Innovation and Technology in Sports Feb 03 2023 This book presents the proceedings of ICITS 2022 covering different tracks in the field of Sports Engineering and Technology, namely, Instrumentation, Materials, Data Analytics, Biomechanics, Simulation, Equipment Design and Performance Analysis, amongst others. This collection of articles deliberates the key challenges as well as technological innovations that facilitate the enhancement of sporting performance. The readers are expected to gain an insightful view on the current trends, issues, mitigating factors, technological innovations as well as proposed solutions. ?

The International Journal of Indian Psychology, Volume 3, Issue 3, No. 1 Dec 29 2019
This gives me an immense pleasure to announce that 'RED'SHINE Publication, Inc' is coming out with its third volume of peer reviewed, international journal named as 'The International Journal of Indian Psychology. IJIP Journal of Studies' is a humble effort to come out with an affordable option of a low cost publication journal and high quality of publication services, at no profit no loss basis, with the objective of helping young, genius, scholars and seasoned academicians to show their psychological research works to the world at large and also to fulfill their academic aspirations.

Families and Functioning in Childhood and Adolescence Mar 12 2021

BIS-HSS 2020 Feb 08 2021 The Covid-19 pandemic has changed our activities, like teaching, researching, and socializing. We are confused because we haven't experienced before. However, as Earth's smartest inhabitants, we can adapt new ways to survive the pandemic without losing enthusiasm. Therefore, even in pandemic conditions, we can still have scientific discussions, even virtually. The main theme of this symposium is "Reinforcement of the Sustainable Development Goals Post Pandemic" as a part of the masterplan of United Nations for sustainable development goals in 2030. This symposium is attended by 348 presenters from Indonesia, Malaysia, UK, Scotland, Thailand, Taiwan, Tanzania and Timor Leste which published 202 papers. Furthermore, we are delighted to introduce the proceedings of the 2nd Borobudur Symposium Borobudur on Humanities and Social Sciences 2020 (2nd BIS-HSS 2020). We hope our later discussion may result transfer of experiences and research findings from participants to others and from keynote speakers to participants. Also, we hope this event can create further research network.

Cardiovascular Diseases and Depression May 14 2021 The world is witnessing a burgeoning global epidemic of chronic cerebro- and cardiovascular disease and depression disorders. The reader will find this comprehensive book to be a long-needed, up-to-date knowledge base on these increasingly recognized comorbid conditions that have long-term consequences for individual function and well-being and society in general. This comprehensive book outlines the complex and bidirectional relationship between various types of depression and cerebro- and cardiovascular diseases. It is written by a range of experts in the field, including psychiatrists, cardiologists, neuroscientists, psychologists, and epidemiologists, with the aim of presenting and discussing the most recent evidence on the pathophysiology, neurobiology, and clinical presentation of these common and disabling comorbid conditions and the available pharmacological, psychological, and behavioral interventions. By elucidating the underlying clinical and neurobiological mechanisms in the brain and the rich interplay between the body and the brain biology, the book brings together the latest knowledge of this overlapping area in Psychiatry and Cardiology. The clear descriptions of evidence-based approaches to clinical treatment ensure that it will serve as both an up-to-date overview and a future guide for practicing clinicians and graduate students.

Proceeding: International Conference on Biopsychosocial Issues Apr 12 2021 ICPSY 2018 (International Conference on Biopsychosocial Issues in 2018) an Inter-multidisciplinary Approach was held to achieve the vision of the faculty of Psychology: becoming an academic community of psychology that is beneficial to multicultural communities with a biopsychosocial approach based on Christian values: love, justice

and honesty. It is a pleasure to present these Proceedings of the First International Seminar and Workshop on Biopsychology, which will be of interest to all concerned with the scientific aspects of this area. This seminar was organised by the Faculty of Psychology University of Psychology and brought together key note speakers Dr. Augustina Sulastri (Indonesia), Prof. Rosnah Ismail (Malaysia), Dr. Evangeline Castronuevo-Ruga (Philippine) and Ms. Janet Boekhout (The Netherlands) and participants from 4 countries for the presentation of 24 papers.

