Comparing four key branches of private law in China and Taiwan, this collaborative and novel book demystifies the 'China puzzle'. This is Volume one of a new series on 'New Bank Insolvency Law for China and Europe'. This volume provides a comprehensive analysis of the current Chinese bank insolvency framework, and discusses future developments in the field of Chinese bank insolvency law. This research has been made possible by the Royal Netherlands Academy of Arts and Sciences, and the Chinese Ministry of Education. In this series, researchers of the China University of Political Science and Law, and Leiden Law School's Hazelhoff Centre for Financial Law addressed the question: how best to achieve a modernized bank insolvency regime for China and the EU? The series takes into account some of the most important developments in international restructuring and insolvency law. The volumes on 'New Bank Insolvency Law for China and Europe' therefore present a valuable resource for academics, practitioners and policymakers, and a timely contribution to

scholarly and practical discussions about the development of rules that govern the recovery and resolution of banks. [Subject: Insolvency Law, Chinese Law, Commercial Law, Banking Law] While much international attention has been focused on China's developing economy, dramatic changes are also taking place in its legal system. This book is a groundbreaking, comprehensive introduction to China's legal system, covering the major areas of both civil and criminal law. The authors present fascinating cases and balanced accounts of controversial issues, from copyright law to punishment. By letting Chinese lawyers and judges speak for themselves, the authors also allow readers a surprisingly candid insider's view of real life legal practice. This collection of selected works by Professor Albert H. Y. Chen shows the contours of the author's scholarship as it developed over 35 years of his academic career, from 1984 to the present. The essays are divided into three sections which cover the three major domains of Professor Chen's research. Part I covers the legal developments and controversies of "One Country, Two Systems" since the Hong Kong interpretation on "the right of abode" in 1999 to the anti-extradition movement of 2019. Part II shifts to focus on tradition and modernity in Chinese Law, including China's Confucian and Legalist traditions and how the socialist legal system in China evolved and modernized in the era of "reform and opening". Part III examines the transplantation of Western thinking and constitutionalism to East Asia in modern times and discusses the achievements and failures of these efforts. In conjunction with an introductory chapter that sets out the basic orientation and paradigm of these legal and constitutional studies and an epilogue that reflects on the main themes, this collection exemplifies the author's important contributions to the field and provides insight into how the legal orders in Hong Kong and mainland China have changed over the course of Professor Chen's academic career. In the Xi Jinping era, it has become clear that the rule of law, as understood in the West, will not appear in China soon. But was this ever a likely option? This book argues China's legal system needs to be studied from an internal perspective, to take into account the characteristic architecture of China's Party-state. To do so, it addresses two key elements: ideology and organisation. Part One of the book discusses ideology and the law, exploring how the Chinese Communist Party conceives of the nature of law and its position within its broader range of policy tools. Part Two, on organisation and the law, reviews how these ideological principles manifest themselves in the application of law, as well as the reform of the Party-state. As such, it highlights how the Party's plans and approaches run counter to mainstream theoretical expectations, and advocates a greater attention to the inherent logic of the system itself. In *Climate Change Law in China in Global Context*, seven climate change law scholars explain how the country's legal system is gradually being mobilized to support the reduction of greenhouse gas emissions in China and achieve adaptation to climate change. There has been little English scholarship on the legal regime for climate change in China. This volume addresses this gap in the literature and focuses on recent attempts by the country to build defences against the impacts of climate change and to meet the country's international obligations on mitigation. The authors are not only interested in China's laws on paper; rather, the book explains how these laws are implemented and integrated in practice and sheds light on China's current laws, laws in preparation, the changing standing of law relative to policy, and the further reforms that will be necessary in response to the 2015 Paris Agreement on Climate Change. This comprehensive and critical account of the Chinese legal system's response to the pressures of climate change will be an important resource for scholars of international law, environmental law, and Chinese law. With the commencement of economic reform in China and the subsequent dramatic growth in its economy and of private enterprise both Chinese and foreign, the company law of China has become of great importance. In this pioneering and comprehensive study, Gu This comprehensive study examines the development and changing characteristics of the judicial system and reform process over the past three decades in China. Using a combination of traditional modes of legal analysis, case