectation that benefits will accrue upon the occurrence of specified events. Recent cases, including the fraud involving the Mirror Group Pension fund, have demonstrated that controls upon trustees may not be effective and that such funds are vulnerable to mismanagement and fraud. This book addresses the question of whether the current legal framework for private occupational pension schemes, based upon the law of trusts, is adequate to the task of controlling the management of these schemes, and suggests a range of reforms that would effectively restore public confidence in pension fund managers.

[Coronavirus and the Law in Europe](#) Nov 24 2022 On 30 January 2020, in response to the globalisation of COVID-19, the World Health Organization declared a Public Health Emergency of International Concern. The deadly outbreak has caused unprecedented disruption to travel and trade and is raising pressing legal questions across all disciplines, which this book attempts to address. The aims of this book are twofold. First, it is intended to serve as a "toolbox" for domestic and European judges. They will soon be dealing with the interpretation of COVID-19-related legislation and administrative measures, as well as the disruption the pandemic has caused to society and fundamental rights. Second, it aims to assist businesses and citizens who wish to be informed about the implications of the virus in the existence, performance and enforcement of their contracts.

[Lie Detection and the Law](#) Sep 10 2021 This book develops a sociological

account of lie detection practices and uses this to think about lying more generally. Bringing together insights from sociology, social history, socio-legal studies and science and technology studies (STS), it explores how torture and technology have been used to try to discern the truth. It examines a variety of socio-legal practices, including trial by ordeal in Europe, the American criminal jury trial, police interrogations using the polygraph machine, and the post-conviction management of sex offenders in the USA and the UK. Moving across these different contexts, it articulates how uncertainties in the use of lie detection technologies are managed, and the complex roles they play in legal spaces. Alongside this story, the book surveys some of the different ways in which lying is understood in philosophy, law and social order. *Lie Detection and the Law* will be of interest to STS researchers, socio-legal scholars, criminologists and sociologists, as well as others working at the intersections of law and science.

Among other current issues, it addresses the radical reforms proposed by the Shipman Inquiry, the impact of change within the NHS, the Mental Capacity Act of 2005 and includes a new chapter on access to health care. The Word and the Law Sep 29 2020 Milner Ball takes an experimental journey into the inner life of law and the careers of men and women who use it to help disadvantaged people and to strengthen the fabric of the communities in which they live. At the center of this book are portraits of seven contemporary legal practitioners—lawyers, judges, and advocates—who have devoted their lives to an unconventional vision of the law. In their work, in areas from New York City housing court to the Warm Springs reservation in Oregon, the law exemplifies fundamental human values, manifestations of what Ball calls the "Word," the presence of God in life. To develop this concept of the Word, Ball explores its workings in familiar literary and biblical texts, primarily William Faulkner's *The Sound and the Fury*, Toni Morrison's *Beloved*, the Book of Isaiah, and the Gospel of Mark.

The New Penguin Guide to the Law Dec 01 2020 This third edition reflects the numerous and, in some areas, profound changes to the law in the last decade. The section on family law covers the new Children's Act and the rights of children (and parents) when families separate. Similarly, the section on the legal system explains the major changes in legal aid procedures including constructive criticism of what is wrong with the legal system. The influence European Community legislation has in the United Kingdom is explained too; in addition there is new material on the legal factors which have to be taken into account by any business venture, including a section on insolvency of companies and bankruptcy of individuals, all of which have changed since the previous edition.

The Law and the Dead Jan 26 2023 The fate of the dead is a compelling and emotive subject, which also raises increasingly complex legal questions. This book focuses on the substantive laws around disposal of the recently deceased and associated issues around their post-mortem fate. It looks primarily at the laws in England and Wales but also offers a comparative approach, drawing heavily on material from other common law jurisdictions including Australia, New Zealand, Canada and the United States. The book provides an in-depth, contextual and comparative analysis of the substantive laws and policy issues around corpse disposal, exhumation and the posthumous treatment of the dead, including commemoration. Topics covered include: the legal frameworks around burial, cremation and other disposal methods; the hierarchy of persons who have a legal duty to dispose of the dead and who are entitled to possession of the deceased's remains; offences against the dead; family burial disputes, and the legal status of burial instructions; the posthumous use of donated bodily material; and the rules around disinterment, and creating an appropriate memorial. A key theme of the book will be to look at the manner in which conflicts involving the dead are becoming increasingly common in secular, multi-cultural societies where the traditional nuclear family model is no longer the norm, and how such legal contests are resolved by courts. As the first comprehensive survey of the laws in this area for decades, this book will be of use to academics, lawyers and judges adjudicating on issues around the fate of the dead, as well as the death industry and funeral service providers.

