*Stabilization and Growth in Developing Countries Feb 23 2020 Lance Taylor uses structuralist models to examine the issues of short-term fluctuations and long-term growth in developing economies.*

*Public Health in Developing Countries Jan 28 2023 Public health entails the use of models, technologies, experience and evidence derived through consumer participation, translational research and population sciences to protect and improve the health of the population. Enhancing public health is of significant importance to the development of a nation, particularly for developing countries where the health care system is underdeveloped, fragile or vulnerable. This book examines progress and challenges with regards to public health in developing countries in two parts: Part 1 "General and Crosscutting Issues in Public Health and Case Studies" and Part 2 "Country-Specific Issues in Public Health." For example, assuring equity for marginalized indigenous groups and other key populations entails the application of transdisciplinary interventions including legislation, advocacy, financing,*

*empowerment and de-stigmatization. The diverse structural, political, economic, technological, geographical and social landscape of developing countries translates to unique public health challenges, infrastructure and implementation trajectories in addressing issues such as vector-borne diseases and intimate partner violence. This volume will be of interest to researchers, health ministry policy makers, public health professionals and non-governmental organizations whose work entails collaborations with public health systems of developing nations and regions.*

*Foreign Enterprise in Developing Countries Feb 02 2021 Design and purpose of the project; Foreign enterprise in developing countries; An overview of the problem; ; Transfer of technology; Home-country policies; International programs and arrangements.*

*New Generic Technologies in Developing Countries Feb 14 2022 An examination of developing countries' ability to benefit from new generic technologies in the realms of information, communication, biotechnology and new materials. The book demonstrates why some developing countries have made considerable progress in absorbing the new technologies while most are still at the starting-blocks, and draws on the international donor community's experience to analyse appropriate aid policies and strategies.*

*Redistribution with Growth Nov 13 2021*

*Wellbeing in Developing Countries Dec 27 2022 In a world where many experience unprecedented levels of wellbeing, chronic poverty remains a major concern for many developing countries and the international community. Conventional frameworks for understanding development and poverty have focused on money, commodities and economic growth. This 2007 book challenges these conventional approaches and contributes to a new paradigm for development centred on human wellbeing. Poor people are not defined solely by their poverty and a wellbeing approach provides a better means of understanding how people become and stay poor. It examines three perspectives: ideas of human functioning, capabilities and needs; the analysis of livelihoods and resource use; and research on subjective wellbeing and happiness. A range of international experts from psychology, economics, anthropology, sociology, political science and development evaluate the state-of-the-art in understanding wellbeing from these perspectives. This book establishes a new strategy and methodology for researching wellbeing that can influence policy.*

*The Rule of Law in Developing Countries Dec 03 2020 Bangladesh, one of the most densely populated countries in the world and second in South Asia, is known for its natural disasters, floods and political violence. However, the country plans to become a middle-income country by 2020 due to rapid economic growth led by strong and vibrant garments and pharmaceutical sectors. A developing country, Bangladesh cannot reach its true potential if there is a weak legal system and the executive have no regard for the rule of law. This book discusses and analyses the legal system of Bangladesh. It studies the various weaknesses and whether the judiciary of the country is really independent. International experts, scholars and lawyers with significant experience of working in Bangladesh and at international agencies and universities examine the role of the judiciary in maintaining the rule of law in the country and the critical role it can play in strengthening democracy. The chapters show the various roles played by the judiciary in*

*promoting its independence and thereby strengthening democracy in the country. The first book to analyse the role of the judiciary and the various weaknesses in the legal system of Bangladesh, it is a relevant case study in the context of developing countries. The problems found in the legal system of Bangladesh prevail in most of the developing countries in Asia, Africa and Latin America. The book will be of interest to academics in the field of development studies, South Asian Studies and Asian Law.*

*Rural Poverty in Developing Countries Nov 25 2022 Reviews causes of poverty in rural areas and presents a policy framework for reducing rural poverty, including through land reform, public works programs, access to credit, physical and social infrastructure, subsidies, and transfer of technology. Identifies key elements for drafting a policy to reduce rural poverty.*

*Perspectives In Resource Management In Developing Countries (vol. 2: Population, Resources And Development) Mar 06 2021*

*Openness, Outward Orientation, Trade Liberalization and Economic Performance in Developing Countries Sep 11 2021 This paper deals with the role of trade regimes in determining economic performance and growth in the developing countries. The policy and empirical literatures on trade orientation and economic growth are critically reviewed; it is argued that a key limitation of these works has been the inability to create measures of trade orientation that are: (i) objective; (ii) continuous and (iii) comparable across countries. A growth model that relates trade orientation to the ability to absorb technological progress from the rest of the world is developed for the case of a small country. The model is tested using a new index of trade orientation that is free from the limitations described above. The results obtained using a cross country data set provide strong support to the hypothesis that, with other things given, countries with a less distorted external sector grow faster than those countries with a more distorted external sector. The new theories of economic growth are also discussed, and their usefulness for analyzing the relation between trade orientation and growth in the developing countries is assessed.*