studies, and empirical research, the study reflects upon the complex progress that China has made, and continues to make, towards the modernisation of its judicial system. It is unique in providing both breadth of coverage and substantive details of the operation of the courts in China. EU investment in China has increased dramatically since the early 1990s and is poised to increase further in light of China's recent accession to the World Trade Organisation. This book explores and critically appraises the existing legal framework governing EU-China investment relations, particularly EU investment in China. The current legal framework is composed of Chinese law, EU law and applicable international law, but the Chinese law is unsystematic and hard to discover and the EU has acquired only shared external investment competence which is vaguely defined. The applicable international treaties are incomplete, incoherent, or either too general or too specialised. Besides this, the international fora to settle investment disputes are still not readily available. Furthermore while law has played a very important role in decision-making by EU investors, the Chinese legal system is generally perceived as ineffective and lacking in effective enforcement of court and arbitration decisions. What the book demonstrates is that the time is ripe for a new international legal framework for foreign investment in China, and that as EU-China economic and political relations continue to improve, construction of such a framework is not only necessary, but also possible. This book explores legal mobilization, culture, and institutions in contemporary China from a perspective informed by 'law and society' scholarship. A comprehensive, structured, and up-to-date introduction to the law governing the dissemination of information in a computer-mediated world in China, *Internet Law in China* stresses the practical applications of the law that are encountered by all individuals and organizations in Chinese cyberspace, but always in the light of theoretical underpinnings. Among the overarching topics treated in the Chinese context are the following: intellectual property protection in cyberspace; privacy of communication and data privacy; electronic contract forming and electronic signature; personal, domestic and international jurisdiction; and free expression in cyberspace. This book is particularly valuable to legal, business, and communication professionals, academics, and students concerned with the regulation of the Internet and related activities in China. It is the first book to focus solely on Chinese Internet law. The first book to systematically explore the legal doctrines and principles that apply to the Internet and related activities in China. Broad coverage: from Internet speech to proprietary interests, privacy issues, electronic contracts, and jurisdiction Original

comparative analysis of China's Internet regulation practice in the global context This book outlines how community sentences and early release options are administered in China. Chen provides empirical insights into the emerging community sector of the Chinese penal system, and illustrates how Chinese criminal courts decide between imprisonment and community sentences. Drawing on interviews with government and non-governmental supervisors, this methodological and rigorous study offers an in-depth discussion of the enforcement of these community sanctions and measures (CSM). By using the CSM reform as an example, this book illustrates the adaptation of Chinese governance and social control. Ultimately, Chen argues that the current model of governance in China (disciplinary governance) cannot guarantee an effective state-agent relationship; it also denies local governments sufficient legitimacy to secure social stability. Finally, proposing that only the rule of law and an active judiciary can complement these two deficiencies, this book will be of great interest to scholars of criminology, law, and penology, as well as anyone who is interested in how China is held together in a socio-legal sense. Legal history studies generally focus mainly on codified law, without attention to actual practice, and on the past, without relating it to the present. Research from Archival Case Records starts from legal practice instead and links the past to the present. This book provides an important critique of mental health law and practice in China, with a focus on involuntary detention and treatment. The work explores China's mental health law reform regarding treatment decision-making in the new era of the UN Convention on the Rights of Persons with Disabilities (CRPD). It adopts a socio-legal approach, not only by undertaking a comprehensive desk-based analysis of the reforms introduced by China's Mental Health Law (MHL) but also examining its implementation based on evidence from practice. The book seeks to investigate whether China's first national MHL takes a step closer to the requirements of the UN Convention on the Rights of Persons with Disabilities on mental health treatment decision-making, and, if not, why not? The book will be of interest to those working in the areas of mental health law and policy, medical law and disability, human rights law, and Asian Studies. The 'rule of law' is more than the mere existence and application of law within the sphere of state activity. Contemporary Chinese debate on the 'rule of law' underlines the limiting of arbitrary government, the materialisation of 'human rights', legal protection of 'rights and interests' and the principle of equality in the impartial legal mediation of conflicts within society's 'structure of interests'. Based upon China interviews and a comprehensive survey of the domestic press and Chinese-language legal journal materials, this book places pre- and post-Tiananmen Square legal reform in political context. The evolving contents of specific laws across the departments of constitutional, administrative, criminal, civil and economic law are assessed in light of the politics and intellectual dynamic of China's legal circles in their struggle to create a 'rule of law'. Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in the China covers every aspect of the subject – the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the China will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law. China has enjoyed considerable economic growth in recent years in spite of an immature, albeit rapidly developing, legal system, a system whose nature, evolution and path of development have been poorly understood by scholars. Drawing on his legal and business experience in China as well as his academic background in the field, Peerenboom provides a detailed analysis of China's legal reforms. He argues that China is in transition from rule by law to a version of rule of law, though most likely not a liberal democratic version as found in economically advanced countries in the West. Maintaining that law plays a key role in China's economic growth, Peerenboom assesses reform proposals and makes his own recommendations. In addition to students and scholars of Chinese law, political science, sociology and economics, this will interest business professionals, policy advisors, and governmental and non-governmental agencies as well as comparative legal scholars and philosophers. This book illuminates what judicial modernity actually meant to the Chinese state and society in the early twentieth century and how the judicial reform resulted in paradoxical consequences due to a lack of resources and a disjunction between the national reform agenda and local social ecology. In *The Limits of the Rule of Law in China*, fourteen authors from different academic disciplines reflect on questions that have troubled Chinese and Western scholars of jurisprudence since classical times. Using data from the early 19th century through the contemporary period, they analyze how tension between formal laws and discretionary judgment is discussed and manifested in the Chinese context. The contributions cover a wide range of topics, from interpreting the rationale for and legacy of Qing practices of collective punishment, confession at trial, and bureaucratic supervision to assessing the political and cultural forces that continue to limit the authority of formal legal institutions in the People's

Republic of China. Democracy and the Rule of Law in China is intended to make available to English-language readers debates among prominent Chinese intellectuals and academics over issues of political, constitutional, and legal reform; modes of governance in urban and rural China; and culture and cultural policy. Building the Rule of Law in China explores the idea that China needs a more globalized and diversified vision for the science of law, presenting the need to think differently from the two major western mainstream legal cultures, the Anglo-American and the continental systems. Other globalized, universalized, and diversified models and experiences in the rule of law from diverse civilizations have much to offer China. Through learning from the strengths exhibited by systems in countries with a very developed and well-organized rule of law, and absorbing essential aspects from different countries, China might be well positioned to promote the development of the rule of law in a robust and comprehensive manner. This book explores the topic from several perspectives, giving the reader an up-to-date resource on the ever-evolving vision for the science of law in China. Explores the situation of rule of law in China as it currently stands Presents a case that China must look beyond the two western systems of law for a more globalized vision Gives analysis on the contemporary situation, and insight into the near future Presents a particular perspective on the rule of law in China by a scholar closely involved with its actual development Translates into English, providing a new and valuable perspective to an English speaking readership Provides an in-depth comparative, empirical and critical analysis of the law and practice of venture capital in China. This timely collection presents articles written by Chinese and Western authors on law reform in the People's Republic of China from its beginning in 1978 until the present day. The first part presents differing perspectives on the history of law reform. Separate sections are devoted to core institutions: the Constitution, the legislature, administrative law, courts, criminal process, the legal profession, extra-judicial dispute resolution and citizen petitions. Alongside an original introduction the book will be of interest to readers with specialized interests in Chinese law but also to anyone interested in China's governance. The rapid evolution of China from an emerging to a mature intellectual property jurisdiction has far-reaching implications for the law, policy and practice of IP, and their links with competition and technology law. Produced in the year China rose to fourth rank globally as user of the international patent system, this volume is an invaluable guide for the policymaker, the analyst and the practitioner alike, setting a thorough exposition of the substantive law and