"The perfect nail-biting mystery." --Natasha Preston, #1 New York Times bestselling author *The Future of Energy 2021 Edition* - The guide to sustainability, renewable energy, climate change and the energy transition. The 'Future of Energy' is written to be accessible for anyone interested in learning more about energy. Substantially updated in 2021 to reflect the impact of Covid-19 on the world of energy, the book takes the reader through a future for energy generation, transportation, and utilisation. Concise and comprehensive, the book brings together discussion on energy and thoughts on the range of topics which form the fulcrum of the challenges ahead of us including climate change, hydrogen, heat, sustainability, and renewable energy. Written to spark ideas, discussion and debate the 'Future of Energy' engages the reader in the future challenges and opportunities of this hugely exciting and important field. **Background** There exists a huge range of information on the 'energy transition' with competing technologies and theories vying for supremacy. It is easy to fall into the trap of believing there is an easy answer or 'silver bullet' to the huge challenges we face. It is substantially more complicated with an inevitable patchwork of future technologies, rather than a single simple solution. There is no perfect answer to the challenges we face but most will in some way shape the way we use energy through the next decade and beyond. **About the author** John Armstrong is an engineer whose career has spanned the extremes of the energy industry - giving him a front-row seat on the energy roller-coaster. He began his career constructing oil refineries before moving to work across fossil and renewable electricity generation. John lives in Bath in the United Kingdom with his wife and two children. **Reviews for the 'Future of Energy' books by John Armstrong** Concise while being comprehensive.

*Thorough but with a bit of a personal perspective that makes it interesting. Realistic about the challenges but with a dose of optimism about what could be done. Well-informed but accessible. David Elmes, Professor, Warwick Business School, Sept 2020. I would highly recommend this book to anybody working within energy or interested in learning more about the movement towards clean energy. I'd been looking for a book like this for years but couldn't find anything that wasn't a chunky textbook. Amazon Review, August 2020 A very good guide to the challenges the energy industry faces today. I will be recommending it to all my team to get up to speed with the industry - incredibly accessible in how the ideas are laid out. Mostly Harmless Just when Arthur Dent makes the terrible mistake of starting to enjoy life, all hell breaks loose. Can he save the Earth from total obliteration? Can he save the Guide from a hostile alien takeover? Can he save his daughter from herself? All other chapters will be updated as well, as there has been significant changes in the field over the past eight years. A highly provocative, mindbending, beautifully designed, and visionary look at the landscape of our rapidly evolving digital era. 50 years after Marshall McLuhan's ground breaking book on the influence of technology on culture in *The Medium is the Massage*, Basar, Coupland and Obrist extend the analysis to today, touring the world that's redefined by the Internet, decoding and explaining what they call the 'extreme present'. *THE AGE OF EARTHQUAKES* is a quick-fire paperback, harnessing the images, language and perceptions of our unfurling digital lives. The authors offer five characteristics of the Extreme Present (see below); invent a glossary of new words to describe how we are truly feeling today; and 'mindsources' images and illustrations from over 30 contemporary artists. Wayne Daly's striking graphic design imports the surreal, juxtaposed, mashed mannerisms of screen to page. It's like a culturally prescient, all-knowing email to the reader: possibly the best email they will ever read. Welcome to *THE AGE OF EARTHQUAKES*, a paper portrait of Now, where the Internet hasn't just changed the structure of our brains these past few years, it's also changing the structure of the planet. This is a new history of the world that fits perfectly in your back pocket. 30+ artists contributions: With contributions from Farah Al Qasimi, Ed Atkins, Alessandro Bavo, Gabriele Basilico, Josh Bitelli, James Bridle, Cao Fei, Alex Mackin Dolan, Thomas Dozol, Constant Dullaart, Cecile B Evans, Rami Farook, Hans-Peter Feldmann, GCC, K-Hole, Liam Gillick, Dominique Gonzalez-Foerster, Eloise Hawser, Camille Henrot, Hu Fang, K-Hole, Koo Jeong-A, Katja Novitskova, Lara Ogel, Trevor Paglen, Yuri Patterson, Jon Rafman, Bunny Rogers, Bogosi Sekhukhuni, Taryn Simon, Hito Steyerl, Michael Stipe, Rosemarie Trockel, Amalia Ulman, David Weir, Trevor Yeung. Now celebrating the 42nd anniversary of *The Hitchhiker's Guide to the Galaxy*, soon to be a Hulu original series! "Hitchhiker fans rejoice! . . . [Here's] more of the same zany nonsensical mayhem."