In *Personal Effectiveness in Project Management*, project manager and professor Zachary A. Wong, PhD provides readers with the tools and techniques that not only help them improve their own personal performance, but that of their project teams as well. *Personal Effectiveness* begins within. Dr. Wong's decades of *Personal Effectiveness* experience taught him that learning soft skills requires the same rigor as hard skills. In fact, one of the book's most valuable achievements is putting "soft" skills into a "hard" framework that readers can use for themselves and their team members. The book is divided into four modules, each addressing a different aspect of *Personal Effectiveness*: Decision-Making, Motivation, Achievement and Sustainability. The book's unique approach takes the reader through the modules, seeking to clarify and optimize the reader's performance in each area. This book shows college administrators, deans, department heads, and faculty development professionals how to improve the instructional performance of faculty members. It offers strategies for overcoming resistance and motivating faculty members to improve their teaching--and identifies the resources, activities, and services that will help them to succeed. A

Using Data to Improve Learning explains how teachers can incorporate 'no-frills' engagement with data, collected by themselves and others, into day-to-day teaching so that the process is useful, empowering and enjoyable. It presents strategies that are practical enough to attract teachers' interest, feasible enough to implement in ongoing and sustainable ways and rigorous enough to make immediate and positive differences to teaching and learning. The clear, step-by-step approach to theory is reinforced by 'at a glance' chapter summaries, integrated tips and real world examples throughout. Appropriate for all those who are new to engaging with data, those who may have little access to support from mentors or critical friends and those who want to extend the way they use data in their school or classroom, Using Data to Improve Learning provides a practical guide to the principles of action learning and school-based inquiry. In recognition of the challenges faced by busy teachers-the constant swathe of initiatives and reforms and the complexity of schools and school systems-the value of collaboration is emphasised. With teachers working together to collect, analyse, discuss and act upon data, the objectives of meeting professional standards and improving learning outcomes of students are shown to be both achievable and essential to

Cardiac arrest often strikes seemingly healthy individuals without warning and without regard to age, gender, race, or health status. Representing the third leading cause of death in the United States, cardiac arrest is defined as "a severe malfunction or cessation of the electrical and mechanical activity of the heart ... [which] results in almost instantaneous loss of consciousness and collapse". Although the exact number of cardiac arrests is unknown, conservative estimates suggest that approximately 600,000 individuals experience a cardiac arrest in the United States each year. In June 2015, the Institute of Medicine (IOM) released its consensus report Strategies to Improve Cardiac Arrest Survival: A Time to Act, which evaluated the factors affecting resuscitation research and outcomes in the United States. Following the release of this report, the National Academies of Sciences, Engineering, and Medicine was asked to hold a workshop to explore the barriers and opportunities for advancing the IOM recommendations. This publication summarizes the presentations and discussions from the workshop.