its application within a broader policy context, and offering a comprehensive, timely overview of an IP system just at the time it begins to assume central significance on the world stage. Antony Taubman, Director, IP Division, WTO This edited volume offers an excellent comprehensive overview of China's intellectual property and technology laws. The eminent contributors to this volume have played important roles in shaping China's IP system and in tackling the many challenges confronting it. By making their views of the system readily accessible to an English audience, this volume will undoubtedly add to our understanding of the legal protections and challenges facing innovation industries in China. Mark Wu, Harvard Law School, US The pioneering studies in this book examine the fundamental role of intellectual property and technology laws as China is moving from made in China to created in China. This book also helps us to understand about the interplay between China's intellectual property protection system and the potential for transition of China's economy, and provides numerous means to deal with the legislative difficulties in China's innovation-oriented strategy. Wu Handong, Zhongnan University of Economics and Law, China Written by some of China's leading academic experts and with a foreword by the former Chief Justice of the IP Tribunal of China's Supreme People's Court, this book combines for the very first time a review of both Chinese intellectual property and technology laws in a single volume in English. The book initially focuses on recent amendments to the laws of copyright, trademarks, patents, before moving on to discuss unfair competition and trade secrets, and the protection of intellectual property over electronic networks. Other chapters cover the regulation of digital networks and telecommunications; IT and E-commerce; the new antimonopoly law and competition; and China's position on the TRIPS agreement. Of special note is a chapter written by in-house Counsel and the Chairman of the Quality Brands Protection Committee (a coalition of well known multinational brands) reviewing both brand protection and practical enforcement of intellectual property in China. This book will appeal to scholars and postgraduate students in commercial law (especially in IP, trade, competition, and technology), Chinese studies and business, as well as regulators, international agencies and law firms. Management consultancy and accounting firms, banks and investment firms will also find this book invaluable. Analysis of Chinese environmental law with a focus on the development in statutory regulation, institution building and judicial innovation. This book examines the law reforms of contemporary China in light of the Party-state's ideological transformation and the political economy that shapes these reforms. This involves analysing three interrelated domains: law reform, power and wealth. The contributors to this volume employ a variety of perspectives and analytical techniques in their discussion of key themes including: commercial law reform and its governance of wealth and regulation of economic activity; the influence and authority of the Party-state over China's economic activity; and the influence of wealth and the wealthy in economic governance and legal reform. Utilizing an interdisciplinary approach, this book presents analytical perspectives of new work, or new lines of thinking about the new wealth, power and law reforms of China. As such, critical boundaries are explored between legal and financial reforms and what these reforms signify about deeper ideological, economic, social and cultural transformations in China. The book concludes by asking whether there is a 'China model' of development which will produce a unique variety of capitalism and indigenous variant of rule of law, and examining the 'winners and losers' in the transition from a centrally planned economy to a market economy. Law, Wealth and Power in China will be of interest to students and academics of comparative law, Asian law, Chinese economics and politics, Chinese Studies, as well as professionals in investment banking, finance and government. An examination of China's accommodation of Western constitutional values, in the light of the pending return of British Hong Kong to China. The Joint Declaration which governs the return guarantees a continuance of these values, and this study looks at the resulting tensions between East

and West. This book offers a comprehensive introduction to the developmental history and structural framework of Chinese competition law from a law and economics perspective. It examines the philosophical foundations, the substantive law, and enforcement issues concerning competition law and policy in China by pursuing an economic and comparative approach. Further, the book presents and analyzes competition cases involving monopolistic agreements, abuse of dominant position, and concentration. The book will help professionals and business practitioners to understand the distinct features of competition law and policy in China, and how the substance and enforcement of the law can be compared with competition regulations in the US and EU from an economic perspective. Given its scope, it offers a valuable guide for academic, public sector and professional audiences alike, and will appeal to researchers, students and anyone with an interest in economic law and policy in China. The book can also be used as reading material to accompany courses such as China's Competition Law and Policy, Comparative Competition Law, and Market Regulation in China for