Quantifying and Processing Biomedical and Behavioral Signals Dec 21 2021 The book is based on interdisciplinary research on various aspects and dynamics of human multimodal signal exchanges. It discusses realistic application scenarios where human interaction is the focus, in order to identify new methods for data processing and data flow coordination through synchronization, and optimization of new encoding features combining contextually enacted communicative signals, and develop shared digital data repositories and annotation standards for benchmarking the algorithmic feasibility and successive implementation of believable human-computer interaction (HCI) systems. This book is a valuable resource for a. the research community, PhD students, early stage researchers c. schools, hospitals, and rehabilitation and assisted-living centers e. the ICT market, and representatives from multimedia industries

Dialogues in Music Therapy and Music Neuroscience: Collaborative Understanding Driving Clinical Advances Jan 10 2021 Music is a complex, dynamic stimulus with an unparalleled ability to stimulate a global network of neural activity involved in attention, emotion, memory, communication, motor co-ordination and cognition. As such, it provides neuroscience with a highly effective tool to develop our understanding of brain function, connectivity and plasticity. Increasingly sophisticated neuroimaging technologies have enabled the expanding field of music neuroscience to reveal how musical experience, perception and cognition may support neuroplasticity, with important implications for the rehabilitation and assessment of those with acquired brain injuries and neurodegenerative conditions. Other studies have indicated the potential for music to support arousal, attention and emotional regulation, suggesting therapeutic applications for conditions including ADHD, PTSD, autism, learning disorders and mood disorders. In common with neuroscience, the music therapy profession has advanced significantly in the past 20 years. Various interventions designed to address functional deficits and health care needs have been developed, alongside standardised behavioural assessments. Historically, music therapy has drawn its evidence base from a number of contrasting theoretical frameworks. Clinicians are now turning to neuroscience, which offers a unifying knowledge base and frame of reference to understand and measure therapeutic interventions from a biomedical perspective. Conversely, neuroscience is becoming more enriched by learning about the neural effects of 'real world' clinical applications in music therapy. While neuroscientific imaging methods may provide biomarking evidence for the efficacy of music therapy interventions it also offers important tools to describe time-locked interactive therapy processes and feeds into the emerging field of social neuroscience. Music therapy is bound to the process of creating and experiencing music together in improvisation, listening and reflection. Thus the situated cognition and experience of music developing over time and in differing contexts is of interest in time series data. We encouraged researchers to submit papers illustrating the mutual

benefits of dialogue between music therapy and other disciplines important to this field, particularly neuroscience, neurophysiology, and neuropsychology. The current eBook consists of the peer reviewed responses to our call for papers.

Forces of Nature and Cultural Responses Jul 04 2020 How do and how did people perceive, manage and respond to natural disasters? How are the causes of natural disasters explained in history, how are they explained today? This volume investigates relationships between forces of nature and human culture in a multidisciplinary context bridging science and the humanities. Forces of nature and cultural responses is divided into four sections: (1) ball lightnings, (2) earthquakes and tsunamis, (3) volcanic eruptions and plagues, and (4) hurricanes and floodings. Specifically, Section 1 investigates theories and case studies of ball lightning phenomena. Section 2 includes a psychological study on the impact of earthquakes on academic performance, a study on tsunami vulnerability and recovery strategies in Thailand and a study on the social and economic aftermaths of a tsunami and a hurricane in Hawaii. Section 3 consists of a chapter on volcanic eruptions and plagues as well as cultural responses in Ancient Times and a study on contemporary vulnerability and resilience under chronic volcanic eruptions. Section 4 investigates the impact of hurricane Katrina on the current jazz scene in New Orleans and cultural responses to floodings in The Netherlands in Early Modern Times.

