Although climate change affects everybody it is not gender neutral. It has significant social impacts and magnifies existing inequalities such as the disparity between women and men in their vulnerability and ability to cope with this

global phenomenon. This new textbook, edited by one of the authors of the seminal *Women and the Environment in the Third World: Alliance for the Future* (1988) which first exposed the links between environmental degradation and unequal impacts on women, provides a comprehensive introduction to gender aspects of climate change. Over 35 authors have contributed to the book. It starts with a short history of the thinking and practice around gender and sustainable development over the past decades. Next it provides a theoretical framework for analyzing climate change manifestations and policies from the perspective of gender and human security. Drawing on new research, the actual and potential effects of climate change on gender equality and women's vulnerabilities are examined, both in rural and urban contexts. This is illustrated with a rich range of case studies from all over the world and valuable lessons are drawn from these real experiences. Too often women are primarily seen as victims of climate change, and their positive roles as agents of change and contributors to livelihood strategies are neglected. The book disputes this characterization and provides many examples of how women around the world organize and build resilience and adapt to climate change and the role they are playing in climate change mitigation. The final section looks at how far gender mainstreaming in climate mitigation and adaptation has advanced, the policy frameworks in place and how we can move from policy to effective action. Accompanied by a wide range of references and key resources, this book provides students and professionals with an essential, comprehensive introduction to the gender aspects of climate change. What do home health aides, call center operators, prostitutes, sperm donors, nail manicurists, and housecleaners have in common? Around the world, they make their livings through touch, closeness, and personal care. Their labors, both paid and unpaid, sustain the day-to-day work that we require to survive. This book takes a close look at carework, domestic work, and sex work in everyday life and illuminates the juncture where money and intimacy meet. Intimate labor is presented as a comprehensive category of investigation into

gender, race, class, and other power relations in the context of global economic transformations. In chronicling the history of intimate labor in light of the rise and devolution of welfare states, women's workforce participation, family formation, the expansion of sex work into new industries, and the development of institutions for dependent people, this wide-ranging reader advances debates over the relationship between care and economy. Two women, virtual strangers, sit hand-in-hand across a narrow table, both intent on the same thing-achieving the perfect manicure. Encounters like this occur thousands of times across the United States in nail salons increasingly owned and operated by Asian immigrants. This study looks closely for the first time at these intimate encounters, focusing on New York City, where such nail salons have become ubiquitous. Drawing from rich and compelling interviews, Miliann Kang takes us inside the nail industry, asking such questions as: Why have nail salons become so popular? Why do so many Asian women, and Korean women in particular, provide these services? Kang discovers multiple motivations for the manicure-from the pampering of white middle class women to the artistic self-expression of working class African American women to the mass consumption of body-related services. Contrary to notions of beauty service establishments as spaces for building community among women, *The Managed Hand* finds that while tentative and fragile solidarities can emerge across the manicure table, they generally give way to even more powerful divisions of race, class, and immigration. Situated knowledge and action -- Stuck on repeat : stereotypes and structural oppression of communities of color -- Building women's leadership : interrelationality as feminist praxis -- Organizing strategies : from the streets to the courts -- Housing struggles from Chinatown to the South Bronx -- Identity politics and intersectionalities in social justice praxis. Nail salon workers face potentially high occupational risks from chemical and particulate matter exposures. Indoor and outdoor VOC (volatile organic compound), PM2.5 (particles with aerodynamic diameter This is the first encyclopedia to

The definitive guide to the secret sauce of improving public and population health

Nontraditional collaborations have produced some of the most sweeping, health-improving results in recent memory. But whether it's public/private, cross-discipline, or interagency, the formula for identifying these partnerships -- not to mention making them work -- remains very much in progress.