foreign students studying Chinese law and policy at the undergraduate, graduate and doctoral levels. The rise of China signals a new chapter in international relations. How China interacts with the international legal order--namely, how China utilizes international law to facilitate and justify its rise and how international law is relied upon to engage a rising China--has invited growing debate among academics and those in policy circles. Two recent events, the South China Sea Arbitration and the US-China trade war, have deepened tensions. This book, for the first time, provides a systematic and critical elaboration of the interplay between a rising China and international law. Several crucial questions are broached. These include: How has China adjusted its international legal policies as China's state identity changes over time, especially as it becomes a formidable power? Which methodologies has China adopted to comply with international law and, in particular, to achieve its new legal strategy of norm entrepreneurship? How does China organize its domestic institutions to engage international law in order to further its ascendance? How does China use international law at a national level (in the Chinese courts) and at an international level (for example, lawfare in international dispute settlement)? And finally, how should "Chinese exceptionalism" be understood? This book contributes significantly to the burgeoning and highly relevant scholarship on China and international law. This book focuses on China's evolution in the field of human rights protection, highlighting its achievements in various systems of human rights protection, as well as its role in international human rights governance and the healthy development of human rights. From the perspective of China's human rights protection, starting with various types of citizens, e.g. women, children and the disabled, the book analyzes and discusses the changes and major events in the country's human rights development path one by one, while also explaining the Chinese stance on human rights development. China is becoming more active in the international human rights cooperation field, playing its unique and constructive role and serving as the participant, builder and contributor of the international human rights governance. This contribution provides the important and timely bilingual version of the Chinese Civil Code and the Supreme People's Court's Judicial Interpretation of the Temporal Effect of the Civil Code, which is purported to keep the global community of lawyers interested in Chinese law informed and updated. The edited volume aims at examining China's role in the field of international governance and the rule of law under the Belt and Road Initiative from a holistic manner. It seeks alternative analytical frameworks that not only take into account legal ideologies and legal ideals, but also local demand, socio-political circumstances, to explain and understand China's legal interactions with countries along the Road, so that more useful insights can be produced in predicting and analysing China's as well as other emerging Asian countries' legal future. Authors from Germany, Korea, Singapore, Mainland China, Taiwan and Hong Kong have contributed to this edited volume, which produces academic dialogues and conducts intellectual exchanges in specific sub-themes. Law and Society in China examines the interplay between law and society from imperial to present-day China. This synoptic book traces the developments of law in Chinese societies, investigates the role of law in social governance, and discusses China's ongoing reforms towards the rule of law with Chinese characteristics. In fostering a comprehensive, rather than piecemeal and disconnected, understanding of the interaction between law and society in China, this book will reduce misconceptions about and enhance appreciation for Chinese law. This book examines the law reforms of contemporary China in light of the Party-state's ideological transformation and the political economy that shapes these reforms. This involves analysing three interrelated domains: law reform, power and wealth. The contributors to this volume employ a variety of perspectives and analytical techniques in their discussion of key themes including: commercial law reform and its governance of wealth and regulation of economic activity; the influence and authority of the Party-state over China's economic activity; and the influence of wealth and the wealthy in economic governance and legal reform. Utilizing an interdisciplinary approach, this book presents analytical perspectives of new work, or new lines of thinking about the new wealth, power and law reforms of China. As such, critical boundaries are explored between legal and financial reforms and what these reforms signify about deeper ideological, economic, social and cultural transformations in China. The book concludes by asking whether there is a 'China model' of development which will produce a unique variety of capitalism and indigenous variant of rule of law, and examining the 'winners and losers' in the transition from a centrally planned economy to a market economy. Law, Wealth and Power in China will be of interest to students and academics of comparative law, Asian law, Chinese economics and politics, Chinese Studies, as well as professionals in investment banking, finance and government. The Political Economy of Competition Law in China provides a unique, multifaceted perspective of China's anti-monopoly law. Intellectual property law and practice in China has changed dramatically since the first edition of this influential book published in 2005. Today, judicial and administrative application of law plays a major role, and accordingly this entirely rewritten new edition draws on an abundance of court and administrative decisions clarifying how the law is applied. In a thorough and systematic manner, the authors clearly demonstrate the sophisticated level of legal certainty available for domestic and foreign entities doing business in China, including the adaptation of the legal framework to new technologies, broadened scope of protected subject