Human-Centered Technology for a Better Tomorrow Mar 24 2022 This book acts as a compilation of papers presented in the Human Engineering Symposium (HUMENS 2021). The symposium theme, "Human-centered Technology for A Better Tomorrow," covers the following research topics: ergonomics, biomechanics, sports technology, medical device and instrumentation, artificial intelligence / machine learning, industrial design, rehabilitation, additive manufacturing, modelling and bio-simulation, and signal processing. Fifty-nine articles published in this book are divided into four parts, namely Part 1—Artificial Intelligence and Biosimulation, Part 2—Biomechanics, Safety and Sports, Part 3—Design and Instrumentation, and Part 4—Ergonomics.

Clinical Pain Management Second Edition: Practice and Procedures Oct 07 2020 Largely reorganised and much expanded in this second edition, Practice and Procedures brings together in a single volume general methods of pain assessment and presents the wide range of therapies that can be provided by a range of health care disciplines. Authored by a multidisciplinary team of experts, chapters can stand alone for readers looking for a general overview of the methods of techniques for pain management available to them or work to complement chapters in the preceding three volumes, providing practical procedures and applications in the management of acute, chronic and cancer pain. The book is divided into three parts. Part One covers the principles of measurement and diagnosis, including history taking and examination, the selection of pain measures, diagnostic tests and novel imaging techniques. Part Two discusses the full range of therapeutic protocols available, from pharmacological therapies, through psychological techniques, physical therapy and international procedures, to techniques specific to pain assessment and management in paediatric patients. Part Three provides information on planning, conducting, analysing and publishing clinical trials, with invaluable guidance on the techniques of systematic review and meta-analysis in pain research. Part Four considers the role of multidisciplinary pain management teams, their organization, their place within different

health care systems, and how best to manage change when implementing such a service. Part Five concludes the volume, investigating the use of guidelines, standards and quality improvement initiatives in the management of post-operative pain, and discussing the expert medicolegal report.

Molecular Mechanisms of Functional Food Mar 31 2020 MOLECULAR MECHANISMS OF FUNCTIONAL FOOD Comprehensive resource for understanding state-of-the-art mechanisms behind food health effects This book provides information on the development and validation of functional foods towards their market and industrial application. It covers the available information on developments, efficacy, and testing and safety, while demonstrating the proven or potential effects of food on health and disease. With contributions from the foremost experts in the field, this book will bring readers up to speed on the state of the art in the mechanisms behind food health effects, from their physiological bases to their conception, current uses, and future developments. Sample topics covered by the authors include: The molecular mechanisms of action of antioxidant fibers, prebiotics, ginger, and cinnamon Saffron, a functional food with potential molecular effects Pseudocereals, ancestral grains that can serve as a source of bioactive compounds for functional foods Molecular effects of future functional foods – psychobiotics, chronobiotics, hempseed, opuntia, common and carioca beans, coffee and cocoa by-products Food industry professionals, government workers involved in projects related to food, and students in programs of study related to food can use this book as an up-to-date reference to fully understand the effects that many common and uncommon foods have on humans.

The International Journal of Indian Psychology, Volume 3, Issue 3, No. 7 Aug 29 2022 This gives me an immense pleasure to announce that 'RED'SHINE Publication, Inc' is coming out with its third volume of peer reviewed, international journal named as 'The International Journal of Indian Psychology. IJIP Journal of Studies' is a humble effort to come out with an affordable option of a low cost publication journal and high quality of publication services, at no profit no loss basis, with the objective of helping young, genius, scholars and seasoned academicians to show their psychological research works to the world at large and also to fulfill their academic aspirations.

