The essays in *Fighting for Rome* confront the traumatic disjunction between the militarist culture of classical Rome, with its heavy investment in valour, conquest and triumph, and the domination of its history by civil war, where Roman soldiers killed so many Romans for control of Rome. The essays gathered and rewritten here range across the literary forms (history, satire, lyric and epic) and work closely with the ancient texts (Appian and Julius Caesar; Horace; Lucan and Statius; Tacitus and Livy). Close reading and powerful translation communicate the ancient writers' efforts to grasp and respond to the Roman civil wars, and to their product, Roman terror under the Caesars. The book aims to bring to life strong reactions to a world order run by civil war. *DK Eyewitness Travel Guide: Rome* will lead you straight to the best attractions this culturally rich city has to offer. The Romans created the most successful and longest-lasting empire in history. They conquered and civilised a territory that stretched from Scotland to Libya, from Portugal to Iraq - and then ran it for more than 400 years. The dream of Rome has lived on in the memory of European leaders ever since, and one after the other they have tried to imitate the Roman achievement. Charlemagne tried it. Napoleon tried it. And now the European Union can be seen as the latest attempt to rediscover the unity of the Roman empire. So how did the Romans pull it off? Boris Johnson has long been fascinated by the Roman achievement - how they managed to weld the peoples of Europe together, and how they created a cultural and political identity that is proving so elusive to us in Europe today. Here he presents an account of how they financed and organised the state. He explains the miraculous process by which people wanted to become Roman citizens and, for the first time, to share a common European identity. With minimal regulation, and a tiny bureaucracy, the Romans created the first single European market, complete with single currency - and all with an army that represented a very small percentage of the population. What was their magic? This is the first book to examine the Roman system in detail, as a way

of casting light on the challenges we face today. It is full of the wonderful scenes and extraordinary characters who made our civilisation, and who still inspire the dream of Rome. The fourth and final book in the new historical adventure series from million copy selling Caroline Lawrence, set in Roman Britain during the reign of the evil Emperor Domitian. AD 96. Bouda, an orphaned British girl with a troubled past, has been helping Juba and his siblings since they first arrived in Britannia. For almost two years they have been in hiding from the Emperor Domitian's agents. But now information has come to light that could bring down the tyrant. When Juba and his sister decide to return to Rome with the man who has this evidence, Bouda goes with them. But is it ever right to kill a tyrant? From the bestselling author of THE ROMAN MYSTERIES, perfect for children studying at Key Stage 2. The events and personalities of ancient Rome spring to life in this history, from its founding in 753 B.C. to the death of the philosopher-emperor Marcus Aurelius in A.D. 180. Paul A. Zoch presents, in contemporary language, the history of Rome and the stories of its protagonists?such as Romulus and Remus, Horatius, and Nero-which are so often omitted from more specialized studies. With an eye detail, Zoch guides his readers through the military campaigns and political developments that shaped Rome's rise from a small Italian city to the greatest imperial power the world had ever known. We

witness the long struggle against the enemy city of Carthage. We follow Caesar as he campaigns in Britain, and we observe the ebb and flow of Rome's fortunes in the Hellenistic East. Writing with the belief that such stories contain moral lessons that are relevant today, Zoch presents a narrative that is both entertaining and informative. An afterword takes the history to the fall of the Roman Empire in the West in A.D. 476. An awe-inspiring account of the final days of Rome's forgotten legion. The Ninth Hispana was once the pride of the Roman Army, wreathed in honour for numerous successful campaigns. But by the time it was joined by Centurion Justinus Corvus, it had clearly fallen on hard times. Smarting from the sting of his recent demotion, and a transfer to Britain, a land he despises, Justinus nevertheless works hard to bring to his men some of the same pride he feels as a Roman soldier. As their bond grows strong, with each other and with the occupied land, their skill in combat is tested to its limits against the forces of Vortrix, High King of the Britons. As the battle lines muster, the fate of an Army, and of a nation, will be decided... The Legions of the Mist is an earth-shattering tale of loyalty, love and war, perfect for fans of Simon Scarrow, Conn Iggulden and Ben Kane. This volume is the fourth in the series Corollaria Crustumina and deals with the results of the project The People and the State, Material culture, social structure, and political centralisation in Central Italy (800-450 BC). This project

