**The Allure of the Automobile** Jun 30 2020 The Allure of the Automobile presents eighteen of the world's rarest and most brilliantly conceived cars from 1930 to the mid-1960s, including masterpieces from Bugatti, Duesenberg, Delage, Porsche, Mercedes-Benz, Jaguar, and Ferrari. Created for the privileged few (and in some cases previously owned by Clark Gable and Steve McQueen), these luxurious, custom built automobiles embodied speed, style, and elegance; they influenced and were influenced by contemporary art, architecture, fashion, and design. Many of the featured automobiles are one of a kind or were built largely by hand and in small numbers. The racing motorcar is a potent symbol of twentieth century modernity, embodying speed, style, elegance, and good design. Whether a practical tool or part of a celluloid fantasy, the automobile remains a powerful symbol embedded in our collective cultural consciousness. This book contains an illustrated text with period photographs of the cars, exploring the evolution of the automobile from the opulent and luxurious French custom coachwork models of the early 1930s to post-World War II triumphs of German engineering to the supremacy of Italian sport-car design in the second half of the century. Jaguar XK140/150 In Detail Sep 13 2021 Jaguar's series of XK sports cars used the remarkable twin overhead camshaft engine that was first exposed to the public in 1948 in the new XK120 two-seater, which took the motoring world by storm. For 1954 the XK120 was replaced by the mildly restyled XK140 model, with an increase in power, optional overdrive and a roomier cockpit. It was replaced in 1957 by the XK150. With disc brakes on all wheels, the option of engines up to 265bhp and a completely new body, the XK150 was an extremely competent performance car with more than a touch of glamour. This book opens with an exposition of the background to the introduction of the XK140, a key model because the XK120 was such a hard act to follow. Then comes a full technical analysis of the new car, covering all aspects of the chassis, running gear, engine and transmission. This sets the scene for the coverage of the XK150. Major production changes during the evolution of the two models are recorded, and production and sales worldwide are analyzed in depth. The author also provides information on prototypes and special-bodied cars.

**Million-Dollar Muscle Cars** May 10 2021 About the book: In the 1960s and 1970s American automakers produced millions of muscle cars: high-performance cars more adept at competition than transportation. The baby boom generation snapped up these cars and proceeded to use them as intended, drag and street racing the cars until there was nothing left of them. No longer minimum-wage high schoolers, today's boomers enjoy more disposable income than any generation in history. And many of them are spending that income on highly collectible muscle cars. Because so few muscle cars survived the abuse of young drivers back in the day, muscle car prices have skyrocketed, with mundane muscle cars commanding six-figure prices and the most significant muscle cars surpassing the million-dollar mark. Respected muscle car expert Colin Comer and top photographer David Newhardt tell the story of each of these rarest of rare cars in *Million-Dollar Muscle Cars*, the only book dedicated to these top-flight cars. Lexus Feb 28 2023 A behind-the-scenes look at Lexus's surprising twenty-year success story—in a revised new edition In the 1980s, German brands BMW and Mercedes-Benz dominated the luxury car market and had little reason to fear competition from Japan. But in 1989, Toyota entered the market with the Lexus LS 400, a car that could compete with the Germans in every category but price—it was US\$30,000 cheaper. Within two years, Lexus had overtaken Mercedes-Benz in the United States and made a stunning success of Toyota's brave foray into the global luxury market. *Lexus: The Relentless Pursuit* reveals why Toyota decided to take on the German automakers and how the new brand won praise and success for its unparalleled quality, unforgettable advertising, and unprecedented customer service. From the first boardroom planning session to Lexus's entry into the mega-luxury supercar market, this is the complete and compelling story of one of the world's most admired brands. Includes a new Foreword by legendary designer Erwin Lui, an Afterword with updates since the first edition, and a new Coda by leading Japanese automotive journalist Hisao Inoue Covers the racetrack triumph—and tragedy—behind the new US\$375,000 Lexus LFA supercar Offers important business lessons for brand managers and executives For car enthusiasts, business leaders, and anyone interested in branding and marketing, *Lexus: The Relentless Pursuit* offers an amazing story of excellence and innovation in the automotive industry.

*About Mathematics* Jul 24 2022 Mathematics is an essential component of the educated mind. It has two important roles to play: as queen of the sciences (providing the logical structure that holds science together) and as a handmaiden to those sciences (carrying out the computations that apply scientific concepts.) Unfortunately, a gulf exists between science and the humanities, and our text, *About Mathematics*, seeks to bridge that gap, to serve humanities students just as

humanities texts are offered to inform science students. In doing so, unlike most math texts, we avoid the usual focus on detailed techniques to expose instead some of the important concepts and values of mathematics.

