Were you fascinated by a woodturning project you came across and have since then, searched the Internet for one book with all the juicy bits of information in the art of woodturning? Maybe you have found some books but weren't too thrilled by the things you saw enough to start something? If so, then read on... The answers to all your questions are here, dear turner or turner-to-be! This book, Woodturning Book for Beginners, amazingly has virtually everything, and by everything, I mean the tips, techniques, guidelines, pictures, and instructions you will need to make you feel like you are in a classroom where the art of woodturning is taught. Are you perhaps just hearing of the lathe machine? Have you probably gotten intimidated by the somewhat complicated way a lathe device looks like? You know, you can't really judge a book by its cover. Relax and know what this art entails first. Trust me; you'll love it. What exactly does woodturning entail? Woodturning is an art that involves the turning of a wood stock on a lathe device that is either mounted on a bench or bolted to the floor. So, while the wood is turned, you will work a series of cutting tools through the wood to cut through it. You wouldn't believe it, but the principle of woodturning has been in existence for a pretty long time. The only issue is that the projects made in the past could not stand the test of time since they rotted quickly. However, the devices got better and more efficient over the years, causing many people to take this art as a hobby and job, even! There are now preservative agents and finishes that prevent the wood from rotting. The lathe device is cheap, and as long as you can exercise a lot of patience while reading through the guidelines you will see in this book, you will be good to go. Perhaps you have seen some wood-work projects and gotten awed by them? Do you see yourself doing something very similar to those things? Yes? Then this book is just what you need. Just like the name suggests, this book is very suitable for beginners, but then you don't remain a beginner at the end of the book. You come out neatly polished and ready to make professional turnings. Experts in woodturning art are also free to peruse this book as it will refine them even more and add to what they already know. At the end of this book, you will; 1. Be familiar with the historical bit of information and the timelines in which the lathe machine existed. 2. Be enlightened on the techniques, tips, and tools that will guide you in producing your first woodturning project. 3. Be aware of what to do to keep yourself safe and free from any potential hazard while using the lathe device. 4. Be educated on the tools and materials needed for your projects, including how to source the right tools and materials. 5. Kickstart your woodturning experience with the help of 15 woodturning project ideas with well-detailed directions. 6. Be aware of the common woodturning mistakes to avoid, including having pre-informed knowledge of the most frequently asked woodturning questions. ...And a whole lot more! NEW YORK TIMES, USA TODAY, and PUBLISHERS WEEKLY BESTSELLER “Full of valuable insights to guide you.”—WILL SMITH “Thoughtful and life-affirming . . . a must-read.”—TONY ROBBINS “This book will put you back in charge of your own life.”—TOM BRADY A new perspective on the overused and misunderstood concept of “karma” that offers the key to happiness and enlightenment, from the world-renowned spiritual master Sadhguru. What is karma? Most people understand karma as a balance sheet of good and bad deeds, virtues and sins. The mechanism that decrees that we cannot evade the consequences of our own actions. In reality, karma has nothing to do with reward and punishment. Karma simply means action: your action, your responsibility. It isn't some external system of crime and punishment, but an internal cycle generated by you. Accumulation of karma is determined only by your intention and the way you respond to what is happening to you. Over time, it's possible to become ensnared by your own unconscious patterns of behavior. In Karma, Sadhguru seeks to put you back in the driver's seat, turning you from a terror-struck passenger to a confident driver navigating the course of your own destiny. By living consciously and fully inhabiting each moment, you can free yourself from the cycle. Karma is an exploration and a manual, restoring our understanding of karma to its original potential for freedom and empowerment instead of a source of entanglement. Through Sadhguru's teachings, you will learn how to live intelligently and joyfully in a challenging world. Stop searching for purpose. Build it. We're living through a crisis of purpose. Surveys indicate that people are feeling less connected to the meaning of their work, asking, "How do I find my purpose?" That's the wrong question. You don't find your purpose—you build it. The HBR Guide to Crafting Your Purpose debunks three common myths about purpose: that purpose is found, that you have only one, and that it stays the same over time. Packed with stories, tips, and activities, this book teaches you how to cultivate more meaning in your life and work and endow everything you do with purpose. You'll learn how to: Find the reason behind your work Identify what makes you feel happy and fulfilled Use job crafting to transform your role Build positive, fulfilling relationships Connect your work to service Arm yourself with the advice you need to succeed on the job, with the most trusted brand in business. Packed with how-to essentials from leading experts, the HBR Guides provide smart answers to your most pressing work challenges. The truth is, success is not coming from an earth-shattering vision or from being charismatic. Success in product development and product management is about connecting the dots and translating the right vision into the right product. There is no foolproof recipe for product strategy. But there is a process that enables you to craft your unique strategy. A constant rhythm of product management that guides you both in daily business decisions and on your long journey towards realizing your overarching vision. This book lays out the complete process with templates and checklists and gives you everything you need to be a product strategy rockstar. These tools have been battle-proofed by companies like Amazon, Google, Microsoft and most of the startups you actually heard of. Think of them as a best-of-mixtape of product management practices put together in a unique, coherent package and process. Poems include quotes by Alan Cohen, Confucius, Buddha, Muhammad, Ravi Zacharias, etc. They are organized by names and from A to Z in coherence with the poems. The collection of poems includes 25 crafting poems from A to Z with quotes just like this one: Crafting is much like the letter U because crafting with used books is one of the best ways to add some style. It's a fun way to make an author's words become even more worthwhile! Crafting is also like U because crafting with the universe in mind is yet undefined but might be the best thing happening to mankind. Crafting with the universe might make you seem very small. Yet that one little space you take for you is the most important crafting space of all. Some very lucky few crafters are able to get in touch with it so make sure you work at it! Crafting is also quite like the letter U because crafting reminds me of crafting with used Christmas cards. Used Christmas cards are also quite nice because of every Xmas craft ingredient that is quite convenient and because crafting with Used Christmas cards also follows the crafting law of the "Petit Bourgeois". There are other things like the blue artistic law and the natural crafting law, but the important thing to remember they are all employing the unwritten law of hem and haw! If you think that this crafting thing is getting out of line, let me tell you this. Question the law of crafting and with you, an expert will have a grand ol' time! And as always, never, never forget this. Make sure to stay true to your hue of blue and your glue. If you stick to this you will always keep your artistic view! Umberto Ungerer can really speak to this: "The only exercise some people get is jumping to conclusions, running down their friends, side-stepping their responsibilities, and pushing their luck!" -Umberto Ungerer Welcome to a happy crafting life and welcome to "Crafting Is Like You!"