—*The New York Times Book Review* It's easy to get disheartened when your planet has been blown up and the woman you love has vanished due to a misunderstanding about space/time. However, instead of being disheartened, Arthur Dent makes the terrible mistake of starting to enjoy life a bit—and immediately all hell breaks loose. Hell takes a number of forms: there's the standard Ford Prefect version, in the shape of an all-new edition of *The Hitchhiker's Guide to the Galaxy*, and a totally unexpected manifestation in the form of a teenage girl who startles Arthur Dent by being his daughter when he didn't even know he had one. Can Arthur save the Earth from total multidimensional obliteration? Can he save the Guide from a hostile alien takeover? Can he save his daughter, Random, from herself? Of course not. He never works out exactly what is going on. Will you? "Douglas Adams is a terrific satirist. . . . He is anything but harmless."—*The Washington Post Book World* From the creation and the tree of knowledge through the Exodus from Egypt and the journey to the promised land; James Kugel shows us how the earliest interpreters of the scriptures radically transformed the Bible. A provocative exploration of the tension between our evolutionary history and our modern woes—and what we can do about it. We are living through the most prosperous age in all of human history, yet we are listless, divided, and miserable. Wealth and comfort are unparalleled, but our political landscape is unmoored, and rates of suicide, loneliness, and chronic illness continue to skyrocket. How do we explain the gap between these truths? And how should we respond? For evolutionary biologists Heather Heying and Bret Weinstein, the cause of our troubles is clear: the accelerating rate of change in the modern world has outstripped the capacity of our brains and bodies to adapt. We evolved to live in clans, but today many people don't even know their neighbors' names. In our haste to discard outdated gender roles, we increasingly deny the flesh-and-blood realities of sex—and its ancient roots. The cognitive dissonance spawned by trying to live in a society we are not built for is killing us. In this book, Heying and Weinstein draw on decades of their work teaching in college classrooms and exploring Earth's most biodiverse ecosystems to confront today's pressing social ills—from widespread sleep deprivation and dangerous diets to damaging parenting styles and backward education practices. Asking the questions many modern people are afraid to ask, *A Hunter-Gatherer's Guide to the 21st Century* outlines a science-based worldview that will empower you to live a better, wiser life. "This funny and fresh take on a classic tale manages to comment on gender roles, racial disparities, and white privilege all while creeping me all the way out. So good."—Zakiya Dalila Harris, author of *The Other Black Girl* *Steel Magnolias* meets *Dracula* in this *New York Times* best-selling horror novel about a women's book club that must do battle with a mysterious newcomer to their small Southern

town. Bonus features: • Reading group guide for book clubs • Hand-drawn map of Mt. Pleasant • Annotated true-crime reading list by Grady Hendrix • And more! Patricia Campbell's life has never felt smaller. Her husband is a workaholic, her teenage kids have their own lives, her senile mother-in-law needs constant care, and she's always a step behind on her endless to-do list. The only thing keeping her sane is her book club, a close-knit group of Charleston women united by their love of true crime. At these meetings they're as likely to talk about the Manson family as they are about their own families. One evening after book club, Patricia is viciously attacked by an elderly neighbor, bringing the neighbor's handsome nephew, James Harris, into her life. James is well traveled and well read, and he makes Patricia feel things she hasn't felt in years. But when children on the other side of town go missing, their deaths written off by local police, Patricia has reason to believe James Harris is more of a Bundy than a Brad Pitt. The real problem? James is a monster of a different kind—and Patricia has already invited him in. Little by little, James will insinuate himself into Patricia's life and try to take everything she took for granted—including the book club—but she won't surrender without a fight in this blood-soaked tale of neighborly kindness gone wrong. This guide, collaboratively written by over a hundred members of the Python community, describes best practices currently used by package and application developers. Unlike other books for this audience, The Hitchhiker's Guide is light on reusable code and heavier on design philosophy, directing the reader to excellent sources that already exist.