Proceedings of the International Conference on Sustainable Innovation on Humanities, Education, and Social Sciences (ICOSI-HESS 2022) Aug 17 2021 This is an open access book. This proceeding consists of research presented in ICOSI UMY, on 20-21 July 2022 at Universitas Muhammadiyah Yogyakarta. The conference covers the topic of governance, international relations, law, education, humanities, and social sciences. The COVID-19 pandemic first time that occurred in 2019, has brought many changes that constrain all countries to adapt quickly. The crisis has shown vulnerabilities and gaps in several primary systems, including healthcare, social protection, education, value chains, production networks, financial markets, and the ecosystem. One of the efforts that each country can take to rise from the COVID-19 pandemic is through strengthening multilateralism, international solidarity, and global partnerships. Hence, this conference raises the central theme "Strengthening Global Partnership for Resilience." This theme covers sub-themes that allow prospective scholars to submit their papers for 'Virtual Conferences' presentation under the following scopes: Social Sciences, Humanities, Educations, and Religious Studies. Presented papers will also get a chance to be published in our remarkable partner publishers. Through the

International Symposium on Social, Humanities, Education, and Religious Studies (ISSHERS) and Asian Conference on Comparative Laws (Asian-COL), we hope that participants will express their innovative and creative ideas to provide benefits and contribute knowledge to strengthen global partnerships among countries. Finally, all 75 papers published in this proceedings are expected not only as research output but can be developed further into prototypes or evidence for policy making.

The First 1000 Days in the Nordic Countries: Psychosocial Interventions and Psychological Tests: A Review of the Evidence Dec 01 2022 Available online: <https://pub.norden.org/nord2021-037/> The report provides an overview and short systematic review of the psychosocial interventions and psychological tests used in the Nordic countries during the first 1000 days of a child's life, i.e. from the prenatal period until two years of age. A total of 63 interventions and 33 tests were reviewed. Findings reveal that, although a large number of interventions and tests are available for the target groups in the Nordic countries, evidence regarding their effectiveness or psychometric properties is often lacking or insufficient. Thus, it is important that research efforts be enhanced in the Nordic region to strengthen the evidence-base of the interventions and instruments that practitioners rely upon in order to assess and support mental wellbeing for Nordic children and families during this critical period in their lives.

Substance Use Disorders Treatment in Therapeutic Communities Apr 24 2022 This book presents an in-depth qualitative study carried out with inpatients under treatment for substance use disorders (SUDs) in seven therapeutic communities (TCs) located in three countries: Peru, Nicaragua and Czech Republic. By comparing the experiences in these different cultural contexts, the book presents a grounded theory of SUDs treatment in TCs from a cross-cultural perspective, identifying factors that influence the efficacy of SUDs treatment in TCs based on interviews carried out with inpatients. Based on rigorous qualitative research methods, this book presents not only a comparative analysis of TCs located in different cultural contexts, but also analyzes the cross-cultural nature of the therapeutic programs adopted in these communities, such as the combination of traditional Amazonian medicine based on the therapeutic use of ayahuasca with conventional psychotherapy and occupational therapy, among other approaches. Departing from the interviews carried out with inpatients, the authors present a comparative analysis of how the different TCs address important issues related to SUDs treatment, and complement this analysis with machine-generated summaries of relevant scientific papers. These summaries contain results of similar research projects conducted in other cultural contexts. Substance Use Disorders Treatment in Therapeutic Communities: A Cross-Cultural Approach presents the results of a unique comparative study with great translational potential which will be of interest to both researchers and practitioners working in TCs. This unique comparative study identifies factors affecting the efficacy of therapeutic programs and proposes a grounded theory which aims to serve as an important source of information for therapists and other professionals working with SUDs treatment and for the replication of applied therapeutic methods in other TCs.

Measuring Health Nov 19 2021 Worldwide economic constraints on health care systems have highlighted the importance of evidence-based medicine and evidence-based health policy. The resulting clinical trials and health services research studies require

instruments to monitor the outcomes of care and the output of the health system. However, the over-abundance of competing measurement scales can make choosing a measure difficult at best. *Measuring Health* provides in-depth reviews of over 100 of the leading health measurement tools and serves as a guide for choosing among them. Now in its third edition, this book provides a critical overview of the field of health measurement, with a technical introduction and discussion of the history and future directions for the field. This latest edition updates the information on each of the measures previously reviewed, and includes a complete new chapter on anxiety measurement to accompany the one on depression. It has also added new instruments to those previously reviewed in each of the chapters in the book. Chapters cover measurements of physical disability, social health, psychological well-being, anxiety, depression, mental status testing, pain, general health status and quality of life. Each chapter presents a tabular comparison of the quality of the instruments reviewed, followed by a detailed description of each method, covering its purpose and conceptual basis, its reliability and validity and, where possible, shows a copy of the actual scale. To ensure accuracy of the information, each review has been approved by the original author of each instrument or by an acknowledged expert.

