Schools Cannot Do it Alone Apr 08 2021 *Schools Cannot Do It Alone* tells of Jamie Vollmer, businessman and attorney, as he travels through through the land of public education. His encounters with blueberries, bell curves, and smelly eighth graders lead him to two critical discoveries. First, we have a systems problem, not a people problem. We must change the system to get the graduates we need. Second, we cannot touch the system without touching the culture of the surrounding town; everything that goes on inside a school is tied to local attitudes, values, traditions, and beliefs. Drawing on his work in hundreds of districts, Jamie offers teachers, administrators, board members, and their allies a practical program to secure the understanding, trust, permission, and support they need to change the system and increase student succes

Bad Twin Nov 15 2021 Paul Artisan, P.I. is a new version of an old breed -- a righter of wrongs, someone driven to get to the bottom of things. Too bad his usual cases are of the boring malpractice and fraud variety. Until now. His new gig turns on the disappearance of one of a pair of twins, adult scions of a rich but tragedy-prone family. The missing twin -- a charismatic poster-boy for irresponsibility -- has spent his life daring people to hate him, punishing himself endlessly for his screw-ups and misdeeds. The other twin -- Artisan's client -- is dutiful and resentful in equal measure, bewildered that his "other half" could have turned out so badly, and wracked by guilt at his inability to reform him. He has a more practical reason, as

well, for wanting his brother found: their crazy father, in failing health and with guilty secrets of his own, will not divide the family fortune until both siblings are accounted for. But it isn't just a fortune that's at stake here. Truth itself is up for grabs, as the detective's discoveries seem to challenge everything we think we know about identity, and human nature, and family. As Artisan journeys across the globe to track down the bad twin, he seems to have moved into a mirror-world where friends and enemies have a way of looking very much alike. The P.I. may have his long-awaited chance to put his courage and ideals to the test, but if he doesn't get to the bottom of this case soon, it could very well cost him his life. Troup's long-awaited *Bad Twin* is a suspenseful novel that touches on many powerful themes, including the consequence of vengeance, the power of redemption, and where to turn when all seems lost.

Extreme Economies Dec 05 2020 *Winner of the Enlightened Economist Prize 2019* *Winner of Debut Writer of the Year at the Edward Stanford Travel Writing Awards 2020* *Longlisted for the Financial Times & McKinsey Business Book of the Year Award 2019* 'Extreme Economies is a revelation - and a must-read.' Andy Haldane, Chief Economist at the Bank of England To understand how humans react and adapt to economic change we need to study people who live in harsh environments. From death-row prisoners trading in institutions where money is banned to flourishing entrepreneurs in the world's largest refugee camp, from the unrealised potential of cities like Kinshasa to the hyper-modern economy of Estonia, every life in this book has been hit by a seismic shock, violently broken or changed in some way. In his quest for a purer view of how economies succeed and fail, Richard Davies takes the reader off the beaten path to places where part of the economy has been repressed, removed, destroyed or turbocharged. He tells the personal stories of humans living in these extreme situations, and of the financial infrastructure they create. Far from the familiar stock reports, housing crises, or banking scandals of the financial pages, Extreme Economies reveals the importance of human and social capital, and in so doing tells small stories that shed light on today's biggest economic questions. 'A highly original approach to understanding what really makes economies tick.' Mervyn King, former Governor of the Bank of England *Weird But True 9* Jun 30 2020 Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.