The Practical Playbook II is the first resource to elucidate what works (and what doesn't) when it comes to collaborating for change in and around health. It brings together voices of experience and authority to answer this topic's most challenging questions and provide guideposts for applying what they've learned to today's thorniest problems. Readers will find answers to common and advanced questions around multisector

partnerships, including: · Identifying sectors and actors that can help to collaborate to improve health · Best practices for initial engagement · Specifics related to collaborations with government, business, faith communities, and other types of partners · The role of data in establishing and running a partnership · Scaling up to maximize impact and remain sustainable · The role of financing · Implications for policy Written in practical terms that will resonate with readers from any background and sector, *The Practical Playbook II* is the resource that today's helping professions need -- and a roadmap for the next generation of health-improving partnerships.

Intentioning by best-selling author Gloria Feldt will help you envision the life and career you might have thought were impossible dreams, then give you the courage and actionable tools to achieve them. In the wake of the coronavirus pandemic and a pandemic of racial injustice that together shook our world to its core and revealed deep fault lines in our culture, Gloria Feldt, New York Times best-selling author, speaker, commentator, international leadership expert, successful CEO, and feminist icon, shows how we can seize the once-in-a-lifetime opportunity created by massive disruption to build back stronger with diverse women at the center of the recovery. In *Intentioning: Sex, Power, Pandemics, and How Women Will Take The Lead for (Everyone's) Good*, Feldt inspires diverse women to embrace their personal power to lead with intention, confidence, and joy. It comes as no surprise to her that women flexed their formidable muscles when needed most, representing a disproportionate number of essential workers during the darkest days of the coronavirus global outbreak and leading the charge against racism in the United States. But this book is decidedly about the future, taking the leadership lessons learned from this disruption and creating a better world for all. Feldt not only unveils the next step in advancing gender parity in all spheres of business and life, but she also lays out the vital next steps in the overall advancement of our economy and our civilization. The "Lead Like a Woman" framework and the "9 Leadership Intentioning Tools" she presents in this

book will prepare, motivate, and propel women of all diversities and intersectionalities now so that by 2025, women will have attained their fair and equal share of leadership positions across all sectors of industry and society. We simply cannot squander women's talents when so much hangs in the balance. Women must be at the vanguard of reimagining and reconstructing a vibrant and sustainable future for us all.

Organizational Communication: A Critical Approach is the first textbook in the field that is written from a critical perspective while providing a comprehensive survey of theory and research in organizational communication. The text familiarizes students with the field of organizational communication—historically, conceptually, and practically—and challenges them to reconsider their common sense understandings of work and organizations, preparing them for participation in 21st century organizational settings. Linking theory with practice, Mumby skillfully explores the significant role played by organizations and corporations in constructing our identities. The book thus provides important ways for students to critically reflect on their own relationships to work, consumption, and organizations.

Death by Pedicure provides helpful hints on how to keep your feet and nails healthy and covers the full range of infections in the nail salon industry. It provides answers to questions like: What is the most dangerous instrument in a nail salon? What are the primary bacterial organisms responsible for infections? How many infections are estimated to occur yearly with manicures and pedicures in the United States? How can I protect myself from unsanitary nail salons or nail technicians? What are some foot and nail care products to avoid? Who controls the nail salon industry? How can nail technicians detect and refer foot problems before they become serious? Many states have a Failing Grade in disinfection safety protocols. See what **YOUR STATE'S GRADE** is.

An Introduction to Operations Management: The Joy of Operations covers the core topics of operations management, including product and service design, processes, capacity planning, forecasting, inventory, quality, supply chain