Researches in Economics, Econometrics & Finance Oct 19 2021 As the outcome of the tenth international congress (Current Debates in Social Sciences), the papers in this volume cover a wide range of topics related to the main theme of the conference, titled "Current Debates in Social Sciences", and basically focus on economics, finance and econometrics. Even though most of the papers deal with the empirical analysis on economics and finance, there are also studies on econometrics analysis. In this context, the articles in the book draw attention to the different aspects of economics, finance and econometrics such as game theory, Fin- Tech, financial deepening, financial literacy, debt level of credit card of younger generation and case studies, the relationship between Turkey technology index and other World technology index, carbon emission rate and economic growth, the effects of capital inflows on economic growth, work engagement, loneliness at work and stress, measure and compare the performance of Type-A mutual funds in Turkey. We believe that these studies would contribute to the development of debates in social sciences and encourage interdisciplinary approaches.

Nesne 18 Sep 17 2021 Nesne Psikoloji Dergisi Say? 18

Assessment Scales in Depression and Anxiety - CORPORATE Apr 05 2023 There are a number of books recently published on assessment scales for depression and anxiety. However, these books are generally more detailed than clinicians require, are specific to one or other condition, or involve specialty populations such as children or geriatrics. To meet the needs of clinicians treating patients with depressive and anxiety disorders, this volume aims to bring together empirically validated assessment scales. In a concise and user-friendly format, *Assessment Scales in Depression and Anxiety* illustrates the assessment scales used in clinical trials and research studies; shows how to select an assessment scale and to decide which scale to use for a particular clinical situation; and provides sample assessment scales for clinicians to use in their practice.

ISPHE 2020 Sep 29 2022 Sports Science Faculty, Universitas Negeri Semarang is the host of the 5th International Seminar on Physical Health and Education (ISPHE), which

were held virtually on July 22nd, 2020 in Semarang (Indonesia), in collaboration with the Health Education National Networking (JNPK) Indonesia, the Indonesian Public Health Association (IAKMI) and some prominent Indonesia universities in health education and sport (Malang State University, Gorontalo State University, and Manado State University). This seminar brings together academic experts and practitioners from South East Asia and beyond to share new knowledge, ideas, and experiences pertaining to Health Education, Physical Activities, and Applied Technology for Health as well as those in related fields in order to accommodate more aspirations and expressions of sport's and health communities.

Emerging Trends in IoT and Computing Technologies Jan 22 2022 This book includes the proceedings of the International Conference on Emerging Trends in IoT and Computing Technologies (ICEICT-2022) held at Goel Institute of Technology & Management, Lucknow, India.

LECTURE NOTES IN SOCIAL SCIENCES AND HUMANITIES: FRONTIER RESEARCH

Dec 09 2020 This e-book presents selected papers from social sciences and humanities research area. The aim of this lecture notes is to provide a platform to the researchers and practitioners from both academia as well as industry to meet and share cutting-edge development in the field. This e-book will serve as a valuable reference resource for academics and researchers across the globe.

WARDS 2019 Oct 31 2022 We are delighted to introduce the proceedings of the second edition of the Warmadewa Research Institution Conference on Land Use in Regional Spatial Plans and Investments for the Development of Sustainable Tourism in Bali. This conference is aimed to bring researchers, developers and practitioners around the world who are taking into account and developing the technical land use system for the purpose of sustainable tourism development at a national sphere.