*Establishing Private Health Care Facilities in Developing Countries Apr 06 2021 This book is a practical guide for medical professionals with little or no business experience who are interested in establishing health care facilities in developing countries. It is an introduction to the kinds of basic research and planning required to identify viable solutions and reduce the risk of failure.*

*Methods For Social Analysis In Developing Countries Aug 23 2022*

*Industrial and Trade Policy Reform in Developing Countries Jan 04 2021*

*Rural Planning in Developing Countries Aug 30 2020 First published in 1965, this reissue is a report on the Second Rehovoth Conference of August 1963, convened by the then Deputy Prime Minister of Israel, Mr Abba Eban, in order to enable the scientists and political leaders of developing countries to establish meaningful communication on the overall topic of comprehensive planning of agriculture in developing countries. Conference discussions centred on the three main topics of; agricultural planning and rural development; the human factor in agricultural development; and agricultural research, extension, and education.*

*Foreign Direct Investment as a Tool for Poverty Reduction in Developing Countries Jun 08 2021 The textbook experience of poverty can be witnessed in a number of developing countries*

*in Sub-Saharan Africa, South-East Asia and Latin America. Accordingly, Foreign Direct Investment (FDI) has been identified as an important tool for poverty reduction, as it is noted to accelerate economic growth and employment in a nation, and is currently an essential issue for countries such as Uganda. This book finds that Ragnar's 1953 'Vicious-Circle of Poverty' remains undisputed even today, showing that attracting FDI is not the end, but that a nation's absorption capacity is equally paramount. The implications of the FDI 'frog-leap theory' for developing countries and the Community Capital Absorption Capacity Development (CCACD) framework provide plausible poverty reduction approaches in the 21st century. Without such measures, bringing an end to poverty is likely to elude governments and multinational corporations in developing countries.*

*The Economics Of New Technology In Developing Countries Jul 10 2021 Collection of essays on choice of technology for industrialization in developing countries - discusses objectives, criteria, selection mechanisms, production function approaches, production factor mix, resource allocation and productivity efficiency, the accumulation of knowhow, research and development capacity, welfare effects of product development, etc.; includes case studies. References.*

*Rural Poverty in Developing Countries Mar 18 2022 In most developing countries, poverty is more widespread and severe in rural than in urban areas. The author reviews some important aspects of rural poverty and draws key implications for public policy. He presents a policy framework for reducing poverty, taking into account the functional differences and overlap between the rural poor. Several policy options are delineated and explained, including stable management of the macroeconomic environment, transfer of assets, investment in and access to the physical and social infrastructure, access to credit and jobs, and provision of safety nets. Finally, some guideposts are identified for assessing strategies to reduce rural poverty.*

*The Organization of Space in Developing Countries May 20 2022 Monograph on the rational design of the rural areas and urban areas environment and the crucial importance thereof for sustained economic growth in developing countries - synthesizes the implications of various significant contributions to the economic theory of space, covers economic planning and regional planning, the inseparability of rural development and industrial development, etc., and includes case studies. Bibliography pp. 425 to 441, diagrams, maps and statistical tables.*

*Women in Developing Countries Apr 26 2020 Essays on the implications of economic development and modernization for women (partic. Rural women), addressing development research and social policy issues in developing countries - discusses the impact of development aid, capitalism and inappropriate choice of technology and development planning on marginalisation, proletarianization, sexual division of labour, household production, etc.; provides an evaluation of Ford Foundation aid programmes; includes statistical sources and case studies of Guatemala, Tanzania, Indonesia. Select bibliography.*

*The Political Economy of HIV/AIDS in Developing Countries Feb 26 2023 The issue of universal and free access to treatment is now a fundamental goal of the international community. Based on original data and field studies from Brazil, Thailand, India and Sub-Saharan Africa under the aegis of ANRS (the French national agency for research on Aids and viral hepatitis, this timely and significant book both assesses the progress made in achieving this objective and presents a rigorous diagnosis of the obstacles that remain. Placing particular*

*emphasis on the constraints imposed by TRIPS as well as the poor state of most public health systems in Southern countries, the contributing authors provide a comprehensive analysis of the huge barriers that have yet to be overcome in order to attain free access to care and offer innovative suggestions of how they might be confronted. In doing this, the book renews our understanding of the political economy of HIV/AIDS in these vast regions, where the disease continues to spread with devastating social and economic consequences. This volume will be a valuable addition to the current literature on HIV/AIDS in developing countries and will find widespread appeal amongst students and academics studying economics, sociology and public health. It will also be of interest to international organizations and professional associations involved in the fight against pandemics.*