matter, improved quality of filings, and significant enhancement of enforcement not only with regard to remedies but also to procedural aspects. Providing comprehensive coverage of all aspects of intellectual property protection in China - including analysis of IP-related provisions of China's new Civil Code - the book emphasizes issues of concern to foreign traders and investors such as the following: copyright law and software protection; protection of trademarks, including Chinese character and Roman script trademarks, well-known marks and bad faith applications; technology transfer; enforcement of trade secret and patent protection; criminal liability for infringement; unfair competition and antitrust law; role of the binding interpretations of the Supreme People's Court; administrative regulations that supplement the laws; co-operation with administrative authorities; protection of geographical indications; protection of trade names; domain name dispute resolution; special patent-related laws protecting such areas as plant varieties, integrated circuit layout designs; and relevant provisions of the distinct laws of Hong Kong and Macao. Full descriptions of the competencies of China's IP-related institutions are included with detailed attention to procedural matters. Brief historical notes in each chapter feature the most significant changes in each amendment of law and regulation. Because in China the laws are supplemented and interpreted by numerous guidelines and circulars issued by ministries or courts, the up-to-date knowledge and awareness provided in this new edition is essential for all companies investing in China or considering such investment, as well as for practitioners counselling their clients on strategies. In addition, officials and policymakers involved in trade or other relations with China will benefit from a comprehensive update of what the current law is and a critical view of what the challenges are.

Conditions for obtaining an order to preserve maritime evidence Major law and policy issues in the South China Sea are discussed mainly from the perspectives of leading American and European scholars in the study of the complex South China Sea disputes. The issues include regional maritime cooperation and regime building, Southeast Asian countries' responses to the Chinese assertiveness, China's historic claims, maritime boundary delimitation and excessive maritime claims, military activities and the law of the sea, freedom of navigation and its impact on the problem, the dispute between Vietnam and China, confidence-building measures and U.S.-Taiwan-China relations in the South China Sea, and Taiwan's role in the resolution to the South China Sea issues. Over the past three years, there have been several incidents in the South China Sea between the claimants, and also between the claimants and non-claimants over fisheries, collection of seismic data, exploration for oil and gas resources, and exercise of freedom of navigation. Third party concerns and involvement in the South China Sea disputes have been increasing as manifested in actions taken by the United States, India, and Japan. It is therefore important to examine South China Sea disputes from the legal and political perspective and from the view point of American and European experts who have been studying South China Sea issues for many years. This accessible book offer a comprehensive and critical introduction to the law on business organizations in the People's Republic of China. The coverage focuses on the 2005-adopted PRC Company Law and the most recent legislative and regulatory develop This book presents a systematic and conceptualized account of Chinese securities and capital markets law, giving readers nuanced and practical understandings of law and practice in this field in China. It is structured to cover topics specific to foreigner investors in China such as foreign investment enterprises and cross-border mergers and acquisitions in China. The cultural and political background to doing business in China is very significant when seeking to understand the current law in the country and it can be difficult to access information on that background. This book provides an explanation of the law and practice by setting the current law in the context of its development. Part I of the book provides an overview of the capital markets in China, a contextual discussion of the market development and its characteristics, and a critical analysis of the regulatory framework and possible reform routes. Part II is dedicated to the regulation of securities offerings and listings in China. It looks at both government approval requirements and information disclosure requirements. Part III addresses the securities enforcement structure comprising the government regulator and self-regulatory bodies such as stock exchanges. It examines various forms of market misconduct including market manipulation and insider trading. Part IV focuses on mergers and acquisitions in China. It discusses domestic takeovers and cross-border mergers.
