Accompanying CD-ROM has same title as book. The nation's first mandatory green building code is here - stay ahead of the game by knowing it! The California Green Building Standards Code (CGBSC), also referred to as CALGreen, contains regulations for energy efficiency, water efficiency and conservation, material conservation and resource efficiency, environmental quality, and more. It includes mandatory provisions for a variety of types of buildings, from commercial and low-rise residential to public schools. And the code's valuable appendices include voluntary provisions for all of these occupancies - and add hospitals. Logically organized with residential and non-residential provisions in separate chapters, the 2010 CA GREEN BUILDING STANDARDS CODE, TITLE 24 PART 11 is informative, thorough, and most of all, easy to use. This part is known as the California Energy Code."--Preface. Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." Golden Gulag provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. Golden Gulag provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion. From the late 1970s until the present day, the New Public Management movement flourished in the United Kingdom, New Zealand, Australia and a number of other countries over the globe. Nowadays, governments across the world are more service-oriented than previously, and administrative system innovations are encouraging new ways of improving public services. Increasingly, more and more countries are witnessing administrative

innovations to provide better, quicker, and more efficient and effective service to the public. To this end, this collection of essays highlights public service theory and practices. While some chapters concentrate on innovation in administrative systems, others pay attention to more theoretic and practical issues. A few examine municipal-level public service and innovation, whereas others focus on environment, community policing, public infrastructure, partnership governance, and e-service and e-participation, as well as citizen participation. The book represents an excellent, updated resource for scholars, students and practitioners in the broad field of public administration, public policy, public affairs and public management. "This document is the 12th of 12 parts of the official triennial compilation and publication of the adoptions, amendments and repeal of administrative regulations to California Code of Regulations, Title 24, also referred to the California Building Standards Code.