*Management Education in Developing Countries Oct 01 2020*

*Industrial Policy in Developing Countries Mar 30 2023 Against the backdrop of persistently high levels of poverty and inequality, critical environmental boundaries and increasing global economic interdependence, this book addresses the role and impact of industrial policies in developing countries. Accepting the reality of both market failure and policy failure, it identifies the conditions under which industrial policy can deliver socially desirable results. General conclusions on the political economy of development are complemented by country case studies covering Ethiopia, Mozambique, Namibia, Tunisia and Vietnam.*

*Building Materials in Developing Countries Nov 01 2020 This book provides a thorough survey of building materials in the context of construction in developing countries. It focuses on the assessment choice and manufacture of suitable materials and appropriate building technology. It also discusses the implications of the social, demographic and economic problems of the Third World for construction policy and practice. Primarily a text for students of architecture and building science in developing countries, this should prove a useful manual for building consultants and engineers with Third World interests.*

*Indirect Taxation in Developing Economies Oct 13 2021 Study of the role and structure of indirect taxation in developing countries - discusses in detail the dominant role of tariffs, excises and sales taxes, and their implementation during progressive stages of economic growth. References and statistical tables.*

*Social Policy in Developing Countries Apr 30 2023 This reissue, first published in 1969, is a study of contemporary social policy in developing countries, which places the emphasis upon the human needs and requirements for social change which confront any people and any government, wherever their political and international affiliations lie, whatever their economic and social convictions may be.*

*Politics in Developing Countries Aug 11 2021 Politics in Developing Countries provides a clear and reader-friendly introduction to the key factors and themes that shape political processes in developing countries. Achieving development outcomes such as reducing poverty and inequality is only possible through efficient governance, well-planned policies and careful allocation of resources, but often politics in developing countries has been identified with mismanagement, corruption, conflict and repression of dissent. This book assesses the politics of developing countries in the period since decolonisation, focusing on the ways in which states have or have not worked to the advancement of their citizens' interests. Key topics include:*

*Colonialism and its legacy Ethnicity and nation building Governance, corruption and the role of the state Poverty and the political economy of development Aid and outside influence. Drawing on a range of case studies from around the world, Politics in Developing Countries looks at the consistencies and variations between developing countries, examining why some have forestalled political change by liberalising their economies, and others have actively stifled calls for change. Wide-ranging and engagingly written, this introductory textbook is perfect for students of politics and international development, as well as for those with a general interest in the challenges faced by countries in the Global South.*

*Disease Control Priorities in Developing Countries Apr 18 2022 Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.*

*Population Mobility in Developing Countries Jan 22 2020 Debates the fact that the modes of population migration change systematically from region to region over time. Incorporating original data from several areas of the developing world plus evidence from a comprehensive review of existing literature, it illustrates how human mobility is connected to social, economic and political change. Compares the historical experience of Europe with patterns in today's developing countries.*

*Empowering Adolescent Girls in Developing Countries Mar 25 2020 The Open Access version of this book, available at <http://www.tandfebooks.com/doi/view/10.4324/9781315180250>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license Adolescence is a pivotal time in a girl's life. The development of educational, physical, psychosocial, familial, political and economic capabilities enable girls to reach their full potential and contribute to the wellbeing of their families and society. However, progress is still significantly constrained by discriminatory gender norms and the related attitudes and practices which restrict girls' horizons, restrain their ambition and, if unfettered, allow exploitation and abuse. Empowering Adolescent Girls in Developing Countries explores the detrimental impact of discriminatory gender norms on adolescent girls' lives across very different contexts. Grounded in four years of in-depth research in Ethiopia, Nepal, Uganda and Viet Nam, the book adopts a holistic approach, recognising the inter-related nature of capabilities and the importance of local context. By exploring the theory of gendered norm change, contextualising and examining socialisation processes, the book identifies the patriarchal vested interests in power, authority and moral privilege, which combine in attempts to restrict and control girls' lives. Throughout the book, Empowering Adolescent Girls in Developing Countries demonstrates how efforts to develop more egalitarian gender norms can enable disadvantaged adolescent girls to change the course of their lives and contribute to societal change. Accessible and informative, the book is perfect for policy makers, think tanks,*