of the Groningen Institute of Archaeology, carried out between 2010 and 2015 in close collaboration with the Archaeological Service of Rome, deals with the changing socio-political situation at ancient Crustumerium resulting from Rome's rise to power. The volume brings together data from the domains of geology, geoarchaeology, urban and rural settlement archaeology, funerary archaeology, material culture studies as well as osteological and isotope analyses. On the basis of these data, a relationship is established between changes in material culture on the one hand and developments in social structure and political centralisation in Central Italy on the other in the period between 850 and 450 BC. Enormous numbers of slaves were absorbed into Roman society from the third century B.C. onwards. Mainly enslaved prisoners of war, they transformed the quality of life in the Roman Empire beyond recognition. In this anthology the author offers a complete collection of Greek and Latin sources in an English translation which deal with the great slave rebellions in the second and first centuries B.C. In a postscript Zvi Yavetz surveys the controversy on slaves and slavery from the French Revolution to our own days, with an emphasis on the debate between Marxists and non-Marxists. The book is intended for specialists and generalists alike, including those who have had no previous classical education, but could after delving in sources concern themselves with one of the most intriguing problems in world

history. Zvi Yavetz holds the Lessing Chair of Roman History at Tel Aviv University, Israel, and is distinguished visiting professor at Queens College of the City University of New York. He is the author of many books in Hebrew, French and German on Roman history among which are *Julius Caesar and His Public Image* and *Plebs and Principis*. "A divided empire cannot stand. The biggest threat to the Empire comes not from the armies of Boudicca or the hordes of Germania but from within the walls of Rome itself. A new

religious sect, the followers of Christus, are spreading sedition, denying the divinity of the Emperor. And Nero is not a man to be denied. Classical archaeology was long equated to ancient art history. Today these fields find themselves at a major crossroads. The influence on them-from the discipline of anthropology-has increased substantially in the past 15 years, adding to the ways in which scholars can study the Roman past. The classical archaeologist of the 21st century is likely to be versed in Greek and Latin, computer technology, ancient history, great monuments, various hard sciences such as physics or even astronomy, GPS, GIS, surveying, mapping, digitizing, artistic rendering, numismatics, geo-science, astronomy, environmental studies, material culture analysis and/or a host of other disciplines and sub-disciplines. Universities are seeking specialists whose talents embrace not one but

several different fields of research. It is not necessary for each scholar to know everything about each discipline being used within the fields of art history, classical archaeology and anthropology, but these days a basic knowledge of all relevant disciplines is becoming indispensable. This book will layout the basic information and steps necessary to take the beginning archaeologist's search for knowledge of the past and lead them to adventures of the future. There have been numerous textbooks about the art history and monuments of ancient Rome. With this new work, the authors have attempted to create something slightly different. Students of the subject will still be able to gain the essential basic knowledge of the most important works of art and architecture that have been the focus of university art history courses for more than a century and remain the essential starting point for gaining a window into Roman Antiquity. In addition to this, however, anthropology, classical studies, social history and computer graphics have been used throughout this text in order to help the beginning student understand the daily life of the ancient Romans. The authors have sought to emphasize not only the greatest works of ancient art but have also included utilitarian objects which were more typical of the Roman life experience. It is hoped that this holistic approach can afford an appreciation not only of that estimated one-sixth that formed the Roman elite but also the remaining five-sixths who formed the

majority of the Roman people. New technologies are being developed each year allowing increased possibilities for understanding the past. These range from innovations in museology as exemplified by the ruin within a museum approach of Rome's Capitoline Museums to the virtualreality 3D walk-throughs that allow the general public to experience the past first-hand by passing through museums or even reconstructed ancient buildings and sites. If a picture is worth a thousand words, the 21st century is showing that there is a growing desire to offer detailed and intimate snapshots that allow the past to resonate and reveal itself in ways not thought possible a generation ago. In this textbook the authors present more than 400 images, including over 100 new plans and specially commissioned reconstructions. An entertaining and intriguing account of sex in Rome and the exploits of some of Rome's celebrated exponents of sexual permissiveness and perversion Their rivalry will change the world forever. As competition for the imperial throne intensifies, Constantine and Maxentius realise their childhood friendship cannot last. Each man struggles to control their respective quadrant of empire, battered by currents of politics, religion and personal tragedy, threatened by barbarian forces and enemies within. With their positions becoming at once stronger and more troubled, the strained threads of their friendship begin to unravel. Unfortunate words and misunderstandings finally sever their ties,

leaving them as bitter opponents in the greatest game of all, with the throne of Rome the prize. It is a matter that can only be settled by outright war... 'A page turner from beginning to end... on Victorian Britain of the history and literature of ancient Rome. His comprehensive account shows how not only scholars and poets but also engineers, soldiers, scientists and politicians gained inspiration from the writing, theory and practice of their Roman predecessors. The Roman theme is traced in nineteenth-century painting and music as well as literature and political discussion. There are chapters on the imaginative influence throughout the nineteenth century of five major Roman poets, framed by other chapters on Rome and European revolutions, nineteenth-century versions of Roman history, fictions of Rome, imperialism and decadence. Attention is also paid to the influence of developments in archaeology both at Rome and Pompeii and at Romano-British sites. Professor Vance provides a fascinating account of the sense of connection Victorian Britain felt with the Roman experience, a connection made the more complex because Britain had once been a Roman colony and because Christianity took hold and spread under the Roman Empire.