INTERNATIONAL JOURNAL OF INDIAN PSYCHOLOGY May 26 2022

Interaction Between Neuropsychiatry and Sleep Disorders: from Mechanism to Clinical Practice Aug 05 2020

Psychosocial Advances in Neuro-Oncology Jun 14 2021 Neuro-oncology is a rapidly growing field concerned with scientific developments and clinical applications related to neuroscience, neuropsychology, cancer and oncology. Neuro-oncological disorders include cancers that directly affect the central nervous system (CNS), such as brain tumours and brain metastases, and non-CNS cancers with treatments that produce neurocognitive impairment. To date, the biological mechanisms and neuropsychological effects of brain tumour and cancer have been the dominant focus in neuro-oncology literature. In terms of psychosocial aspects of care, people's understanding of their diagnosis and symptoms and how they cope with their illness has a major influence on their emotional well-being and quality of life. The development and evaluation of psychological and supportive care interventions for people with brain tumour is an area of emerging research and of high interest to health professionals working in the field. This Research Topic aims to enhance understanding of the psychological and social consequences of brain tumour and other cancers impacting neurocognitive function. It also aims to showcase new developments in assessment and psychosocial intervention approaches.

The Impact of Martial Arts on Depression, Anxiety, Stress, Anger, Well-being, Self-transcendence, and Self-enhancement Feb 20 2022 Studies on exercise and athletics

show that physical activity can be therapeutic and help someone who experiences psychological distress. With these positive results, the literature has not distinguished which form of exercise provides the most beneficial effects. In the current literature, there is a plethora of research on the various forms of exercise. Despite this research, the amount of evidence-based research on how martial arts impacts mental health is scarce. In this study, a nonexperimental quantitative design was used to investigate the relationships between the effects of martial arts on depression, anxiety, stress, anger, well-being, self-transcendence, and self-enhancement. By comparing martial artists to non-martial-artists, this study provided the opportunity to examine if participating in this activity is beneficial to one's mental health. This study consisted of 256 participants between the ages of 18 and 65, divided evenly in each group (n = 128). To gauge these variables, participants completed an online questionnaire which consisted of a demographic questionnaire, the Depression Anxiety Stress Scale (DASS-42), the World Health Organization-5 Well-Being Index (WHO-5), the Short Schwartz's Value Survey (SSVS), the Clinical Anger Scale (CAS), and the Marlowe-Crowne Social Desirability Scale-Short Form C. The data showed that, on average, martial artists have lower levels of depression, anxiety, stress, and anger; however, only the variables of anxiety and stress were statistically significant. As for non-martial-artists, scores were higher but not statistically significant in self-transcendence and self-enhancement, while scores were higher and statistically significant in well-being. These findings further shed light on the effect martial arts has on a person's mental health. However, additional research is needed to support these findings, as barriers such as the COVID-19 pandemic likely impacted these results.

The International Journal of Indian Psychology, Volume 7, Issue 1, Version 2 Jun 26 2022

Interdisciplinary Research to Improve Diagnosis and Treatments in Psychiatry Mar 04 2023

Proceedings of the 3rd International Conference on Quantitative, Social, Biomedical and Economic Issues 2019 Jan 28 2020 This year's Conference is characterized by the research contributions of Scientists from Cyprus, England, Saudi Arabia and Greece. This year's Conference is organized by the Greek Foundation for Research in the Quantitative, Social and Economic Subjects, which is a non-profit Company with Articles of Association registered in the Chamber of Non-for-profit organizations. This Conference is a continuation, in a broader sense, of the four International Conferences which were organized by myself during the years 2003, 2009, 2013, and 2015, under the auspices of the Technological Educational Institute of Athens, as well as the 1st and 2nd International Conference on Quantitative, Social, Biomedical and Economic Issues, during the years 2017, 2018, Athens. The International Conferences of the years 2017, 2018, were organized under the Auspices of the Greek Foundation for Research in the Quantitative, Social and Economic Subjects which is based in Athens, Greece and has links with an International group of Academics. This Conference is focusing on the impact of Education on the innovation process, the productivity and the well-balanced development of a country. The findings of (Varsakelis, Volume 35, Issue 7, September 2006, Pages 1083-1090, ELSEVIER) support the hypothesis that the higher the investment of a society in the quality of education, the higher the output of innovation activity. Furthermore, the development level of the governmental institutions is