management, and project management. Das provides a clear, connected, and current view of operations management and how it relates to a firm's strategic goals. Students will benefit from the real-world scenarios that foster an understanding of operations management tasks. Without relying heavily on statistics and mathematical derivations, the book offers applied models and a simple, predictable chapter format to make it easy to navigate. Students of introductory operations management courses will love this practical textbook. A companion website features an instructor's manual with test questions, as well as additional exercises and examples for in-class use. The Ninth Edition of *An Introduction to Community & Public Health* provides the latest trends and statistics in community health. With an emphasis on developing the knowledge and skills necessary for a career in health education, this best-selling introductory text covers such topics as epidemiology, community organization, program planning, minority health, health care, mental health, environmental health, drugs, safety, and occupational health. My name is Tina Alberino, and I wrote this book to save you. This is not another lame book full of generic beauty business advice. This book serves as the literary equivalent of a kick in the ass and a punch to the throat. You hold in your hands compendium of harsh lessons and a raw depiction of the true nature of this industry. The vast majority of these lessons aren't taught in schools and don't appear in textbooks; they're learned through experience--often in a way that is less-than-gentle. This book will help you navigate this tumultuous industry. The waters run deep, the currents are swift, and the tides shift quickly. The journey can certainly be treacherous. Don't learn these lessons the hard way. Learn how to avoid scoundrel salon owners and crackpot contracts, build a loyal following of glamorous gals and gallant gents, and land your first big break before graduation day! This book calls into question the complexity of social, political, cultural, and technological aspects of the health care system. It explores how critical social science research can be put into action

to improve health care in Canada. “. . . to suddenly discover yourself existing” Our Stories: An Introduction to South Asian America is an anthology rooted in community. Bringing together the voices of sixty-four authors—including a wide range of scholars, artists, journalists, and community members—Our Stories weaves together the myriad histories, experiences, perspectives, and identities that make up the South Asian American community. This volume consists of ten chapters that explore both the history of South Asian America, spanning from the 1780s through the present day, and various aspects of the South Asian American experience, from civic engagement to family. Each chapter offers stories of struggle, resistance, inspiration, and joy that disrupt dominant narratives that have erased South Asian Americans’ role in U.S. history and made restrictions on our belonging. By combining these narratives, Our Stories illustrates the diversity, vibrancy, and power of the South Asian American community. Natural disasters and cholera outbreaks. Ebola, SARS, and concerns over pandemic flu. HIV and AIDS. E. coli outbreaks from contaminated produce and fast foods. Threats of bioterrorism. Contamination of compounded drugs. Vaccination refusals and outbreaks of preventable diseases. These are just some of the headlines from the last 30-plus years highlighting the essential roles and responsibilities of public health, all of which come with ethical issues and the responsibilities they create. Public health has achieved extraordinary successes. And yet these successes also bring with them ethical tension. Not all public health successes are equally distributed in the population; extraordinary health disparities between rich and poor still exist. The most successful public health programs sometimes rely on policies that, while improving public health conditions, also limit individual rights. Public health practitioners and policymakers face these and other questions of ethics routinely in their work, and they must navigate their sometimes competing responsibilities to the health of the public with other important societal values such as privacy, autonomy, and prevailing cultural norms. This Oxford

Handbook provides a sweeping and comprehensive review of the current state of public health ethics, addressing these and numerous other questions. Taking account of the wide range of topics under the umbrella of public health and the ethical issues raised by them, this volume is organized into fifteen sections. It begins with two sections that discuss the conceptual foundations, ethical tensions, and ethical frameworks of and for public health and how public health does its work. The thirteen sections that follow examine the application of public health ethics considerations and approaches across a broad range of public health topics. While chapters are organized into topical sections, each chapter is designed to serve as a standalone contribution. The book includes 73 chapters covering many topics from varying perspectives, a recognition of the diversity of the issues that define public health ethics in the U.S. and globally. This Handbook is an authoritative and indispensable guide to the state of public health ethics today. The increasingly diverse ethnic composition of the United States population has created a profound and ongoing demographic shift, and public health and health care organizations face many challenges as they move to address and adapt to this change. To better understand how the public health and health care communities can meet the challenges of serving an increasingly diverse population, the Roundtable on Health Literacy conducted a public workshop on facilitating health communication with immigrant, refugee, and migrant populations through the use of health literate approaches. The goal of the workshop was to identify approaches that will enable organizations that serve these ethnically and culturally diverse populations in a manner that allows all members of these communities to obtain, process, and understand basic health information and the services needed to make appropriate health and personal decisions. This publication summarizes the presentations and discussions from the workshop. Discover the exciting and potentially lucrative field of airbrushed nails! This comprehensive resource highlights the tools, supplies, and procedures involved in assembling and maintaining your own