Excerpt from *The Story of Rome as Greeks and Romans Tell It: An Elementary Source-Book*

The object of this volume is to supply pupils in Roman history with interesting and instructive reading from the sources. This purpose has determined not only the selection of the material, but also the method of presentation. Although the book contains some descriptions of institutions, it is largely narrative and biographical; preference has been given to those passages

which illustrate life and character, or which help the reader to an appreciation of general literature. To make the subject-matter intelligible as well as attractive to young readers, the quotations have been so connected and interwoven as to form a continuous story, and the difficulties have been explained in notes and references. These features will doubtless commend the book to many who, having passed the age of the pupil, are still interested in the literature and the life of ancient Rome. As a basis for the text, English translations, so far as they are available, have been used with the consent of the publishers. These translations, however, have been freely altered, with a view chiefly to the simplification of the style; at the same time care has been taken to reproduce faithfully the meaning of the authors represented. The decadence and depravity of the ancient Romans are a

commonplace of serious history, popular novels and spectacular films. This book is concerned not with the question of how immoral the ancient Romans were but why the literature they produced is so preoccupied with immorality. The modern image of immoral Rome derives from ancient accounts which are largely critical rather than celebratory. Upper-class Romans habitually accused one another of the most lurid sexual and sumptuary improprieties. Historians and moralists lamented the vices of their contemporaries and mourned for the virtues of a vanished age. Far from being empty commonplaces these assertions constituted a powerful discourse through which Romans negotiated conflicts and tensions in their social and political order. This study proceeds by a detailed examination of a wide range of ancient texts (all of which are translated) exploring the dynamics of their rhetoric, as well as the ends to which they were deployed. Roman moralising discourse, the author suggests, may be seen as especially concerned with the articulation of anxieties about gender, social status and political power. Individual chapters focus on adultery, effeminacy, the immorality of the Roman theatre, luxurious buildings and the dangers of pleasure. This book should appeal to students and scholars of classical literature and ancient history. It will also attract anthropologists and social and cultural historians. How encounters with the Roman Empire compelled the Jews of antiquity to rethink their conceptions of Israel

and the Torah Throughout their history, Jews have lived under a succession of imperial powers, from Assyria and Babylonia to Persia and the Hellenistic kingdoms. Jews and Their Roman Rivals shows how the Roman Empire posed a unique challenge to Jewish thinkers such as Philo, Josephus, and the Palestinian rabbis, who both resisted and internalized Roman standards and imperial ideology. Katell Berthelot traces how, long before the empire became Christian, Jews came to perceive Israel and Rome as rivals competing for supremacy. Both considered their laws to be the most perfect ever written, and both believed they were a most pious people who had been entrusted with a divine mission to bring order and peace to the world. Berthelot argues that the rabbinic identification of Rome with Esau, Israel's twin brother, reflected this sense of rivalry. She discusses how this challenge transformed ancient Jewish ideas about military power and the use of force, law and jurisdiction, and membership in the people of Israel. Berthelot argues that Jewish thinkers imitated the Romans in some cases and proposed competing models in others. Shedding new light on Jewish thought in antiquity, Jews and Their Roman Rivals reveals how Jewish encounters with pagan Rome gave rise to crucial evolutions in the ways Jews conceptualized the Torah and conversion to Judaism. Constantius is an important, but almost forgotten, figure. He came to the fore in or around 410 when he was appointed Magister Militum (Master of

Troops) to Honorius, the young Emperor of the Western Roman Empire. His predecessor, Stilicho, had been murdered by his own troops and much of Gaul and Hispania had been overrun by barbarians or usurpers. One by one Constantius eliminated the usurpers and defeated or came to terms with the various invading groups. Most notoriously, he allowed the Visigoths to settle in Gaul in return for their help in defeating the Vandals and Alans who had seized parts of Hispania, a decision with far-reaching consequences. Constantius married Honorius' sister and was eventually proclaimed his co-emperor. However, the Eastern Roman Emperor, Honorius' nephew, refused to accept his appointment and Constantius was preparing a military expedition to enforce this recognition when he died suddenly, having been emperor for just seven months. Ian Hughes considers his career, assessing his actions in the context of the difficult situation he inherited.