Art of the Hot Rod Mar 20 2022 The best hot rods are art on four wheels, and this book, a collection of studio photography of the cars produced by the world's top hot-rod builders, is nothing less than a gallery of the best of American hot rodding. Profiling top builders like Pete Chapouris, Roy Brizio, Vern Tardel, Troy Trepanier, and 15 others and featuring studio portraits of their most outstanding custom creations, this book celebrates the uniquely American marriage of mechanical know-how to an inspired sense of style and design. Built from the ground up, pieced together from salvaged parts, rebuilt with classic looks and futuristic technology—these are automotive works of art, as powerful on the page as they are on the street. Through the stunning portraiture of master photographer Peter Harholdt, *Art of the Hot Rod* captures these magnificent creations as never seen before.

**All in Good Time** Jun 10 2021 *All in Good Time* is the remarkable story of George Daniels (1926-2011), the master craftsman, who was born into poverty but raised himself to become the greatest watchmaker of the twentieth century. Daniels stands alone in modern times as the inventor of the revolutionary co-axial escapement, the first substantial advance in portable mechanical timekeeping over the lever escapement, which has dominated ever since its invention in 1759. Daniels's love of mechanics embraced not only the minute, however - he was also a passionate collector and driver of historic motorcars. This revised and expanded edition of his autobiography also contains a new section that illustrates and discusses over thirty of the pocket and wrist-watches Daniels himself made over the years. Witness here the triumph of intelligence, ingenuity, matchless skill and singularity of purpose over the most unpromising of beginnings.

**How to Teach Story Writing at Key Stage 1** Oct 15 2021 *How to Teach Story Writing at Key Stage 1* is a practical manual for teachers, to be used directly in the classroom. The book begins with a series of language games, designed to warm up creativity and strengthen the imagination. This is followed by a series of creative story workshops, based on the writer's own experience both as a teacher and poet running workshops in schools. These workshops focus on growing the roots of story writing through story telling and reading, and begin with the importance of learning a few well-known tales. There are ideas for drama, role-play and art, and a few model stories are provided for story telling. Other workshops explore simple ideas for creating new stories, based around simple familiar patterns. The book also offers advice on how to organize an effective workshop for younger children, and demonstrates how to teach story writing in a dynamic, creative and imaginative way in relationship with the KS1 national literacy framework. Workshops include the story of our lives; stories that make a circle; stories about problems; days of the week tales; humbug, stuff and nonsense stories; quests; repetitive tales; wishing stories; warning stories; and cooking the story soup.

*The Camera* Feb 25 2020 Ansel Adams (1902-1984) produced some of the 20th century's most iconic photographic images and helped nurture the art of photography through his creative innovations and peerless technical mastery. The Camera--the first volume in Adams' celebrated series of books on photographic techniques--has taught generations of photographers how to harness the camera's artistic potential. This time-honored handbook distills the knowledge gained through a lifetime in photography and remains as vital today as when it was first published. Along with visualization, image management, Adams' famous Zone System, and other keys to photographic artistry, The Camera covers 35mm, medium-format, and large-format view cameras, while offering detailed advice on camera components such as lenses, shutters, and light meters. Beautifully illustrated with photographs as well as instructive line drawings, this classic manual belongs on every serious photographer's bookshelf. "Adams is a clear-thinking writer whose concepts cannot but help the serious photographer." - New York Times "A master-class kind of guide from an undisputed master." - Publishers Weekly Over 1 million copies sold. Publisher's Note: This ebook of The Camera works best as a digital companion to the print edition. The ebook was produced by electronically scanning and digitizing a print edition, and as a result, your reading device may display images with halftone or moiré patterns.

*If the Allies Had Fallen* Dec 05 2020 What if Stalin had signed with the West in 1939? What if the Allies had been defeated on D-Day? What if Hitler had won the war? From the Munich crisis and the dropping of the first atom bomb to Hitler's declaration of war on the United States and the D-Day landings, historians suggest "what might have been" if key events in World War II had gone differently. Written by an exceptional team of historians as if these world-changing events had really happened. If The Allies Had Fallen is a spirited and terrifying alternate history, and a telling insight into the dramatic possibilities of World War II. Contributors include: Thomas M. Barker, Harold C. Deutsch, Walter S. Dunn, Robert M. Love, D. Clayton James, Bernard C. Nalty, Richard J. Overy, Paul Schratz, Dennis E. Showalter, Gerhard L. Weinberg, Anne Wells, and Herman S. Wolk.