*NGOs, activists, academics and students of gender and development studies.*

*Urbanization in Developing Countries Oct 25 2022*

*Automotive Industries in Developing Countries Jul 22 2022*

*Managing in Developing Countries May 27 2020 This book considers management theories and approaches specifically in the context of developing countries. In recent years, international business scholarship has increased its focus on the developing world, which represents 80 percent of the global population and has doubled its share of value-added trade in the past two decades. This text will help readers to manage successfully in this region by learning to assess, apply, and adapt established practices in developing countries. Punnett begins by identifying the characteristics of the developing world—Africa, Asia, the Caribbean, India, Latin America, and the Middle East—and the companies therein to help students understand how the reality of these countries influences business and management. By tracking a fictional product through the internationalization process, students will navigate the challenges of operating an international company from a developing country base, using a traditional model of management focused on planning, organizing, staffing, leading, and controlling. They will also gain insight into ethical considerations likely to arise, such as differential treatment based on personal characteristics and age dispersion. Cases, discussion questions, personal stories, and end-of-chapter exercises will help readers to grapple with issues and test their learning. Complete with chapter objectives and "Lessons Learned" boxes to facilitate understanding, *Managing in Developing Countries* is an excellent supplement for international business or international management students with a special interest in the developing world.*

*Basic Needs in Developing Countries Dec 23 2019*

*Journalism and Journalism Education in Developing Countries Jan 16 2022 Free and fair media are at the heart of any democratic set up. A thriving field of journalism and zealous and ethical journalists in that sense become torch bearers of a brighter and promising tomorrow. In this light, the status of journalists, the most important actors in the field becomes increasingly important as a matter of study. They act as gatekeepers of information that is flooding in the era of new media, a wave that is not so new anymore. Their roles remain intact and even becomes prominent in the chaos of many-to-many communication. Not concentrating on specific countries, selected contributions in the book reflect on the developments of media and journalism education across different countries. Introducing the book with an overview about the state-of-the-art of journalism education and the research on a meta level, the book moves on to talk about media studies in the Asian countries and in Arab world, the African States and Brazil. This book is an interesting read for all those who care about a vital media landscape and an open democratic society. The recent economic and social developments present both opportunities and risks for journalism. Freedom of expression and freedom of press, even in democratic countries, are under pressure. This book provides an international perspective on the different aspects of journalism – the situation in which journalists work, their working conditions, educational backgrounds, struggles and successes. It is aimed at an international public interested in the field of journalism and freedom of speech. It addresses journalists, trainers and academics. Furthermore, institutions in the field of development cooperation, education or cultural policy and cultural education are the focus of this work. Though the book*

*is focused on journalism and journalism education in developing countries, contributions are from across the globe.*

*Wellbeing in Developing Countries Jun 28 2020 Establishes a new paradigm for development centred on the idea of human wellbeing.*

*Corporate Citizenship in Developing Countries Sep 23 2022 "This book is about corporate citizenship in developing countries, paying special attention to the new partnerships between companies, development agencies and/or civil society organisations. The book will deal with some of the following issues: analyse the background for discussing corporate citizenship in developing countries; describe some of the development issues facing companies trying to be good corporate citizens; present the background and content of the new partnerships between companies, development agencies and civil society organisations; and discuss the potentials and pitfalls of these cooperative approaches." "The book is written by scholars and practitioners with comprehensive knowledge of corporate citizenship, corporate social responsibility, private sector development, etc."--BOOK JACKET.*

*The Future of Rural Youth in Developing Countries Tapping the Potential of Local Value Chains Jun 20 2022 Rural youth constitute over half of the youth population in developing countries and will continue to increase in the next 35 years. Without rural transformation and green industrialisation happening fast enough to create more wage employment in a sustainable manner, the vast majority of rural ...*

*Fiscal Policy in Developing Countries: Jul 30 2020 This paper surveys fiscal policy in developing countries from the point of view of long-run growth. The first section reviews existing methodologies to estimate the effects of fiscal policy shocks and of systematic fiscal policy, with time series or with cross-sectional methods, and their applicability to developing countries. The second section surveys optimal fiscal policy in developing countries, by considering the role of the intertemporal government budget, and sustainability and solvency. It also reviews the fuzzy debate on "fiscal space" and "macroeconomic space" - and the usefulness (or lack thereof) of these terms for policy analysis. The third section asks what theory tells us about the optimal cyclical behavior of fiscal policy in developing countries. It shows that it very much depends on the assumptions about the interactions between credit market imperfections at the individual, firms, or government level, and on the supply of external funds to the country. Different sets of assumptions lead to different implications about optimal cyclical behavior. The available evidence on the cyclical behavior of fiscal policy, and possible reasons for the observed prevalence of a procyclical behavior in developing countries, is also reviewed. If one agrees that fiscal policy is indeed less countercyclical than we think is optimal, the issue is how to correct the problem. One obvious question is why government do not self-insure, i.e. why they do not accumulate assets in upturns and decumulate them in downturns. This leads to the analysis of fiscal rules and stabilization funds, in the fourth section. The last section concludes with what the author considers important research and policy questions in each part.*