positively correlated with innovation activity. The aim of this Conference is to become a forum for the analysis of subjects related to the Quantitative, Social, Biomedical and Economic Sciences, the present state in Greece for the sectors of Education, Health, Innovative Business and the lessons learnt from them, in the context of the serious economic crisis in Europe and, particularly, in Greece. This Conference, also, is the opportunity for many highly respected scientists to present and exchange ideas in their respective research areas with the aim of initiating new joint projects. The new developments in the sectors of contemporary Science and Economy are important and the need for a clear and responsible information is very high regarding, also, the possibility of fake news through the Internet.

Computational Intelligence in Communications and Business Analytics Jun 02 2020
This book constitutes the refereed proceedings of the Third International Conference on Computational Intelligence, Communications, and Business Analytics, CICBA 2021, held in Santiniketan, India, in January 2021. The 12 full papers and 8 short papers presented in this volume were carefully reviewed and selected from 84 submissions. The papers are organized in topical sections on computational forensic (privacy and security); computational intelligence; data science and advanced data analytics; and intelligent data mining and data warehousing.

Co-building a New Eco-Social World: Leaving No One Behind in Indian Perspective Jul 16 2021
This book is a conference proceeding of XL Annual National Conference of Indian Society of Professional Social Work (www.ispsw.net) held at Chandigarh, India from 27th -28th May 2022. This was released as a Souvenir during the conference. The conference theme was " Co-building a New Eco-Social World: Leaving No One Behind in Indian Perspective" as the title of this book. The title 'Co-building a New Eco-Social World: Leaving No One Behind in Indian Perspective', is retained in concordance with the theme of World Social Work Day 2022 which "presents a vision and action plan to create new global values, policies and practices that develop trust, security and confidence for all people and the sustainability of the planet". It "will be a highlight opportunity for the social work profession to engage all social work networks and the community they work within to make contributions to the values and principles which enable all people to have their dignity respected through shared futures". The theme is pertinent in the Indian perspective and expected to benefit academicians, students, Social workers and professionals irrespective of the area they are working in.

Impact of the Coronavirus Pandemic (COVID-19) on Mood Disorders and Suicidal Thoughts May 02 2020

Willard and Spackman's Occupational Therapy Sep 05 2020
Willard and Spackman's Occupational Therapy, Twelfth Edition, continues in the tradition of excellent coverage of critical concepts and practices that have long made this text the leading resource for Occupational Therapy students. Students using this text will learn how to apply client-centered, occupational, evidence based approach across the full spectrum of practice settings. Peppered with first-person narratives, which offer a unique perspective on the lives of those living with disease, this new edition has been fully updated with a visually enticing full color design, and even more photos and illustrations. Vital pedagogical features, including case studies, Practice Dilemmas, and Provocative questions, help position students in the real-world of occupational therapy practice to help prepare them to react appropriately.

Manual for the Depression Anxiety Stress Scales May 06 2023

COVID-19 Pandemic: Mental health, life habit changes and social phenomena Jul 28 2022

Bullying by Peers and in the Family: Precursors, Consequences and Intervention Nov 07 2020

Data Science and Security Feb 29 2020 This book presents best selected papers presented at the International Conference on Data Science for Computational Security (IDSCS 2022), organized by the Department of Data Science, CHRIST (Deemed to be University), Pune Lavasa Campus, India, during 11 – 12 February 2022. The book proposes new technologies and discusses future solutions and applications of data science, data analytics and security. The book targets current research works in the areas of data science, data security, data analytics, artificial intelligence, machine learning, computer vision, algorithms design, computer networking, data mining, big data, text mining, knowledge representation, soft computing and cloud computing.

Psychological status of medical workers throughout the COVID-19 pandemic and beyond: Mental health emergence, prevalence and interventions Jan 02 2023

radiocaley.com