Education and the Law Oct 31 2020 This edited collection addresses a subject which is topical not only in Britain, where there has been a spate of laws and regulations affecting the structure and content of education, but also in developed and developing countries, where the overriding motivation in many cases has been to raise economic performance. The first part of the book deals with the way legislation affects education and training both directly and tangentially, and how the law through its influence on such things as participation rates, certification and employer involvement can affect the level and degree of economic activity. Contributors examine the education systems of the USA, Kenya, Japan, Germany, Nigeria, Britain and France to illustrate the interdependence of the elements involved. The second part focuses on the concept of curriculum control. Chapters take a comparative approach to what is taught in the classroom and how the implementation of legislation affects all aspects of a country's education system.

Future Law May 18 2022 How will law, regulation and ethics govern a future of fast-changing technologies? Bringing together cutting-edge authors from academia, legal practice and the technology industry, Future Law explores and leverages the power of human imagination in understanding, critiquing and improving the legal responses to technological change. It focuses on the practical difficulties of applying law, policy and ethical structures to emergent technologies both now and in the future. It covers crucial current issues such as big data ethics, ubiquitous surveillance and the Internet of Things, and disruptive technologies such as autonomous vehicles, DIY genetics and robot agents. By using examples from popular culture such as books, films, TV and Instagram - including 'Black Mirror', 'Disney Princesses', 'Star Wars', 'Doctor Who' and 'Rick and Morty' - it brings hypothetical examples to life. Law and the State Feb 15 2022 Law and the State provides a political economy analysis of the legal functioning of a democratic state, illustrating how it builds on informational and legal constraints. It explains, in an organised and thematic fashion, how competitive information enhances democracy while strategic information endangers it, and discusses

how legal constraints stress the dilemma of independence versus discretion for judges as well as the elusive role of administrators and experts. Throughout the book, empirical evidence and comparative studies illuminate sometimes provocative theoretical views on issues such as: the place of the rule of law in constitutional and banking systems; regulation of copyright, art and heritage; innovations and technologies of communication and information; terrorism and media manipulation. Both private and public law, applied and theoretical issues are covered comprehensively. Academics and researchers of law and economics and public choice will find much to challenge and inform them within this book.

Mental Condition Defences and the Criminal Justice System Jan 02 2021

Criminal law has struggled to keep pace with developments in psychiatry, both in substantive and procedural terms, and it is widely recognised that increased inter-disciplinary discussion of mental condition defences is required in order to address this gap between the law and psychiatry. This edited collection comes at a time of review of this sensitive area of criminal law. The Law Commission for England and Wales recently placed its evaluation of insanity, automatism and intoxication on hold, while it considers the law on unfitness to plead. These reviews are set against the backdrop of earlier Law Commission reports on partial defences to murder which informed significant changes that were made to the law in this area under sections 52-56 of the Coroners and Justice Act 2009. Recent developments in case law in this substantive area illustrate not only the importance of the role of the medical expert, but also that reform in this area is informed by ongoing inter-disciplinary research. This collection brings together medical and legal conceptions of mental disorder in order to appraise the operation of mental condition defences. In this respect, it provides invaluable and original insights into mental condition defences and criminal law.

A People's History of Riots, Protest and the Law Aug 21 2022 This book examines how movements from below pose challenges to the status quo. The 2010s have seen an explosion of protest movements, sometimes characterised as riots by governments and the media. But these are not new phenomena, rather reflecting thousands of years of conflict between different social classes. Beginning with struggles for democracy and control of the state in Athens and ancient Rome, this book traces the common threads of resistance through the Middle Ages in Europe and into the modern age. As classes change so does the composition of the protestors and the goals of their movements; the one common factor being how groups can mobilise to resist unbearable oppression, thereby developing a crowd consciousness that widens their political horizons and demonstrates the possibility of overthrowing the existing order. To appreciate the roots and motivations of these so-called deviants the author argues that we need to listen to the sound of the crowd. This book will be of interest to researchers of social movements, protests and riots across sociology, history and international relations.

Presenting a synthesis of information about legal data that will furnish readers with a thorough understanding of the topic, the book also explains why it is becoming crucial that data analysis be integrated into decision-making in the legal space. Legal organizations are looking at how to develop data-driven insights for a variety of purposes and it is, as Sutherland shows, vital that they have the necessary skills to facilitate this work. This book will assist in this endeavour by providing an international perspective on the issues affecting access to legal data and clearly describing methods of obtaining and evaluating it. Sutherland also incorporates advice about how to critically approach data analysis. Legal Data and Information in Practice will be essential reading for those in the law library community who are based in English-speaking countries with a common law tradition.