profitable airbrush system. No other issue in our times of globalization has aroused such passionate debate as the increasingly complex transborder movements of people of all ethnicities, with the self-perceived "from-heres" often struggling to maintain the illusion of separateness from intruding "come-heres." The paradigm of transculturality offers prospects to rethink, demystify and represent cultural unity and difference, assimilation and alterity, in a manner that acknowledges the fissures and the fictions in traditional cultural dichotomies such as the melodramatically instrumentalized "national" vs. "foreign." The interdisciplinary essays compiled in *Transculturality and Perceptions of the Immigrant Other* focus on the ways in which new diasporic and migrational patterns arouse ill will and conflict, but also negotiation and transcultural impulses, resulting in transformed meso-structures in media, schooling, and business. Investigating regional immigrant groups in the states of Virginia and North Rhine-Westphalia as well as the discourses and images in public media, films, literature, and cultural events, the studies both document the contest for geographical, work, and community space and place it in larger theoretical and specific historical contexts. Arising from an international project undertaken by senior and junior scholars from the fields of cultural studies, history, and sociology at Norfolk State University in Virginia and University of Siegen in Germany, these essays suggest that cultural citizenship can embody dynamic expressions of belonging and strategies of empowerment which shape political and economic communities, engendering in the process innovative forms of constantly negotiated, hybrid identity and transmigratory affiliation. This two volume encyclopedia set focuses on the full expanse of contemporary Asian American experiences in the United States. Drawing on over two decades of research, it takes an unprecedented look at the major issues confronting the Asian American community as a whole, and the specific ethnic identities within that community -- from established groups such as Chinese, Japanese, and Korean Americans to newer groups such as Cambodian and Hmong Americans. The volumes offer 110 entries

on the current state of affairs, controversies, successes, and outlooks for future for Asian Americans. The set is divided into 11 thematic sections including diversity and demographics; education; health; identity; immigrants, refugees, and citizenship; law; media; politics; war; work and economy; youth, family, and the aged. Contributors include leading experts in the fields of Asian American studies, education, public health, political science, law, economics, and psychology. Whether you're a hairdresser, colorist, barber, massage therapist, esthetician, or nail technician, are just starting out or have been in the industry for years, Money Mastery can help you make more money and attract more clients. Money Mastery is a CD compilation of Salon Training International's three successful audio training programs, The Needs Assessment, Increase Your Color Business Today, and Getting Retail Results. Featuring Susie Fields Carder, the founder of Salon Training International and a former salon owner, hair stylist and sales consultant herself. The twenty-first century has seen the emergence of a new style of man: the metrosexual. Overwhelmingly straight, white, and wealthy, these impeccably coiffed urban professionals spend big money on everything from facials to pedicures, all part of a multi-billion-dollar male grooming industry. Yet as this innovative study reveals, even as the industry encourages men to invest more in their appearance, it still relies on women to do much of the work. Styling Masculinity investigates how men's beauty salons have persuaded their clientele to regard them as masculine spaces. To answer this question, sociologist Kristen Barber goes inside Adonis and The Executive, two upscale men's salons in Southern California. Conducting detailed observations and extensive interviews with both customers and employees, she shows how female salon workers not only perform the physical labor of snipping, tweezing, waxing, and exfoliating, but also perform the emotional labor of pampering their clients and pumping up their masculine egos. Letting salon employees tell their own stories, Barber not only documents occasions when these workers are objectified and demeaned, but also explores how their jobs allow for creativity and confer a degree of professional dignity. In the process, she traces the vast network of economic and social relations that undergird the burgeoning male beauty industry.
